All:

As discussed in the Assistant Secretaries meeting Monday, attached is a template to use for the data call on National Monuments. To refresh your memory, Jim is asking for a spreadsheet of all DOI managed National Monuments with general information about each. Please share with vour bureaus/offices for response.

I believe this applies only to a subset of you, but am copying all the AS folks as an FYI to the others. As always, let me know if you have questions or comments. Thank you!

Walter, Kristin and Mike.

Good Morning. Per my email from this past Monday, attached is an email from Amy Holley that contains the spreadsheet that Amy developed in response to Jim Cason's request for some basic information regarding monuments.

Mike - I'm including a copy of the email I send to Kristin and Walter on Monday for context here it is...

Kristin and Walter.

At today's weekly meeting with Jim Cason and the Acting Assistant Secretaries, Jim told us that an information request will soon be issued by the Department involving monuments. Specifically, the Department will be compiling a list of monuments and will be asking for the following information:

- 1. Name of the monument;
- 2. Location of the Monument;
- 3. Year the monument was created:
- 4. Location of the monument; and
- 5. Values being protected by the monument designation.

He asked Amy Holley to develop a template for this information. I anticipate receiving the template within the next couple of days. When I receive it, I will forward it on to you. A deadline for completion of this request was not discussed, although I anticipate a deadline will be established when the template is issued.

Rich,

Here's BOEM's input. Not sure what the first column is supposed to represent; we put in our name as the one forwarding this to the list. However, we don't play a role in managing these. They are all jointly managed by Commerce and DOI (mostly NOAA and FWS).

Have a good weekend.

Walter

Walter, Kristin and Mike,

Good Morning. Per my email from this past Monday, attached is an email from Amy Holley that contains the spreadsheet that Amy developed in response to Jim Cason's request for some basic information regarding monuments.

Mike - I'm including a copy of the email I send to Kristin and Walter on Monday for context - here it is...

Kristin and Walter,

At today's weekly meeting with Jim Cason and the Acting Assistant Secretaries, Jim told us that an information request will soon be issued by the Department involving monuments. Specifically, the Department will be compiling a list of monuments and will be asking for the following information:

- 1. Name of the monument;
- 2. Location of the Monument;
- 3. Year the monument was created:
- 4. Location of the monument; and
- 5. Values being protected by the monument designation.

He asked Amy Holley to develop a template for this information. I anticipate receiving the template within the next couple of days. When I receive it, I will forward it on to you. A deadline for completion of this request was not discussed, although I anticipate a deadline will be established when the template is issued.

As discussed in the Assistant Secretaries meeting Monday, attached is a template to use for the data call on National Monuments. To refresh your memory, Jim is asking for a spreadsheet of all DOI managed National Monuments with general information about each. Please share with your bureaus/offices for response.

I believe this applies only to a subset of you, but am copying all the AS folks as an FYI to the others. As always, let me know if you have questions or comments. Thank you!

Hi Rich,

A quick question.

Does the total acreage listed for Gold Butte National Monument (Row 24 - 296,937) only cover BLM's portion or does it also include the portion of that monument that falls under Reclamation?

Reclamation is reporting 11,779 acres for this same monument on their report, so just thought I should check to ensure we are not double counting.

Hi Jeff,

The BLM figure includes both. Of the approximately 296,937 acres of Federal lands, approximately 285,158 acres are BLM and 11,779 are BOR, but after issuance of the proclamation, the Secretary shall, consistent with applicable legal authorities, transfer administrative jurisdiction of the BOR lands within the boundaries of the monument to the BLM.

As discussed in the Assistant Secretaries meeting Monday, attached is a template to use for the data call on National Monuments. To refresh your memory, Jim is asking for a spreadsheet of all DOI managed National Monuments with general information about each. Please share with your bureaus/offices for response.

I believe this applies only to a subset of you, but am copying all the AS folks as an FYI to the others. As always, let me know if you have questions or comments. Thank you!

Subject: Re: National Monuments Data Call To: "Cardinale, Richard" < richard cardinale@ios.doi.gov > Cc: Amy Holley < Amy Holley@ios.doi.gov> Hi Rich, A quick question. Does the total acreage listed for Gold Butte National Monument (Row 24 - 296,937) only cover BLM's portion or does it also include the portion of that monument that falls under Reclamation? Reclamation is reporting 11,779 acres for this same monument on their report, so just thought I should check to ensure we are not double counting. Christina On Wed, Mar 22, 2017 at 4:27 PM, Cardinale, Richard < richard cardinale@ios.doi.gov> wrote: Christina, Attached please find the monuments data you requested. All:

Attached is the compilation for the national monuments data call, as well as notes from Christina on some verifications and adjustments. Could you (or your bureaus) please review and let us know if you have edits or questions. Thank you again for your help with this!

- Updated proclamation vs. Antiquities Act; researched and included additional designation categories for clarity
- · Notated DOI and non-DOI land
- Reconciled duplicates with conflicting data points (such as differing acreage and locations)
- · Converted square mileage references to acreage for consistency and for analysis
- Cleaned up references to National Parks versus National Monuments (a number of National Monuments were transferred/merged into National Parks); added notes to clarify
- Added additional columns to capture notes, and capture changes in National Monument size
- Revised "Synopsis of Values" as needed for brevity

edits.xlsx

Hi Rich

Attached is the table with BLM's edits per your request (this document was locked such that we couldn't show track changes).

We mostly removed duplicate BLM entries and added federal and non-federal acres (we added state and private inholdings to the column header to clarify). We also noticed that many of the Resource Objects and Values (ROV's) that we originally submitted for those NM's designated by Proclamation were replaced with the wording from the actual Proclamation and the list of ROV's we submitted only remain for those that are Congressionally designated. This is completely fine except that it should be noted that courts give deference to BLM and the ROV's that are further defined by BLM through NEPA, in addition to the more general nature of the Proclamation language. We have gone back in and added "BLM ROV's Defined through Management Plans" below the Proclamation language.

	All:	

Attached is the compilation for the national monuments data call, as well as notes from Christina on some verifications and adjustments. Could you (or your bureaus) please review and let us know if you have edits or questions. Thank you again for your help with this!

- Updated proclamation vs. Antiquities Act; researched and included additional designation categories for clarity
- · Notated DOI and non-DOI land
- Reconciled duplicates with conflicting data points (such as differing acreage and locations)
- Converted square mileage references to acreage for consistency and for analysis
- Cleaned up references to National Parks versus National Monuments (a number of National Monuments were transferred/merged into National Parks); added notes to clarify
- Added additional columns to capture notes, and capture changes in National Monument size
- Revised "Synopsis of Values" as needed for brevity

Hi Rich - after further discussion, we think it is a little confusing where the notes indicate BOEM manages areas within the monuments, so we propose to delete them. I am revising a clean version with these edits made.

Thanks, Emily

Redesignated as NHS in 2006 through 11uth Congress. No. 7395 January 17 2001 The Minidoka Interminent National Monument is a unique and irreplaceable historical
									resource which protects historic structures and objects that provide opportunities for public education and
									interpretation of an important chapter in American history—the internment of Japanese Americans during World War II.
									On February 19 1942 President Franklin D. Roosevelt signed Executive Order 9066
									authorizing the Secretary of War and military commanders to designate military areas
									from which "any or all persons may be excluded" and to "provide for residents of any such area who are excluded therefrom such transportation food shelter and other
									accommodations as may be necessary." Starting in early 1942 m litary authorities began designating military
									exclusion areas in the States of Cal fornia Washington Oregon and Arizona and the territory of Alaska. Following the signing of Executive Order 9066 American citizens and resident a iens of Japanese ancestry living in the
									designated exclusion areas were ordered to
									evacuate their homes and businesses and report to temporary assembly centers located at fairgrounds horse racetracks and other make-shift facilities.
									To provide more permanent accommodations for the evacuees President Roosevelt
									established the War Relocation Authority (WRA) in March 1942. The WRA oversaw the construction of ten relocation centers on Federa ly owned lands in remote areas of six
									western States and Arkansas including the Minidoka Relocation Center in Idaho.
									Alaskan Native residents of the Aleutian and Priblioff Islands and members of other other control to the control of the Aleutian and Priblioff Islands and members of other other control to the control of the control
									ethnic and religious groups were also relocated or interned during the course of the war. Established in August 1942 the Minidoka Relocation Center also known as the Hunt
									Site was located on Federal lands in Jerome County in south central Idaho. During its
									operation from August 1942 to October 1945 the population reached a peak of 9 397 Japanese Americans from Washington State Oregon and Alaska. The Center included
									over 33 000 acres of land with administrative and residential facilities located on
									approximately 950 acres. The Center had more than 600 buildings including administrative religious residential educational mess medical manufacturing

									September 15 2016: For generations communities and fami ies have relied on the waters of the northwest Atlantic Ocean and have told of their wonders. Throughout New England the maritime trades and especially fishing have	
									supported a vibrant way of life with deep cultural roots and a strong connection to the health of the ocean and the	
									bounty it provides. Over the past several decades the Nation has made great strides in its stewardship of the ocean but the ocean faces new threats from varied uses c imate change, and related impacts. Through exploration, we	
									continue to make new discoveries and improve our understanding of ocean ecosystems. In these waters the	
									Atlantic Ocean meets the continental shelf in a region of great abundance and diversity as well as stark geological relief. The waters are home to many species of deep-sea corals fish whales and other marine mammals. Three	
									submarine canyons and beyond them four undersea mountains lie in the waters approximately 130 miles southeast of Cape Cod. This area (the canyon and seamount area) includes unique ecological resources that have long been the	
									subject of scientific interest. The canyons start at the edge of the geological continental shelf and drop from 200	
		Northeast Canvons							meters to thousands of meters deep. The seamounts are farther off shore at the start of the New England Seamount chain rising thousands of meters from the ocean floor. These canyons and seamounts are home to at

										ember 1 1978: Admiralty Island is outstanding for its superlative combination of scient fic	
									assure continued opport	miralty Island contains unique resources of scientific interest which need protection to tunities for study. Admiralty Island has been continuously inhabited by Tlingit Indians for	
									approximately 10 000 ye	ears. Archeological sites and objects are plent ful in the areas of Angoon Chalk Bay	
1									wnitewater Bay and oth continuing value for stud	er bays and inlets on the island. These resources provide historical documentation of dy. The continued presence of these natives on the island add to the scientific and historical	
									value of the area. The cu	Iltural history of the Tlingit Indians is rich in ceremony and creative arts and complex in its	
									social legal and political in a relatively unspoiled in	systems. Admiralty provides a unique combination of archeological and historical resources natural ecosystem that enhances their value for scientific study. Subsequent to exploration	
									and mapping by Captain	George Vancouver at the end of the 18th century Russian fur traders Yankee whalers and	
1										have left objects and sites on Admiralty which provide valuable historical documentation of politation of the island and its resources. Admiralty Island is rich in historic structures and	
									sites including whaling s	stations canneries old mining structures and old village sites for example K Ilisnoo V llage	
										rring saltery station were established in 1880. Unusual aspects of the island ecology include on of animal species including dense populations of brown bears and eagles because of th	
										the mainland. This peculiar distribution enhances the island's value for scientific study. The	
									unique island ecology inc	cludes the highest known density of nesting bald eagles (more than are found in all the othe	•
									America. Admiralty Islan	numbers of Alaska brown bear; and the largest unspoiled coastal island ecosystem in North Id was added to the Tongass National Forest in 1909 and specific portions of the island have	
									been designated as bear	and eagle management areas and numerous scientific studies of the bear and eagle habitat	
		Part of Tongass		Admiralty Island National						scientists from around the world. The island is an outdoor living laboratory for the study of a brown bear. Protection of the entire island exclusive of the Mansfield Peninsula is	
Yes	US Forest Service	National Forest	Alaska	Monument	1978	Antiquities Act	1 100 000.00		necessary to preserve in	tact the unique scientific and historic objects and sites located there.	
									scientific and historical fo	ember 1 19 8: M sty F ords is an unspoiled coastal ecosystem contain ng significant eatures unique in North America. It is an essentially untouched two mi lion-acre area in the	
										theast Alaska within which are found nearly all of the important geological and ecological	
										gion including the complete range of coastal to interior climates and ecosystems in a ia. Among the objects of geologic importance are extraordinarily deep and long fiords with	
										Is of feet. Active glaciers along the Canadian border are remnants of the massive ice bodies	
									that covered the region a	as recently as about 10 000 years ago at the end of the Pleistocene epoch. However there al advances and retreats in more recent historic periods. Some of the area has been free	
									from glaciation for only a	a short period of time creating the unusual scientific phenomenon of recent plant	
									succession on newly exp	osed land with the accompanying animal species. The Behm Canal the major inlet at the e than fifty miles long and extraordinary among natural canals for its length and depth. The	
									watershed of the Unuk F	River which comprises the northern portion of the Misty Fiords area has its headwaters in	
									Canada. It is steeply mou	untainous and glaciated and contains the full range of ecosystems and climates from interior gs and lava flows add to the uniqueness of the area and its value for scientific investigation.	
									South of the Unuk the C	Chickamin River System and the Le Duc River originate in active glaciers and terminate in	
									Behm Canal. Further sou	or the Rudyerd Bay Flords and Walker Cove are surrounded by high cold lakes and mountains canada. First inhabitants of Misty Flords may have settled in the area as long ago as 0 000	
									years. The area contains	cultural sites and objects of historical sign ficance including traditional native hunting and	
									fishing grounds. Later his	storical evidence includes a mid-1800's military post-port entry on Tongass Island and a	
									salmon cannery in Behm representative of nearly	Canal established in the late 800's. Misty Fiords is unique in that the area includes wildlife every ecosystem in Southeast Alaska most notably bald eagles brown and black bears	
									moose wolves mountai	in goats and Sitka black-tailed deer. Numerous other bird species nest and feed in the area	
									notably falcons and water	erfowl. Misty Fiords is a major producer of all five species of Pacific salmon and is especially on. Numerous other saltwater freshwater and anadromous fish species and shellfish are	
									plentiful in this area whi	ich is an extraordinarily fertile interface of marine and freshwater environments. Unusual	
		Part of Tongass							plant ife includes Pacific	sliver and subalpine fir trees near the northern limit of their range. The area includes an forests ranging from coastal spruce-hemlock to alpine forests. As an intact coastal

"WHEREAS certain Government-owned lands in the State of Florida have situated therein various objects of geological and scientific interest; and WHEREAS it appears that it would be in the public interest to reserve such lands as a national monument to be known as the Santa Rosa Island National Monument." SCR. 301. (a) in order to preserve for the benefit and enjoyment of present and future generations the outstanding paleontological sites known as the Hagerman Valley fossil sites to provide a center for continuing paleontological research and to provide for the deplay and interpretation of the scientific specimens uncovered at such sites there
	Beds National								is hereby established the Hagerman Fossil Beds National Monument (hereinafter in this title referred to as the
FWS/Bureau of Reclamation (USBR)	Monument Hanford Reach National Monument	Idaho	Benton Frank ir and Grant Counties WA	1988	Congress Antiquities Act	4 334.65			"monument"). Proclamation 7319 June 9 2000: The Hanford Reach National Monument is a unique and biologically diverse landscape encompassing an array of scientific and historic objects. This magnificent area contains an irreplaceable natural and historic fleapy reserved by unusual circumstances. Maintained as a buffer area in a federal reservation conducting nuclear weapons development and more recently environmental cleanup activities with limits on development and human use for the past 50 years the monument is now a haven for important and increasingly scarce objects of scientific and historic interest. Bisected by the stunning Hanford Reach of the Columbia Niver the monument contains the largest remnant of the shrub-steppe ecoxystent that once blanketed the Columbia Niver Basin. The monument is ablo one of the few remaining archaeologically rich areas in the western Columbia Plateau containing well-preserved remnants of human history spanning more than 100 Ouyears. The monument is a biological processor of tectonic volcanic and erosive power. The monument is a biological tressure.
	Harriet Tubman Underground								Partially redesignated as NHPin 2014 through 113th Congress. WHEREAS it is in the public interest to preserve and
NPS & FWS	Railroad National Historical Park	Maryland	Church Creek	2013	Antiquities Act	11 750.00	480.00		Partially receignated as Nerlin 2014 through 11stn Congress. WheterAs it is in the public interest to preserve and protect the objects of historic and scientific interest associated with Harriet Tubman and the Underground Railroad in Dorchester County Maryland;
NPS	Hohokam Piman National Monument	Arizona	Coolidge	1972	Congress	1 690.00		1 690.00	Hohokam Pima National Monument recognizes the archaeological remains of Snaketown a Hohokam village inhabited from about 300 AD to around 1200 AD. Not open to the public. Established "to preserve and interpret for the benefit and inspiration of the people a size containing sign ficant archeological values: including the irrigation systems in the vale jost central Archano developed by the Hohokam and Pima Indians and their descendants"
	Holy Cross National								Established and then abolished by Congress in 1950. "WHEREAS the figure in the form of a Greek Cross found on the side of the Mount of the Holy Cross in the State of Colorado is an object of much pub ic interest; and WHEREAS the proper protection of the part of the mountain on which this .figure is found appears to be desirable.

										No. 7395 January 17. 2001 The Minidoka Intermment National Monument is a unique and irreplaceable historical resource which protects historics structures and objects that provide opportunities for public education and interpretation of an important chapter in American history—the internment of Japanese Americans during World War III. On February 19 1942 President Franklin D. Roosevelt signed Executive Order 9066 authorizing the Secretary of War and military commanders to designate military areas from which "any or all persons may be excluded" and to "provide for residents of any such area who are excluded therefrom such transportation food shelter and other exclusion areas in the States of claffornia Washington Ordeon and Arizona and the territory of Alaxka. Following the signing of Executive Order 9066 American citizens and resident a lens of Japanese ancestry living in the designated exclusion areas who are excluded and a significant of the Company of the States of claffornia Washington Orgon and Arizona and the territory of Alaxka. Following the signing of Executive Order 9066 American citizens and resident a lens of Japanese ancestry living in the designated exclusion areas were ordered to evacuate their homes and businesses and resport to temporary assembly centers located at fairgrounds hones carectracks and other make-shift facilities. To provide more permanent accommodations for the evacuese President Roosevelt established the War Reflecation Authority (WRA) in Markor 1994. Developed the exclusion except the except stabilished the War Afransas including the Minidoka Redocation Center in Idaho. Alaxkan Native residents of the Aleutian and Problioff Islands and members of other esteric and residential facilities. Secretaed on approximately 9052 groups were also observed country in south central falsho. During its operation from August 1942 to October 1945 the population reached a peak of 9 397 Japanese American Freiniculed over 33 000 acres of land with Administrative and residential facilities located

		Mojave Trails National								February 12 2016: The Mojave Trails area of southern Cal fornia is a stunning mosaic of rugged mountain ranges ancient law a flows and spectacular sand dunes. It is a landscape defined by scarcity and shaped by travel. The area exemplifies the remarkable ecology of the Mojave Desert where the hearty insistence of life is scratched out from unrelenting heat and dyness. This junnishing environment has also forged the unique human history of the area from ancient settlements uproteed by a changing climate to the armies of General George S. Patton Jr. as they trained for battle in North Africa. With historic American trading routes: trails followed by Spanish explorers a transcontinental ral line and the Nation's most famous highway; the Mojave Trails area tells the American story of exploration migration and commerce. The Mojave Trails area is an invaluable treasure and visit continue to series as an irreplaceable national resource for geologists ecologists archaeologists and historians for generations to come. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including geology pleantological resources springs and rigrarian areas. Bare plant species unique invertebrates?

Established in USFs and then transferred to Rio Grande NF in 1930 through 8 st Congress. "WHEREAS certain Journal coffmantions in the State of Colonado within the Rio Grande and Cochetopa National Forests are of unusual scient fic interest as illustrating erratic erosion and It appears that the public interests would be promoted by reserving said formations as a National Monument."
NPS	Walnut Canyon National Monument Arizi	ona Flagstaf	f 1915	Antiquities Act	960.00	3 251.42	Established under USFS. Transferred to NPS in 1933. "WHEREAS certain prehistoric ruins of ancient cliff dwellings stutated upon public lands of the United States and located in what is commonly known as Walnut Canyon about eight mile south-east of the city of Rigastial Arrivana are of great etherloogies scientific and educational interest and tappears that the public interests would be promoted by reserving these relics of a vanished people with as much land as may be necessary for the proper protection thereof as a National Monument."
NPS	Waco Mammoth National Monument Texa	as Waco	2015	Antiquities Act	7.11		July 10 2015. In 1978 two young foss I hunters found a large bone protruding from an eroded rawine near the Bosque (New about 4.5 mis en north of the center of Wixor Texas. They took the bone to nearly Suplor University where it was ident field as part of the femur (upper leg bone) of a Columbian Mammoth (Mammuthus columbi) a dominant species in North America during the Pleistocene Epoch. The Columbian Mammoth the largest of all mammoth species stood with a shoulder height reaching 12 to 14 feet and weighed an estimated 7 to 8 tons. Over the next 20 years Baylor University oversaw the excavation of the site where the remains of 24 Columbian Mammoths were found along with the remains of associated animals of the late Pleistocene including Western Camel (Camelops hesternus) saber-toothed cat (Homostherium) dwarf anteloge (cf. Capromeyy) American Alligator (Aligator mississippiensis) and glant tortosic (Hesperotestuch). These remains contain the Nation's only recorded discovery of a nursery herd (Temales and offspring) of Pleistocene mammoths. comprising at least 18 of the uncarthed mammoths.
NPS	Virgin Islands Coral Reef National Monument Virgi	gin Islands St. John		Antiquities Act	12 708.00	11 608.48	January 17 2001: The Virgin Islands Coral Reef National Monument in the submerged lands off the Island of St. John in the U.S. Virgin Islands contains all the elements of a Caribbean tropical marine ecosystem. This designation furthers the protection of the scientific objects included in the Virgin Islands National Park created in 1956 and expanded in 1962. The biological communities of the monument the in a fragile interdependent relationship and include habitats essential for sustaining and enhancing the tropical marine ecosystem: mangrows: sea grass beds coral reefs octocoral hardbooms and communities shallow mud and fine sediment habitat and algal plains. The fishery habitats deeper coral reefs octocoral hardboottom and algal plains of the monument are all objects of scientific interest and essential to the long-term sustenance of the tropical marine ecosystem.
BLM	Vermilion Cliffs National Monument Arize	ona St. Geor	rie 2000	Antiquities Act	279 558.00		November 9 2000. Amil the sandstone sickrock brillant citf's and rolling sandy plateaus of the Vermillon Citf's National Mountern the outstanding objects of scientific and historic interest. Despite its and climate and rugged isolation the monument contains a wide variety of biological objects and has a long and rich human history. Full of natural splendor and a sense of softuted this area remains remote and unspoted qualities that are essential to the protection of the scient fic and historic objects it contains. The monument is a geological treasure. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Cultural and Historic Resources Geology Parla River Vegetation Wilderness Wildlife Wildlife-Biphorn Sheep Wildlife-Pinountain Lion Wildlife-Ponophorn Antelope

									nedesignated National Park and Preserve in 1960 through 96th Congress. An area of Southeastern Maska adjacent
									to the International Boundary with Canada contains a variety of landforms including high mountain peaks and steep
									canyons with associated geological ecological biological and historical phenomena of great importance.
									The area includes the greatest assemblage of mountain peaks over 14 500 feet in elevation found in the Nation the
									nation's second highest mountain (Mount St. Elias at 18 008 feet) several inactive and one active volcano (Mount
									Wrangell) and an active glacial complex including some of the largest and longest glaciers in the Nation. The high
									mountain peaks and glaciers offer an excellent opportunity for glaciological studies. The Malaspina Glacier is listed
									on the National Registry of Natural Landmarks.
									Thermal features in the area include the mud cones and hot springs on the western base of Mount Drum. More
									complete undeveloped river systems exist here than in any other land area in the Nation with more than 1 000 miles
									of powerfully running silt-laden rivers.
									Biologica ly unique subspecies of flora and fauna have developed in the Bremner and Chitina River Valleys. As a result
									of their isolation by virtue of ice fields and the Copper River these areas are virtually ecological islands in which
									development of subspecies is largely unaffected by interchange with outside plant and animal species.
									Wildl fe populations include the largest population of wild mountain sheep in North America moose mountain goat
									and a non-migratory population of caribou. The area is the only part of Alaska where four of the five Ident flable
									forms of bear occur including the interior grizzly the coastal brown bear the black bear and the rare blue-color
				1					phase of the black bear called glacier bear. Along the coast of the Gulf of Alaska bald eagles and a large and varied
1			1	1	1			1	shorebird population occur.
									Cultural development within the area is of interest to archeologists and historians. Three major culture areas
1			1	1	1			1	Cultural development within the area to an interest to archeologists and instination. Three major founds areas converge here each with distinctive cultural patterns: the North Arbapascans the Marchapascans the Chugach.
1			1	1	1			1	Mining history is evidenced by the Kennecott Copper Works a National Historic Landmark.
									The land withdrawn and reserved by this Proclamation for the protection of the geological archeological biological
									and other phenomena enumerated above supports now as it has in the past a unique subsistence culture of the
									local residents. The continued existence of this culture which depends on subsistence hunting and its availability
									for study enhances the historic and scientific values of the natural objects protected herein because of the ongoing
		Wrangall-St. Elias							interaction of the subsistence culture with those objects. Accordingly the opportunity for local residents to engage
		National Park and							in subsistence hunting is a value to be protected and w II continue under the administration of the monument.

		Agua Fria National								The windswept grassy mesas and formidable canyons of Agua Fria National Monument embrace an extraordinary array of Scientific and historic resources. The ancient ruins within the monument with their breathtaking vistas and spectacular petrolyghs provide a link to the past effering insights into the leves of the peoples who once inhalted this part of the desert Southwest. The area's architectural features and artifacts are tangible objects that can help researchers reconstruct the human past. Such objects and more importantly the spatial relationships among them provide outstanding opportunities for archeologists to study the way humans interacted with one another

The area is one of the most undisturbed corners of the broader Great Basin region which extends from the Sierra Nevada Mountains in the west to the Colorado Plateau in the east. The pattern of basin fault and range that characterizes this region creates a dramatic topography that has inspired inhabitants for thousands of years. The vast rugged landscape redefines our notions of distance and space and brings into sharp focus the will aid nersolve of the people who have lived here. The unbroken expanse is an invaluable treasure for our Nation and wil continue to serve as an irreplaceable recorner for archaeologists historians and ecologists for generations to come.

		Belmont-Paul Women's Equality								Apr 11.2 06 : The Sewall-Belmont House (House) located at 144 Constitution Avenue. Northeast in Washington O.C. — a few steps from the U.S. Capitol — has been home to the National Warm's Party (NWPs) since 1929. From this House the NWP's founder Alice Paul wrote new language in 1943 for the Equal Rights Amendment which became known as the "Alice Paul Amendment" and led the flight for its passage in the Congress. From here throughout the 20th century Paul and the NWP drafted more than 600 pieces of legislation in support of equal rights and advocated trielessly for womer's political social and economic equality not just in the United States but	
	NPS	National Monument	D.C.	Washington	2016	Antiquities Act	0.34			also internationally. While the House's role in women's history makes it a nationally significant resource the building litse f has an interesting past.

									September 15 2016: For generations communities and families have relied on the waters of the northwest Atlantic	
									Ocean and have told of their wonders. Throughout New England the maritime trades and especially fishing have	
									supported a vibrant way of I fe with deep cultural roots and a strong connection to the health of the ocean and the bounty it provides. Over the past several decades the Nation has made great strides in its stewardship of the ocean	
									but the ocean faces new threats from varied uses climate change and related impacts. Through exploration we	
									continue to make new discoveries and improve our understanding of ocean ecosystems. In these waters the Atlantic Ocean meets the continental shelf in a region of great abundance and diversity as well as stark geological	
									relief. The waters are home to many species of deep-sea corals fish whales and other marine mammals. Three	
									submarine canyons and beyond them four undersea mountains lie in the waters approximately 130 miles southeas of Cape Cod. This area (the canyon and seamount area) includes unique ecological resources that have long been the	
									subject of scientific interest. The canyons start at the edge of the geological continental shelf and drop from 200	
	FWS & NOAA;	Northeast Canyons							meters to thousands of meters deep. The seamounts are farther off shore at the start of the New England Seamount chain rising thousands of meters from the ocean floor. These canyons and seamounts are home to at	
	Bureau of Ocean		Atlantic Ocean/Massachuss						least 54 species of deep-sea corals which live at depths of at least 3 900 meters below the sea surface. The corals	(Proclamation 9496)

Procuramon east uceremeer 1. 19 is mistyr include in North America. It is an estimated that the state of the	
Coast Mountains of Southeast Alaska within which are found nearly all of the important geological and ecological	
characteristics of the region including the complete range of coastal to interior climates and ecosystems in a	
remarkably compact area. Among the objects of geologic importance are extraordinarily deep and long fiords with sea of 16s right phousands of feet Act they glaciers along the Canadian border are remants of the massive ice bodies	
that covered the region as recently as about 10 000 years ago at the end of the Pleistocene epoch. However there	
have been periodic glacial advances and retreats in more recent historic periods. Some of the area has been free from glacialation for only a short period of time creating the unusual scientific phenomenon of recent plant	
rrom gacation in only a short perion of time creating the unusual secies. The Behm Canal the major inlet at the succession on newly exposed ind with the accompanying animal species. The Behm Canal the major inlet at the	
heart of the area is more than fifty miles long and extraordinary among natural canals for its length and depth. The	
watenshed of the Unuk River which comprises the northern portion of the Mistry Fiorifs area has its headwaters in Canada. It is Except ymountainous and glaciated and contains the full range of ecosystems and climates from interior in	
Consider. As secrept incommence and general content are the area and its value for scient from the constant and the area and its value for scient fit integration.	
South of the Unuk the Chickamin River System and the Le Duc River originate in active glaciers and terminate in	
Behm Canal. Further south Rudyerd Bay Fiorks and Walker Cove are surrounded by high cold lakes and mountains extending, eastward to Canada, First, inhabitants of Mithy Fiords may have settled in the area as long ago as 10 000	
years. The area contains cultural sites and objects of historical significance including traditional native hunting and	
fishing grounds. Later historical evidence includes a mid-1800's military post-port entry on Tongass Island and a	
salmon cannery in Behm Canal established in the late 1800's. Mish (Thords is unique in that the area includes willdife representative of nearly every excystem in Southest Alaskar most notably bald aegies from and black bears	
moose wolves mountain goats and Sitka black-tailed deer. Numerous other bird species nest and feed in the area	
notably falcons and waterfowl. Misty Fioris 6 at major productor of all five species of Pacific salmon and is especially important for king salmon. Numerous other salvater and anadomous fists species and shellfish are	
plentiful in this area which is an extraordinarily fertile interface of marine and freshwater environments. Unusual	
plant I fe includes Pacific silver and subalpine fir trees near the northern limit of their range. The area includes an	
Part of Tongass unusual variety of Wrigin forests ranging from coaxtal spruce-hemical coastal National Forest - Misty Fjords ecosystem Misty Fords becauses a collective array of objects of outstanding well see for continuing scient fits study.

									Redesignated National Points and Preser e in 1980 through 96th Congress. An area of southeastern Alaska adjacent to the International Boundary with Canada contains a variety of landforms including high mountain peaks and steep
									caryons with associated geological ecological biological and historical phenomena of great importance.
									The area includes the greatest assemblage of mountain peaks over 14 500 feet in elevation found in the Nation the
									nation's second highest mountain (Mount St. Elias at 18 008 feet) several inactive and one active volcano (Mount
									Wrangell) and an active glacial complex including some of the largest and longest glaciers in the Nation. The high
									mountain peaks and glaciers offer an exce lent opportunity for glaciological studies. The Malaspina Glacier is isted
									on the National Registry of Natural Landmarks.
									Thermal features in the area include the mud cones and hot springs on the western base of Mount Drum. More
									complete undeveloped river systems exist here than in any other land area in the Nation with more than 1 000 milles of powerfully running silt-laden rivers.
									or power user comming an execution rivers. Biologically unique subspecies of flora and fauna have developed in the Bremner and Chitina River Valleys. As a result
									of their isolation by virtue of ice fields and the Cooper River these areas are virtually ecological islands in which
									development of subspecies is largely unaffected by interchange with outside plant and animal species.
									Wildlife populations include the largest population of w ld mountain sheep in North America moose mountain goat
									and a non-migratory population of caribou. The area is the only part of Alaska where four of the five Identifiable
									forms of bear occur including the interior grizzly the coastal brown bear the black bear and the rare blue-color
									phase of the black bear called glacier bear. Along the coast of the Gulf of Alaska baid eagles and a large and varied shorebird population occur.
									snorebird population occur. Cultural development within the area is of interest to archeologists and historians. Three major culture areas
									Converse here each with distinctive cultural patterns; the North Athaoascans the Pac fic Eskimo and the Chuzach.
									Mining history is evidenced by the Kennecott Copper Works a National Historic Landmark.
									The land withdrawn and reserved by this Proclamation for the protection of the geological archeological biological
									and other phenomena enumerated above supports now as it has in the past a unique subsistence culture of the
									local residents. The continued existence of this culture which depends on subsistence hunting and its availability
									for study enhances the historic and scientific values of the natural objects protected herein because of the ongoing
		Wrangall-St. Elias National Park and							interaction of the subsistence culture with those objects. Accordingly the opportunity for local residents to engage in subsistence hunting is a yalute to be protected and wil continue under the administration of the monument.

		Belmont-Paul Women's Equality National								April 1.2 2016: The Sewall-Belmont House (House) located at 144 Constitution Avenue Northeast. In Wshington D.C.—a few steps from the U.S. Capitol - has been home to the National Woman's Party (NWP) since 1929. From this House the NWP's Founder Alter Paul wrote new language in 1943 for the Equal Rights Amendment which became known as the "A ke Paul Amendment" and led the fight for its passage in the Congress. From here throughout the 20th century Paul and the NWP drafted more than 600 pieces of legislation in support of equal rights and advocated tirelessly for women's political social and economic equality not just in the United States but adsointernationally. While the House's role in women's history makes it a nationally significant resource the building.

									Proclamation 8335 January 6 2009: Over approximately 480 nautical miles the Mariana Archipelago encompasses
									the 14 Islands of the United States Commonwealth of the Northern Mariana Islands and the United States Territory
									of Guam that sit atop the Mariana Ridge in an area known as the Mariana Volcanic Arc. The Mariana Volcanic Arc is part of a subduction system in which the Pacific Plate plunges beneath the Philippine Sea Plate and into the Earth's
									part or a subduction system in which the matter purings beneath the manipules sea matter and into the card is mantle creating the Mariana Trench. Six of the archipelago's islands have been volcanically active in historic times
									and numerous seamounts along the Mariana Ridge are volcanically or hydrothermally active. The Mariana Trench is
									approximately 940 nautical miles long and 38 nautical miles wide within the United States Exclusive Economic Zone and contains the deepest known points in the global ocean.
									To protect and preserve the known volcanic areas of the Mariana Ridge the marine environment around the islands
									of Farallon de Pajaros Maug and Asuncion in the Commonwealth of the Northern Mariana Islands and the Mariana
		Marianas Trench Marine National	Pacific Ocean (Northern						Trench for the care and management of the scientific objects found therein including waters that are among the most biologically diverse in the Western Pacific and include the greatest diversity of seamount and hydrothermal
Partially	FWS & NOAA	Monument	Marianas)		2009	Antiquities Act	60 938 240.00		vent life yet discovered. Estabished as Minidoka intermment wat onal Monument. Nedesignated as NHS in 2008 through 110th Congress.
									Exabilisate a symmous micrimient nat ona monument, necessificate as nes in zoo oriogical color longess. No. 7395 January 17 2001. The Minidoka Interment National Monument is a unique and irreplaceable historical
									resource which protects historic structures and objects that provide opportunities for public education and
									interpretation of an important chapter in American history—the internment of Japanese Americans during World War II.
									On February 19 1942 President Franklin D. Roosevelt signed Executive Order 9066
									authorizing the Secretary of War and military commanders to designate military areas from which "anv or all persons may be excluded" and to "provide for residents of any such
									mon which any or an persons may be excubed and to be product or residents of any such area who are excluded therefrom such transportation food shelter and other
									accommodations as may be necessary." Starting in early 1942 m litary authorities began designating military
									exclusion areas in the States of Cal fornia Washington Oregon and Arizona and the territory of Alaska. Following the signing of Executive Order 9066 American citizens and resident a lens of Japanese ancestry living in the
									designated exclusion areas were ordered to
									evacuate their homes and businesses and report to temporary assembly centers located at
									faigrounds horse racetracks and other make-shift faci lites. To provide more permanent accommodations for the execuses President Roosevelt
									established the War Relocation Authority (WRA) in March 1942. The WRA oversaw the
									construction of ten relocation centers on Federa ly owned lands in remote areas of six western States and Arkansas including the Minidoka Relocation Center in Idaho.
									western States and Ancassas including the Miniotoka Relocation Lenter in Idano. Alaskan Native residents of the Aleutian and Phibliofi Islands and members of other
									ethnic and religious groups were also relocated or interned during the course of the war.
									Established in August 1942 the Minidoka Relocation Center also known as the Hunt Site was located on Federal lands in Jerome County in south central ladhob. During its
									operation from August 1942 to October 1945 the population reached a peak of 9 397
									Japanese Americans from Washington State Oregon and Alaska. The Center included
									over 33 000 acres of land with administrative and residential facilities located on approximately 950 acres. The Center had more than 600 buildings including

									September 15 2016: For generations communities and fami ies have relied on the waters of the northwest Atlantic
									Ocean and have told of their wonders. Throughout New England the maritime trades and especially fishing have
									supported a vibrant way of life with deep cultural roots and a strong connection to the health of the ocean and the bounty it provides. Over the past several decades the Nation has made great strikles in its stewardship of the ocean
									but the ocean faces new threats from varied uses c imate change and related impacts. Through exploration we
									continue to make new discoveries and improve our understanding of ocean ecosystems. In these waters the Atlantic Ocean meets the continental sheft in a region of great abundance and diversity as well as stark geological
									relief. The waters are home to many species of deep-sea corals fish whales and other marine mammals. Three
									submarine carryons and beyond them four undersea mountains lie in the waters approximately 130 miles southeast of Cape Cod. This area (the carryon and seamount area) includes unique ecological resources that have long been the
									subject of scientific interest. The canyons start at the edge of the geological continental shelf and drop from 200
		Northeast Canyons							meters to thousands of meters deep. The seamounts are farther off shore at the start of the New England Seamount chain rising thousands of meters from the ocean floor. These canyons and seamounts are home to at
		and Seamounts	Atlantic						least 54 species of deep-sea corals which ive at depths of at least 3 900 meters below the sea surface. The corals

							Proclamation 4611 December 1 1978: Admiralty Island is outstanding for its superlative combination of scient fic
							and historic objects. Admiralty Island contains unique resources of scientific interest which need protection to
							assure continued opportunities for study. Admirally Island has been continuously inhabited by Tilingit Indians for approximately 10,000 wars. Archeological sites and oblests are other full in the areas of Aneson Chall Bay
							approximately 20 cool gens. Acclerocological sites and opposits are print to in the aleast of Angoort Claim so by Whitewater Bay and other bays and inlets on the island. These resources provide historical documentation of
							continuing value for study. The continued presence of these natives on the island add to the scientific and historical
							value of the area. The cultural history of the Tlingit Indians is rich in ceremony and creative arts and complex in its
							social legal and political systems. Admiralty provides a unique combination of archeological and historical resources in a relatively unspoiled natural ecosystem that enhances their value for scientific Study. Subsequent to exploration
							in a relatively unspoinen natural ecosystem that ennances their value for scientific study. Subsequent to exporation and mapping by Capitain George Vancouver at the end of the 18th century, Russian fur traders Yankee whalers and
							miners and prospectors have left objects and sites on Admiralty which provide valuable historical documentation of
							white settlement and exploitation of the island and its resources. Admiralty Island is rich in historic structures and
							sites including whaling stations canneries old mining structures and old village sites for example. K Ilisnoo V llage where a whaling and herring saltery station were established in 1880. Unusual aspects of the Island ecology include
							where a whaling and nermig satiety station were established in 1880. Unusual aspects or the island ecology include its exceptional distribution of animal species including dense populations of brown bears and eagles because of the
							island's separation from the mainland. This peculiar distribution enhances the island's value for scientific study. The
							unique island ecology includes the highest known density of nesting bald eagles (more than are found in all the other
							States combined); large numbers of Alaska brown bear; and the largest unspoiled coastal siland ecosystem in North America. Admirally bladn was added to the Toneasa National Forest in 1909 and soecific cortions of the Island have
							America. Auminiary isana was adueu o ne forigas Nacional roces in 1509 anni Specimic portions of the Isana inave been designated as Saer and eagle management areas and numerous scientific studies bear and eagle habitat
			Admiralty Island				have been conducted by scientists from around the world. The island is an outdoor living laboratory for the study of
	Part of Tongass		National	1978			the baid eagle and Alaska brown bear. Protection of the entire island exclusive of the Mansfield Peninsula is necessary to preserve intent the unious estimatific and historic objects and sites located there.

	FWS	Monument	Alaska Cal fornia	Modoc County CA	2008	Antiquities Act	6 304.00		To preserve interpret and enhance the public's understanding and appreciation of the national monument and the broader story of World War II in the Pacific.	(Proclamation 8327)
	1			1						,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
									December 5 2008: President Bush signed the Presidential Proclamation Designating the World War II Valor in the	
									Pacific National Monument. The sites in this area include: Five of those sites are in the Pearl Harbor area which is the home of both the USS Arizona and the USS Missouri - milestones of the Pacific campaign that mark the	
									beginning and the end of the war. The USS Arizona Memorial and Visitor Center the USS Utah Memorial the USS	
									Oklahoma Memorial the six Chief Petty Officer Bungalows on Ford Island and mooring quays F6 F7 and F8 which	
									constituted part of Battleship Row. Three sites are located in Alaska's Aleutian Islands. The first is the crash site of a Consolidated B-24D Liberator bomber - an aircraft of a type that played a highly significant role in World War II -	
		1							located on Atka Island. The second is the site of Imperial Japan's occupation of Kiska Island beginning in June 1942	
									which marks the northern limit of Imperial Japan's expansion in the Pacific. The third Aleutian designation is on Attu	
		World War II Valor in the Pacific							Island the site of the only land battle fought in North America during World War II. The last of the nine designations will bring increased understanding of the high price paid by some Americans on the home front. The Tule Lake	
		in the Pacific National							will bring increased understanding of the high price paid by some Americans on the home front. The Tule Lake Segregation Center National Historic Landmark and nearby Camp Tule Lake in California were both used to house	
	NPS & FWS	Monument	Hawaii	Honolulu	2008	Antiquities Act	4 038 400.00	56.66	Japanese-Americans relocated from the west coast of the United States.	6 310 sq. miles
									Redesignated National Park and Preser e in 1980 through 96th Congress. An area of southeastern Alaska adjacent to the International Boundary with Canada contains a variety of landforms including high mountain peaks and steep	
									canyons with associated geological ecological biological and historical phenomena of great importance.	
									The area includes the greatest assemblage of mountain peaks over 14 500 feet in elevation found in the Nation the	
									nation's second highest mountain (Mount St. Elias at 18 008 feet) several inactive and one active volcano (Mount Wrangell) and an active glacial complex including some of the largest and longest glaciers in the Nation. The high	
									mountain peaks and glaciers offer an excellent opportunity for glaciological studies. The Malaspina Glacier is listed	
									on the National Registry of Natural Landmarks.	
									Thermal features in the area include the mud cones and hot springs on the western base of Mount Drum. More complete undeveloped river systems exist here than in any other land area in the Nation with more than 1 000 miles	
									of powerfully running silt-laden rivers.	
									Biologica ly unique subspecies of flora and fauna have developed in the Bremner and Chitina River Valleys. As a result	
									of their isolation by virtue of ice fields and the Copper River these areas are virtually ecological islands in which	
									development of subspecies is largely unaffected by interchange with outside plant and animal species. Wildl fe populations include the largest population of wild mountain sheep in North America moose mountain goat	
									and a non-migratory population of caribou. The area is the only part of Alaska where four of the five Ident fiable	
									forms of bear occur including the interior grizzly the coastal brown bear the black bear and the rare blue-color	
									phase of the black bear called glacier bear. Along the coast of the Gulf of Alaska bald eagles and a large and varied shorebird population occur.	
									Cultural development within the area is of interest to archeologists and historians. Three major culture areas	
									converge here each with distinctive cultural patterns: the North Athapascans the Pacific Eskimo and the Chugach.	
									Mining history is evidenced by the Kennecott Copper Works a National Historic Landmark. The land withdrawn and reserved by this Proclamation for the protection of the geological archeological biological	
									and other phenomena enumerated above supports now as it has in the past, a unique subsistence culture of the	
									local residents. The continued existence of this culture which depends on subsistence hunting and its availabl ity	
		Managell Co. Co.							for study enhances the historic and scientific values of the natural objects protected herein because of the ongoing	
		Wrangall-St. Elias National Park and							interaction of the subsistence culture with those objects. Accordingly the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

		African Burial Ground National								Proclamation 7984 February 27 2006: In Lower Manhattan at the corners of Duane and Elk Streets les an undeveloped parcel of approximately 15 000 square feet that constitutes a remaining portion of New York (Itly's early African Burial Forum). The site is part of an approximately 7-acre National Historic Landmark established on April 31 1993. From the 1690s to the 1790s: the African Burial Ground served as the final resting place of ensitaved and free Africans in New York City, New York. It contains the remains of those internet as we last the archicological resources and artifacts associated with their burials. Prior to the date of this proclamation the site was administered by the General Service Administration (SA) and it will be the location of a memorial to be constructed soon according to design selected on April 29 2005 through a competition conducted by the GSA with the participation of the National Park Service (PsP) and other interested parties. The African Burial Ground National Monument will promote understanding of related resources: encourage continuing research and present interpretive opportunities and programs for violators to better understand and honor the culture and vital contributions of generations of Africans an

been periodic glad advances and retreats in more recent is more recent is more recent of the area has been free from	
glaciation for only a short period of time creating the unsual scientific phenomenon of recent plant succession on	
newly exposed land with the accompanying animal species. The Behm Canal the major inlet at the heart of the area is	
more than fifty miles long and extraordinary among natural canals for its length and depth. The watershed of the Unuk	
River which comprises the northern portion of the Misty Fiords area has its headwaters in Canada. It is steeply	
mountainous and glaciated and contains the ful range of ecosystems and c imates from interior to coastal. Mineral	
springs and lava flows add to the uniqueness of the area and its value for scientific investigation. South of the Unuk	
the Chickamin River System and the Le Duc River originate in active glaciers and terminate in Behm Canal. Further	
south Rudyerd Bay Flords and Walker Cove are surrounded by high cold lakes and mountains extending eastward to	
Canada. First Inhabitants of Mistry Flords may have settled in the area as long ago as 10 000 years. The area contains	
cultural sites and objects of historical sign ficance including traditional native hunting and fishing grounds. Later	
historical evidence includes a mild-1800's millitary post-port entry on Tongass Island and a salmon cannery in Behm	
Canal established in the late 1800's. Mistry Flords is unique in that the area includes wildlife representative of nearly	
every ecosystem in Southeast Alaska most notably bald eagles brown and black bears moose wolves mountain	
goats and Sitta black-tailed deer. Numerous other bird species nest and feed in the area notably faicons and	
waterfowl. Mistry Flords is a major producer of all five species of Pacific salmon and is especia by important for king	
salmon. Numerous other saltwater and anadromous fish species and shellfish are plent ful in this area	
which is an extraordinar ly fertile interface of marine and freshwater environments. Unusual plant I fe includes Pac fic	
silver and subalpine fir trees near the northern limit of their range. The area includes an unusual variety of virgin	
Part of Tongass forests ranging from coastal spruce-hemlock to alpine forests. As an initiact coastal ecosystem Mikey Flords possesses

										The Reconstruction Era began during the Civil War and lasted until the dawn of Jim Crow racial segregation in the
										1890s. It remains one of the most complicated and poorly understood periods in American History. During
										Reconstruction four mill ion African Americans newly freed from bondage sought to integrate themselves into free
										society into the educational economic and political life of the country. This began in late 1861 in Beaufort County S.C. after Union forces won the Battle at Port Royal Sound and brought the Lowcountry' alone the South Carolina
										S.C. after runnin from the settle at even rough sound and prough the concentry along the sound administration construction control. More than 10 000 slaves remained there when their owners field the control and rice
										plantations. The then-Lincoln Administration decided to initiate the Port Royal Experiment' in Beaufort County to help
										the former slaves become self-sufficient. The Reconstruction Era National Monument includes four sites in Beaufort
										County: Darrah Hall and Brick Baptist Church within Penn School National Historic Landmark District on St. Helena Island that includes the site of one of the country's first schools for freed slaves and a church built by slaves for their
										owners in 1855 and then turned over to the former slaves in 862 when their owners left the area; The Camp Saxton
										Site on U.S. Navy property in Port Royal where some of the first African Americans joined the U.S. Army and the site
		econstruction Era ational								where elaborate ceremonies were held on New Year's Day 1863 to announce and celebrate the Issuance of the Emanciastion Proclamation: and The Old Beaufort Firehouse an Instort building located in the midst of historic

Ppro:

THREE RULES ON CHOPPING BLOCK: House lawmakers are preparing to ax three late-term Obama regulations next week, Pro's Alex Guillén reports. They'll seek to nullify two Interior Department regulations, the stream rule and the venting and flaring rule, as well as a rule from the Securities and Exchange Commission requiring energy companies to disclose payments made to foreign governments.

Science group weighs in: The American Geophysical Union sent its own letter to federal agencies Thursday urging them to adhere to their own scientific integrity principles and not limit public access to information. "We look forward to seeing the restrictions lifted soon so that critical, up-to-date scientific information remains readily available to the public," CEO Christine McEntee wrote. Recipients of the-letter included EPA, DOE, Interior, NOAA, NASA, National Science Foundation and the National Park Service, among others. Sigma Xi, The Scientific Research Honor Society, sent its own similar letter Thursday.

TRUMP TEAM WILL REVIEW MOST INTERIOR DOCS: A <u>memo</u> obtained Thursday by ME requires all notices and most correspondence at Interior to be reviewed by Trump's team. "No correspondence should be cleared to go to Congress or any Governor until it has been reviewed by the Acting Chief of Staff and Senior White House Advisor," the document states. Once assembled, Trump's Interior leadership will decide whether to maintain the restrictions.

Standing Rock leader asks Trump to respect EIS Cecelia Smith-Schoenwalder, E&E News reporter Published: Thursday, January 26, 2017 Standing Rock Sioux Chairman Dave Archambault II

Standing Rock Sioux Chairman Dave Archambault II sent a letter to President Trump urging him to comply with the environmental assessment of the Dakota Access oil pipeline project. Photo courtesy of the Standing Rock Sioux Tribe.

Standing Rock Sioux Chairman Dave Archambault II urged President Trump to allow completion of the full environmental impact statement for the Dakota Access pipeline in a letter published today.

The letter comes after Trump this week signed a presidential memorandum to direct the Army Corps of Engineers to reconsider its decision last year to perform an additional environmental review of the \$3.8 billion project.

"This change in course is arbitrary and without justification; the law requires that changes in agency positions be backed by new circumstances or new evidence, not simply by the president's whim," Archambault wrote in the letter.

Advocates for the pipeline say Trump's action corrects the project's course after the Obama administration ordered an in-depth EIS for the project last year (Energywire, Dec. 5, 2016).

The EIS is under a public comment period until Feb. 20, but Trump's memorandum allows for the "rescinding or modifying" of the Obama administration's decision.

Utah conservationists condemn possible agency chief

Published: Thursday, January 26, 2017

Conservation and outdoor recreation interests are opposing Utah state Rep. Mike Noel's (R) bid to lead the Bureau of Land Management.

Black Diamond Equipment founder Peter Metcalf called Noel "the opposite" of the person needed to run the agency and preserve public lands.

Metcalf joined 15 other Utah business people and environmentalists in writing a letter to President Trump, condemning Noel's candidacy.

Noel is a longtime opponent of federal land ownership. He has fought for increased fossil fuel extraction on public land and made a career of fighting the federal government over Western lands. He has indicated a desire to abolish the agency. In Utah, BLM oversees some 31 million acres of land.

"Rep. Noel has also demonstrated his disregard for the thoughtfully and collaboratively crafted management plans of the Bureau he hopes to direct, instead throwing his support behind illegal protests on BLM land and the extraction companies that hope to expand their activities on public lands to the detriment of the protection and other uses of those lands" (Brian Maffly, Salt Lake Tribune, Jan. 25). — NB

Snarky Twitter activists, fearful feds wage war on Trump

E&E // Kevin Bogardus and Robin Bravender, E&E News reporters // January 26, 2017 The Trump resistance is in full swing. Feeling under fire from the new administration, federal workers, greens and former Obama officials are mounting their opposition movement using social media, leaks to the press, protests and other tactics — like illegally scaling construction equipment to hang an anti-Trump banner near the White House. President Trump and his team have been in office less than a week. Trump's campaign rhetoric and early actions perceived as hostile to federal workers and climate change policies — combined with a new era in social media — have sparked an unprecedented backlash from the left during the first days of his presidency. "I expect more of this," said Eric Schaeffer, executive director of the Environmental Integrity Project, who resigned from U.S. EPA in 2002 in protest of the George W. Bush administration's environmental policies. "They came in stomping with very heavy boots ... determined to make the federal workforce the enemy," Schaeffer said of Trump and his team. "You get what you pay for."

Zinke, Perry committee confirmation votes next week E&E // Brittany Patterson // January 26, 2017

The Senate Energy and Natural Resources Committee will meet Tuesday to vote on President Trump's picks to lead the Interior and Energy departments. The vote on Rep. Ryan Zinke (R-Mont.), nominee for Interior secretary, and former Texas Gov. Rick Perry (R), Trump's selection to lead the Department of Energy, was previously scheduled for this week but was abruptly postponed. Chairwoman Lisa Murkowski (R-Alaska), who had expressed a desire to move both nominees to the floor quickly, told E&E News the delay was due to a "miscommunication" with ranking member Maria Cantwell (D-Wash.) (E&E News PM, Jan. 24). "I want to start 2017 on a good footing with my ranking member, and so I chose to delay it for hopefully no longer than a few days," she said. Cantwell said she and other Democrats had outstanding questions for Perry about the administration's plans for DOE and other policy issues. The senator indicated there were no problems with Zinke's nomination. Unlike other Trump Cabinet picks, both Zinke and Perry fared fairly well during their respective confirmation hearings, facing mild opposition from Senate Democrats, and are expected to be confirmed. During the business meeting, the committee will vote on an organizing resolution to authorize expenditures by the committee and to ratify subcommittee assignments for the 115th Congress.

Ppro:

INTERIOR OFFICIAL EMBELLISHED CREDENTIALS: The former deputy director of the Office of Acquisition and Property Management admitted to falsifying his military and federal employment history in order to get a better job, according to a report released Wednesday by Interior's inspector general. James McCaffery, who retired in late November, said he claimed an unearned Purple Heart and lied during his background investigation.

HUGE HURDLE FOR DAKOTA ACCESS FOES: A little-noticed recommendation from an Army Corps of Engineers commander in December to approve the Dakota Access pipeline could prove an extremely potent hurdle for project opponents to overcome, POLITICO's Elana Schor reports. Col. John Henderson wrote in a Dec. 3 memo that his office "intends to execute and

issue" a pivotal permit to finish Dakota Access, but his verdict was overridden the next day in a memo delaying a decision on the project.

Ordinarily permit decisions are made by district commanders, and Trump's Tuesday memo ordering the government to "review and approve" as quickly as possible any necessary permits for the \$3.8 billion pipeline could allow Henderson's positive judgment to replace the earlier hold. Lawyers for the Standing Rock Sioux tribe are due in court on Monday for a hearing on how Trump's Dakota Access memo would affect its legal challenge to the pipeline

PERRY, ZINKE COMMITTEE VOTES RESCHEDULED: The Senate Energy and Natural Resources Committee will vote on the nominations of former Texas Gov. Rick Perry for Energy secretary and Rep. Ryan Zinke for Interior secretary Tuesday at 9:30 a.m., your ME host reports. Those votes were originally scheduled for this week, but were postponed due to what Chairwoman Lisa Murkowski called a "misunderstanding."

Utah lawmakers unveil plan for state park near Bears Ears

E&E // January 25, 2017

State lawmakers in Utah have proposed two new state parks on federal lands in order to allow Mormon heritage organizations to visit the area. The areas are Little Sahara in Juab County and Hole-in-the-Rock, a chasm in a cliff face that Mormon pioneers traversed. The trail led from Escalante to Bluff, Utah, across what are now Grand Staircase-Escalante and Bears Ears national monuments. Federal guidelines currently limit expeditions to 12 people to the sites, and the areas do not hold campgrounds. "There's an opportunity to create a multi-use area in that historically significant area for our state," said state Rep. Keven Stratton (R), a sponsor of the parks bill. "It would be revenue neutral for our state. This would all be consent by the Legislature."

Pop-up Twitter accounts bolster image of 'rogue' rangers

E&E // Emily Yehle // January 25, 2017

When Badlands National Park deleted four tweets on climate facts yesterday, a dormant Twitter account came back to life: @AltNatParkSer. It began with an innocuous retweet of two goats — a post originally shared by Badlands — and then snowballed into more than 100 tweets over nine hours. Its third tweet summed up the purpose. "Mr Trump, you may have taken us down officially. But with scientific evidence & the Internet our message will get out," it read. Another tweet declared that Trump "can take our official twitter, but you'll never take our free time!" The account claims to be the brainchild of "active" rangers at the National Park Service, along with friends.

"We are real," one tweet read. "Come visit us at Mt Rainer National Park. (We are in Washington)" As of early this afternoon, the account had more than 423,000 followers, up from 8,000 before the Badlands tweets. And it wasn't alone: Another alternative site, @BadlandsNPS, cropped up, tweeting out its own witty rebuttals to the Trump administration. It has gained 184,000 followers since its creation yesterday.

Chaffetz proposes sell-offs, elimination of police posts

E&E // Jennifer Yachnin // January 25, 2017

Utah Rep. Jason Chaffetz (R) last night introduced a pair of bills aiming to reduce the federal presence in his state and across the West by disposing of 3.3 million acres of federal public land while also eliminating hundreds of law enforcement positions at the Bureau of Land Management and Forest Service. Chaffetz, who serves as chairman of the House Oversight and Government Reform Committee, has previously floated the proposals, both via legislation and in the House Republican budget. Under his reintroduced H.R. 621, the Utah lawmaker is pushing for the sale of lands identified as suitable for sale or exchange in a 1997 Interior Department report. The Clinton administration-era report identified the 3.3 million acres across 10 states in an effort to benefit an Everglades restoration effort in Florida.

Sportsmen plead with House members to preserve federal estate E&E // Jennifer Yachnin // January 25, 2017

A coalition of 20 sportsmen's groups issued a plea to House lawmakers yesterday to discourage would-be efforts to offload federal public lands, pointing to the chamber's adoption of rules earlier this month that designate federal land transfers as cost-free. The missive sent to members of Congress yesterday urges lawmakers to "focus on constructive and inclusive solutions" when considering whether to acquire or dispose of public lands in the 115th Congress.

"American sportsmen and women, regardless of political affiliation, have been clear about how important public lands are to our ability to hunt, fish and recreate. Our country's public-lands legacy is fundamental to our national identity and state and local economies across the country," National Wildlife Federation Western sportsmen's campaign manager Aaron Kindle said in a statement released with a copy of the letter. He added, "Any efforts to dismantle that legacy, including the new House rule making it easier to sell or transfer public lands, will be relentlessly and adamantly opposed by hunters and anglers nationwide."

Badlands tweets on climate change deleted E&E // Brittany Patterson // January 25, 2017

It was fun while it lasted. For a few hours yesterday, Badlands National Park became a Twitter sensation for seeming to "go rogue" when it posted a series of climate-change-related tweets. Just after 5 p.m. EST, @BadlandsNPS deleted its tweets, including one noting the amount of carbon dioxide in the atmosphere was "higher than any other time in the last 650,000 years. #climate." A National Park Service official told E&E News the tweets "were posted by a former employee who was not currently authorized to use the park's account." "The park was not told to remove the tweets but chose to do so when they realized that their account had been compromised," the official said. The Badlands tweets came as Trump administration officials issued instructions to several agencies, including U.S. EPA, the Agriculture Department and the Interior Department, restricting social media and other communication with the public. That apparently didn't stop the South Dakota national park from sending four science-based tweets over a few hours. One tweet noted the 30 percent increase in ocean acidity since the Industrial Revolution, and another message touted the 20 pounds of carbon dioxide released into the atmosphere when 1 gallon of gasoline is burned.

Ppro:

Zinke, Perry to get committee votes Jan. 31 By Anthony Adragna 01/25/2017 04:32 PM EDT

The Senate Energy and Natural Resources Committee will vote on the nominations of former Texas Gov. Rick Perry to head the Energy Department and Rep. Ryan Zinke to lead the Interior Department on Jan. 31 at 9:30 a.m., according to a notice.

Those votes had originally been slated for this week, but panel Democrats wanted more information on how Perry will handle efficiency standards as secretary. ENR Chairwoman <u>Lisa Murkowski</u> told reporters there had been a "miscommunication" between her and ranking member <u>Maria Cantwell</u>.

Both Perry and Zinke are ultimately favored to be confirmed.

THESE BADLANDS START TWEETING US GOOD: At least one national park bucked the Trump administration's communications clampdown Tuesday, at least for a little while. The Badlands National Park Twitter account posted facts and data regarding climate change, only to see the tweets later deleted. "Today, the amount of carbon dioxide in the atmosphere is higher than at any time in the last 650,000 years. #climate," the park tweeted as part of a series of messages on the subject. An NPS official later said the tweets came from a former employee not authorized to use the account and the park removed them upon learning its account had been compromised.

WIND FARM APPROVED OFF LONG ISLAND: The Long Island Power Authority approved the nation's largest offshore wind farm today, The New York Times <u>reports</u>. The farm is set for the waters between the eastern tip of Long Island and Martha's Vineyard, and would be equipped with as many as 15 turbines capable of powering 50,000 average homes.

GRIJALVA PLOTS PUBLIC LANDS DEFENSE: Far away from the GOP retreat in Philadelphia, top House Natural Resources Democrat Raul Grijalva today kicks off a three-day trip to New Mexico where he'll tour newly designated national monuments and discuss how he'll fight efforts to weaken the Antiquities Act. "This trip is about uniting to preserve America's greatest natural places so the people can continue to enjoy them, and it's hardly the last one on my agenda," he said in a statement.

Spicer: Social media crackdown isn't directed by White House By Andrew Restuccia 01/25/2017 01:55 PM EDT

White House Press Secretary Sean Spicer said today that the White House is not directing federal agencies to rein in their public communications.

"There's nothing that has come from the White House," Spicer said. "Absolutely not."

A series of internal directives at federal agencies — including EPA and the Interior Department, which houses the National Park Service — to limit social media and other public-facing communications have caused a firestorm in recent days, with watchdog groups raising red flags.

But Spicer insisted those directives were agency-specific policies, not a broader directive from the White House.

Spicer also blamed rogue employees for tweets from National Park Service Twitter accounts, including images comparing crowds at former President Barack Obama's 2009 inauguration with Trump's inauguration and posts about climate change.

He said a "an unauthorized user had an old password in the San Francisco office, went in and started retweeting inappropriate things that were in violation of their policy."

Spicer said both EPA and the National Park Service are working to resolve the issue.

"A couple of these agencies have had trouble adhering to their own policies, and I'd refer you back to them as to why those things are happening," he said. "But I know they are taking steps in both of those two cases to address inappropriate use of social media."

And Spicer also pointed to Obama administration violations of social media policy, such as the 2015 Government Accountability Office report that EPA had violated federal law with a social media campaign to win public support for a controversial water regulation.

OMB issues guidance on hiring freeze By Mel Leonor 01/25/2017 01:43 PM EDT

The Office of Management and Budget issued guidance today directed at agency heads on how to implement the president's across-the-board hiring freeze of federal workers.

Workers who were offered a job on or before Jan. 22 and have documentation showing a start date of Feb. 22 or earlier should report to work, according to the memo sent by OMB acting director Mark Sandy.

Workers whose start date falls later than Feb. 22, or who do not have a start date, may have their job offers revoked. The memo leaves agency heads to determine whether to revoke job offers. They are instructed to consider "merit system principles, essential mission priorities, and current agency resources and funding levels."

The memo says departments and agencies are allowed to reallocate workers to "ensure essential services are not interrupted and to ensure national security is not affected." They may also make limited exceptions to the hiring freeze "that they deem necessary to ensure national security or public safety."

More guidance on the hiring freeze is forthcoming, according to the memo.

Cummings to federal employees: Call me By Andrew Restuccia 01/25/2017 10:51 AM EDT Rep. Elijah Cummings, the top Democrat on the Oversight and Government Reform Committee, is encouraging federal employees to reach out to Congress if they are alarmed by the Trump administration's policies.

"I want to make sure all of those federal employees who have anything they want to say to Congress, because there is some confusion as to whether they can talk to us, I'm telling you the law protects you and I will do every single thing in my power to make sure you're protected," the Maryland Democrat said on MSNBC's "Morning Joe" today. "Call me. I want to talk to you."

Reports that employees at several agencies, including the EPA, were asked to limit their public communications have riled members of Congress, especially Democrats, who hope to play an oversight role during the Trump administration.

Amid a public outcry, several federal agencies, including the Agriculture Department, have backtracked on their restrictions this week.

Climate change gobbling up coastal marshes — USGS

E&E // Ariel Wittenberg //January 24, 2017

Salt marshes along the Atlantic and Pacific coasts are being lost to climate change, according to a study released today by the U.S. Geological Survey. Scientists developing a new rapid assessment technique for marshes chose eight areas on both coasts to test their method and found all of those wetlands losing ground. Half these marshes will be gone in 350 years, the study says. Salt marshes buffer coasts against storms and erosion, filter pollution, and provide habitat for fish and wildlife. The USGS team developed a new method to measure marshes so land managers could easily assess the wetlands' ability to weather assaults by rising seas and severe storms. The method employs aerial photography and other remote sensing techniques

to determine how much of a marsh is open water and how much is covered by vegetation. That information allows resource managers to compare the ratio of ponds, channels and tidal flats to marsh grass to gauge the wetland's resiliency. Salt marshes with more sediment can withstand certain levels of erosion and still bounce back. Those that already are losing sediment would be less resilient.

Utah lawmakers push Trump to rescind Bears Ears

E&E // Jennifer Yachnin // January 24, 2017

Utah state House Speaker Greg Hughes (R) used part of his Legislature's opening day to rail against the newly established Bears Ears National Monument, urging President Trump to rescind the designation for the 1.35-million-acre-site. The state lawmaker lashed out against the Obama administration's decision to establish the monument in southeastern Utah late last year, characterizing it as "tragic" and an "overstep." Hughes' remarks echoed criticisms fired in recent weeks by Gov. Gary Herbert (R) and House Natural Resources Chairman Rob Bishop (R-Utah), who have likewise called for rolling back the Bears Ears designation. "When President Obama sent out the tweet that announced to the world that he was creating this national monument, the photo he used was of Arches National Park," Hughes said, referring to the White House's release of a photo of a site about 100 miles northeast of the new monument. "If that doesn't let you know that there's a disconnect going on, I don't know what will. It would be funny if it wasn't so sad," he added.

Social media horse-collared as Trump team grabs reins

E&E // Robin Bravender and Kevin Bogardus // January 24, 2017

Twitter posts and other social media activity have been scaled back at U.S. EPA, the departments of the Interior and Energy, and other agencies as the new Trump administration gets traction....Interior has been tweeting, too, posting regular photos of national parks. On Inauguration Day, the agency retweeted a White House post saying, "It's official. Our 45th president has taken the oath of office & we couldn't be more excited! Congratulations to @POTUS Trump #Inauguration." The department suspended all its Twitter activity for about 12 hours over the weekend in response to National Park Service tweets about the inauguration turnout and the White House website that some viewed as critical of the new administration. Interior reactivated its accounts and issued a new rule: no posts on the "policy priorities" of the incoming Interior secretary until Rep. Ryan Zinke (R-Mont.) is confirmed by the Senate for the position (Greenwire, Jan. 23).

Trump orders advance of Keystone XL, Dakota Access

E&E // Hannah Northey // January 24, 2017

President Trump signed executive orders today aimed at restarting the Keystone XL and Dakota Access oil pipelines, keeping a campaign promise and throwing down the gauntlet to environmentalists opposed to the projects. Trump's order invites TransCanada Corp. to resubmit an application for its Keystone XL project and directs the State Department to fast-track its review of the pipeline that would link Canada's oil sands region with U.S. refineries. "This is with regard to the construction of the Keystone pipeline, something that's been in dispute, and it's subject to a renegotiation of terms by us," Trump said as he signed the order.

"We're going to renegotiate some of the terms, and if we like, we'll see if we can get that pipeline built. A lot of jobs, 28,000 jobs, great construction jobs."

Majority of Americans want U.S. focus to be on alternative energy E&E // Maxine Joselow // January 24, 2017

Approximately 65 percent of Americans prioritize the development of alternative energy sources compared with 27 percent who would put greater emphasis on expanding U.S. fossil fuel production, according to a new study by the Pew Research Center. This marks a slight uptick in preference for alternative energy since December 2014. At that time, the Pew Research Center found that 60 percent of Americans stressed developing alternative energy over developing fossil fuel sources. The study demonstrates increased popular support for alternative energy at a time when President Trump is pledging to boost production from fossil fuel energy sources like coal. Trump's incoming administration was quick to post an energy policy summary on the White House website that calls for "reviving America's coal industry, which has been hurting for too long" (Greenwire, Jan. 20). "There's a perception that we're about to make major changes in energy policy," said Cary Funk, associate director of research on science and society at the Pew Research Center. "So I think these data are particularly important in terms of giving a portrait of where the public sits." The study also shows that energy priorities remain divided along party lines. Democrats are still far more likely than Republicans to believe that developing alternative energy sources like wind and solar should take precedence over expanding production of coal, oil and natural gas.

Committee delays vote on Zinke, Perry

E&E // Manuel Quiñones, Geof Koss and Sam Mintz, E&E News reporters // Tuesday, January 24, 2017

The Senate last night approved the nomination of Kansas Republican Rep. Mike Pompeo for CIA director, but the calendar remains fluid for other Trump administration picks. Senators approved Pompeo 66-32 after days of partisan bickering over the timing of the vote. Republicans wanted Pompeo to join Defense Secretary James Mattis and Homeland Security Secretary John Kelly in Trump's Cabinet on Inauguration Day, but Democrats delayed the vote until yesterday. Sen. Kamala Harris (D-Calif.) challenged Pompeo on his views about climate change at his confirmation hearing. He questioned the issues's significance to the agency's work (E&E Daily, Jan. 13). Yesterday the Senate Energy and Natural Resources Committee had scheduled votes on Rep. Ryan Zinke (R-Mont.), nominee for Interior secretary, and former Texas Gov. Rick Perry (R), Trump's pick to lead the Department of Energy. But late last night the panel announced that it was postponing the meeting until further notice. Senate Majority Whip John Cornyn (R-Texas) said yesterday afternoon that he hoped the Senate could confirm Zinke and Perry before Republicans head to Philadelphia later this week for a retreat with their House colleagues and President Trump.

Ppro:

ZINKE, PERRY VOTES PUSHED: Late Monday, the Senate Energy and Natural Resources Committee delayed until further notice votes on the nominations of Texas Gov. Rick Perry to lead DOE and Rep. Ryan Zinke as Interior secretary, Pro's Nick Juliano reports. No explanation

was given, but the Congressional Republicans' annual retreat later this week means the votes won't come until next week at the earliest. Both nominees had been slated to get votes this morning.

NWF backs Zinke: The National Wildlife Federation sent a letter Monday urging Senate energy panel members to back Zinke's nomination to run the Interior Department. "Representative Zinke understands the intrinsic wildlife and conservation values of the Nation's public lands that are held in trust for generations of all Americans," Collin O'Mara, the group's president, wrote, adding NWF would work with Zinke on "how best to balance energy development decisions with key conservation priorities."

President Donald Trump is slated to sign executive actions today that would advance the Keystone XL and Dakota Access oil pipelines, according to a person familiar with the issue.

The decision would make good on Trump's campaign promise to approve Keystone, the controversial Alberta-to-Texas pipeline project that has faced vocal resistance from environmental groups. Former President Barack Obama rejected Keystone in 2015 after a years-long analysis of the project.

The planned 1,100-mile Dakota Access pipeline, which would run from North Dakota to Illinois, has also become a focal point of progressive opposition to fossil fuel projects.

NPS account ordered dark after tweets offend Trump admin E&E // Emily Yehle // January 23, 2017

The National Park Service sports the usual disclaimer on its Twitter account, signaling that retweets are not endorsements. But it took only two retweets for the agency to cross President Trump. The Interior Department suspended all its Twitter activity for about 12 hours Friday and Saturday — an unprecedented move — in response to NPS sharing tweets about the inauguration turnout and the White House website. The question now among employees: What's next? "I think they're scared. I think they're really threatened," a former Interior official said of the department's employees. "I think they've seen a very combative administration come into effect that has no tolerance for dissent." It's still unclear who is responsible for the retweets. Several employees have access to the NPS Twitter account, and until now, Interior's approach to social media has been flexible. Each agency sets its own guidelines and is largely left alone, according to several former Interior employees.

Zinke's top donor lobbies for his Interior confirmation

E&E // Kevin Bogardus // Monday, January 23, 2017

Rep. Ryan Zinke (R-Mont.) has gotten a boost from his biggest campaign donor as he looks to secure confirmation as the next secretary of the Interior. Fidelity National Financial Inc. — a

Jacksonville, Fla., title insurance company that offers services across the country — disclosed that it lobbied in support of President Trump's nominee for Interior toward the end of last year. "Supporting the nomination of Rep. Ryan Zinke of Montana as the next Secretary of the Department of the Interior," said the fourth-quarter Lobbying Disclosure Act report filed by the company, which covers Oct. 1 to Dec. 31 of last year. Contributions from Fidelity's executives and employees make the Fortune 500 company Zinke's largest campaign donor, according to the Center for Responsive Politics, a campaign finance watchdog group. Overall, the two-term House member collected more than \$154,000 in contributions from those affiliated with the insurance company. John Benton, who handles governmental relations for Fidelity, told E&E News that the reason for the corporation's lobbying in support of Zinke was simple. Fidelity's nonexecutive chairman, William Foley II, is a good friend of the congressman.

Trump admin moves political team into place E&E // Scott Streater // January 23, 2017

The Trump administration is moving a "political team" composed of dozens of appointees into key Interior Department offices to help guide the transition of power, including two top officials working with Rep. Ryan Zinke (R-Mont.), President Trump's Interior secretary nominee. The list includes longtime Republican operatives and several former Interior Department officials under the George W. Bush administration, including James Cason, who will serve as assistant Interior deputy secretary. Cason was Interior associate deputy secretary in the Bush administration, and also served stints at Interior under Republican Presidents Reagan and George H.W. Bush. It also includes Doug Domenech, the leader of Trump's Interior transition team and an Interior official during the Bush administration, who is moving in as assistant secretary of insular affairs.

Ppro:

FOLLOWING NPS TWEETS, AGENCIES USE CAUTION: Following the Interior Department's order to temporary halt to all of its Twitter activity in response to two retweets from the National Park Service that appeared to contain digs at Trump, the Department of Transportation has become the second federal agency to declare a social media moratorium. DOT's move was not a response to any controversial postings, but came after a career employee recommended that employees hold off on using the department's social media accounts until more guidance comes down from the new administration, Lauren Gardner reports.

INTERIOR'S TWITTER PRIVILEGES RESTORED: Trump's administration ordered the Interior Department off its social media accounts on Friday after the National Park Service tweeted several times showing the smaller crowds at Trump's inauguration compared to those of former President Barack Obama's. But everything had returned to normal by Saturday. "We regret the mistaken RTs from our account yesterday and look forward to continuing to share the beauty and history of our parks with you," the National Park Service said in a tweet.

EARLY ARRIVALS AT INTERIOR: A list circulating has a number of names expected to be on Interior's beachhead team arriving today. They include: long-time Interior employee James E. Carson as acting deputy secretary; Doug Domenech, a former deputy chief of staff at DOI;

Kathy Benedetto, a former Natural Resources Committee professional staffer for a role at BLM; Daniel Jorjani, former general counsel to Freedom Partners; Rusty Roddy for the Fish and Wildlife Service; Virginia Republican operative Tucker Davis for a role within the Office of Surface Mining Reclamation and Enforcement; DCI Group's Megan Bloomgren; Micah Chambers, deputy chief of staff to Zinke; Heather Swift, a Zinke spokeswoman; Kate Macgregor, another Natural Resources panel staffer, for a job with the assistant secretary for land and minerals management; Casey Hammond, who works for the committee's Subcommittee on Oversight and Investigations; and Melissa Simpson, formerly with the Safari Club.

Obama vets show up: Former President Barack Obama's Cabinet veterans were out in force. Rep. Paul Tonko posted a picture of himself laughing it up with former EPA administrator Gina McCarthy and the agency's former air chief Janet McCabe. (McCarthy's holding a sign saying "Climate Change is Real" and "Love is Love.") Former Interior Secretary Sally Jewell posted a picture from the march, saying "Enjoying role as citizen. This is what democracy looks like — all voices important!" And don't forget former Secretary of State John Kerry, who made his first appearance as a private citizen in decades with his dog.

By Esther Whieldon 01/23/2017 03:09 PM EDT

The Senate Energy and Natural Resources Committee will vote Tuesday on President Donald Trump's nominees for Interior and Energy secretaries.

At 9:30 a.m. Tuesday, the committee will vote on the nomination of Former Texas Gov. Rick Perry to lead DOE and Montana Republican Rep. Ryan Zinke to lead Interior. The committee will also ratify subcommittee assignments.

The committee last week held confirmation hearings for both men who are expected to face a relatively easy confirmation.

By Matthew Nussbaum 01/23/2017 12:04 PM EDT

President Donald Trump moved today to make good on a campaign promise to shrink the size of the federal government, issuing an executive order to freeze federal hiring. The military was exempted from the order's constraints.

The move is one of Trump's first official acts in office and follows a campaign in which he pledged to take aim at the way Washington does business.

Acting bosses to take reins at EPA, DOE, Interior

Robin Bravender and Kevin Bogardus, E&E News reporters

Published: Thursday, January 19, 2017

Career staffers are in line to take the helm of energy and environmental agencies while Donald Trump's incoming Cabinet officials await confirmations....

Leadership for Interior, DOE

At the Interior Department, Jack Haugrud will take over as acting secretary, according to outgoing agency spokesman Blake Androff.

Haugrud is currently acting principal deputy solicitor at Interior. He previously had a long career at DOJ, where he served as chief of the natural resources section and the general litigation section of the Environment and Natural Resources Division.

Haugrud has worked on topics at Interior including American Indian issues as well as regulations for surface mining, oil and gas royalties, offshore drilling, and Arctic exploration. One former Interior aide called him "the point of the spear on natural resource law" in a 2014 interview (Greenwire, Jan. 14, 2014).

Trump's nominee to lead Interior, Ryan Zinke, also testified before the Senate this week and is expected to be confirmed and on the job relatively quickly. Senate Energy and Natural Resources Committee ranking member Maria Cantwell (D-Wash.) agreed to expedited consideration of his nomination (E&E Daily, Jan. 18).

Jewell adviser headed to Senate Indian Affairs

Corbin Hiar, E&E News reporter

Published: Thursday, January 19, 2017

A top aide to outgoing Interior Secretary Sally Jewell is heading back to Capitol Hill to defend many of the Indian Country policies she helped to implement.

Jennifer Romero, Jewell's senior adviser for Native Hawaiian affairs, will take over on Jan. 25 as Democratic staff director for the Senate Indian Affairs Committee, spokeswoman Jennifer Talhelm confirmed today. Romero will report to Democratic Sen. Tom Udall, the vice chairman of Indian Affairs, who represents her home state of New Mexico.

"Senator Udall is very pleased to bring her on, and he believes her extensive experience with Native American law and policy will be a great asset to him and the committee as he works with Indian Country to ensure the United States meets its treaty obligations and works to create jobs and boost the economy on Tribal lands," Talhelm said in an email.

Jewell orders contingency talks to continue

Ariel Wittenberg, E&E News reporter

Published: Thursday, January 19, 2017

Interior Secretary Sally Jewell has ordered the department to continue negotiations over a deal to share Colorado River water in the Southwest.

Lower Basin states that depend on the Colorado River Basin for drinking water and irrigation have long been working on a deal to take voluntary conservation measures in order to avoid a dramatic fall in water levels at Lake Mead. They had hoped to come to an agreement before the Colorado River Water Users Association's annual meeting in December but have yet to strike a deal (Greenwire, Nov. 30, 2016).

The Colorado River Basin has been struggling with a 17-year historic drought, which has compounded an ongoing shortage of water compared to demands.

Water stored in reservoirs in the Colorado River Basin have protected the area from a crisis during the current drought, but the reservoirs have reached near-historic lows. Basinwide reservoir storage ended water year 2016 at just 51 percent of total capacity, according to the Department of the Interior.

The Lower Basin states narrowly avoided a shortage declaration for the year, with projections for Lake Mead's elevation at 1,079 feet, barely above the 1,075-foot threshold for a shortage declaration that would have cut water deliveries to Arizona, Nevada and California for the first time.

Interior approves first phase of massive Wyo. wind project

Scott Streater, E&E News reporter

Published: Wednesday, January 18, 2017

The outgoing Obama administration moved one last time today to promote large-scale renewable energy development, finalizing documents that clear the way for a southeast Wyoming project expected to become the largest wind farm in North America.

The Bureau of Land Management issued a decision record, and a finding of no new significant impacts, approving the siting of the first 500 turbines for the Chokecherry and Sierra Madre Wind Energy Project.

Concurrently, the Fish and Wildlife Service issued a record of decision (ROD) today approving the issuance of two permits that would allow for the incidental "take" of bald and golden eagles — one covering construction of the first 500 turbines and the second covering the first five years of the wind project's operation.

The project developer, Power Company of Wyoming LLC, must still provide FWS with final mitigation plans before the permits are issued, the service and BLM said in a joint press release.

Ppro:

MAIL CALL! ATTORNEYS GENERAL EYE CRA FOR STREAM RULE: Fourteen attorneys general asked Speaker Paul Ryan and Leader Mitch McConnell in a letter released Wednesday to use the Congressional Review Act to nullify the Obama administration's "unlawful" stream protection rule — which is already at the top of many Republican leaders' wish lists. "The regulation ignores Congress's instruction in the Surface Mining Control and Reclamation Act that the States should be the primary regulators of coal mining, and it seeks to impose an unwarranted, top-down, one-size-fits all approach," they wrote.

AGENCIES TAP INTERIM LEADERS: Catherine McCabe, a deputy regional administrator for EPA's Region 2, <u>becomes</u> acting administrator on Friday until Trump's pick to helm the agency is confirmed. Over at DOE, National Energy Technology Lab Director Grace Bochenek <u>will act</u> as Energy secretary until a new leader is sworn in. And the Interior Department <u>will have</u> Jack Haugrud, Interior's acting principal deputy solicitor and deputy solicitor for energy and minerals resources, as the agency's acting secretary.

KEEPING WATER TALKS FLOWING: Interior Secretary Sally Jewell issued an order Wednesday attempting to maintain efforts to strike major new water deals for the Colorado River, Pro's Annie Snider reports. There are

ongoing efforts to finalize a deal between lower basin states to take voluntary cuts and avoid a dramatic water level drop at Lake Mead, as well as hopes to wrap up negotiations with Mexico on a cross-border water-sharing deal.

01/19/2017 01:00 PM EDT

Rep. Evan Jenkins has introduced a Congressional Review Act resolution, H.J. Res. 11, to permanently block the Interior Department's recently released stream rule.

"President Obama may only have one day left in office, but his anti-coal legacy will last for years to come," Jenkins said in a statement. "That's why I am leading the fight in Congress to stop implementation of this rule and protect West Virginia's jobs."

Though Senate debate rules mean Congress is likely to consider only a limited number of CRA resolutions, a resolution targeting the stream rule is considered a top contender for passage. A successful CRA resolution would also prevent Interior from ever issuing a rule that is "substantially the same," although that provision has never before been tested in court.

By Esther Whieldon 01/18/2017 05:33 PM EDT

Jack Haugrud, Interior's acting principal deputy solicitor and deputy solicitor for energy and minerals resources, will serve as the agency's acting secretary from when President-elect Donald Trump is sworn in this Friday until Trump's pick for the spot is confirmed, an agency spokeswoman said today.

Also, Kristin Bail, Bureau of Land Management's assistant director for the resources and planning directorate, will serve as BLM's acting director when Director Neil Kornze steps down on Jan. 20. Trump has not announced who he will nominate to fill that position.

It is unclear when the Senate will vote on Trump's pick to head Interior, Montana Republican Rep. Ryan Zinke, but it is not unusual for a senior career official to serve as acting administrator for a few days between administrations, and typically they do little aside from keeping the agency running.

Haugrud has been at the Interior since 2010 and currently oversees a staff of career lawyers who give advice on energy and minerals programs to the Bureau of Land Management, the Bureau of Ocean Energy Management, and the Bureau of Safety and Environmental Enforcement. He also provides legal advice to other departmental agencies including the Office of Natural Resources Revenue and the Office of Surface Mining, Reclamation and Enforcement.

As acting principal deputy, Haugrud has dealt with cases involving Native American issues, offshore wind development, oil and gas leasing, water rights and title disputes. He previously served more than 23 years in the Department of Justice's Environment and Natural Resources Division.

ARMY CORPS TO REVIEW DAPL ROUTES: The Army Corps of Engineers will begin an environmental review of alternative routes for the Dakota Access Pipeline, it said in a notice issued today. The review comes just hours ahead of a judicial hearing over a request to block such a notice. Developers of the pipeline filed to block the environmental review on Monday, and Judge James Boasberg of the U.S. District Court for D.C. set a hearing time for 3 p.m. today.

By Annie Snider 01/18/2017 04:13 PM EDT

The Obama administration is attempting to keep efforts to strike major new water deals for the Colorado River on track when it hands the reins to President-elect Donald Trump's team Friday, as the region teeters on the brink of shortage amid its 17th year of drought.

A Secretarial Order issued by Interior Secretary Sally Jewell today offers a roadmap for proceeding with ongoing efforts to finalize a deal between lower basin states to take voluntary cuts in a bid to avoid a dramatic water level drop at Lake Mead, and for tying up negotiations with Mexico on a cross-border water-sharing deal.

In coordination with the order, the Bureau of Reclamation is also lining up several investments aimed at helping states agree to the Drought Contingency Plan. The agency today executed an agreement with the Gila River Indian Community to acquire water to bolster levels at Lake Mead — a move to help Arizona share the pain of reductions internally. The order also tees up such investments related to California's Salton Sea, where water use reductions could lead to

worsening air quality problems — a conundrum that has proven a major hurdle to finalizing the drought deal.

Although today's Secretarial Order could easily be overturned by the new administration, Colorado River issues are generally nonpartisan. Arizona Sen. Jeff Flake won a commitment on Tuesday from Trump's pick to lead the Interior Department, Rep. Ryan Zinke (R-Mont.) to continue work on Colorado River issues, including the Drought Contingency Plan.

By Esther Whieldon 01/18/2017 04:00 PM EDT

The Interior Department today gave the Power Company of Wyoming a provisional green light to install 500 wind turbines in Wyoming — the first half of a project slated to become the largest onshore wind facility in North America.

Interior's Bureau of Land Management issued a right-of-way for phase one of the \$5 billion Chokecherry and Sierra Madre Wind Energy Project in Carbon County which is ultimately expected to include 1,000 turbines with a total capacity of 3,000 megawatts. BLM still needs to issue a "notice to proceed" formally authorizing construction.

In September, BLM authorized the developer to begin building roads to the project area.

Half of the project is on federal lands and the rest is on privately owned or state-controlled property. The Wyoming Industrial Siting Council approved the project in 2014.

Also today, the U.S. Fish and Wildlife Service indicated it plans to issue a five-year so-called eagle-take permit for the project once the developer provides its final plan to reduce the chances that the project will harm or injure local eagle populations, which is expected to include retrofitting existing transmission line poles.

FWS found the project is likely to injure or kill up to two bald eagles and 10 to 14 golden eagles per year. This project did not qualify for a 30-year eagle take permit because it applied for it before the FWS in December issued a rule expanding the term limit.

The decision comes even as some Wyoming lawmakers have proposed to prevent utilities from using wind power to meet customers' demand in hopes of increasing coal-fired generation usage.

Interior plans 122K-acre lease sale Emily Yehle, E&E News reporter Published: Wednesday, January 18, 2017

The Interior Department will lease more than 122,000 acres off North Carolina to commercial wind farms as part of its effort to boost renewable energy development.

The wind lease sale is set for March 16. It comes after Statoil ASA bid \$42 million for an area off New York, far more than any previous offshore wind sale (E&E News PM, Dec. 16, 2016).

Interior Secretary Sally Jewell said the planned North Carolina lease sale demonstrates how the administration has "built a foundation to harness the enormous potential of offshore wind energy."

"The lease sale underscores the growing market demand for renewable energy and strong industry interest in meeting that demand," she said in a statement.

The lease area is located 24 nautical miles off the shore of Kitty Hawk.

Bipartisan senators float bill to end gray wolf protections

Jennifer Yachnin, E&E News reporter

Published: Wednesday, January 18, 2017

Wisconsin Sen. Ron Johnson yesterday reintroduced legislation aimed at removing Endangered Species Act protections from gray wolves across the Great Lakes region and in Wyoming.

The Republican senator is looking to roll back rulings by federal district judges who restored ESA protections for wolves in Michigan, Minnesota, Wisconsin and Wyoming over the objections of Fish and Wildlife Service scientists.

"After over 30 years of needed protection and professional pack population management, the wolf has made its comeback," Johnson said in a statement announcing the reintroduction of the bill, S. 164.

He added: "Unfortunately, a federal judge overruled wildlife experts in the field. This bill's language does not modify the Endangered Species Act nor does it prevent Fish and Wildlife Service experts from ever returning the wolf to the endangered list if they determine the population is in need of federal protection. But I strongly agree with the feedback I've heard from Wisconsin stakeholders such as farmers, ranchers, loggers and sportsmen that future gray wolf listing decisions should come from wildlife experts, not from courtrooms."

Zinke says climate change is 'indisputable'

Brittany Patterson, E&E News reporter

Published: Wednesday, January 18, 2017

Rep. Ryan Zinke broke with President-elect Donald Trump yesterday by telling the Senate Energy and Natural Resources Committee that he does not think climate change is a hoax.

When pressed repeatedly by Sen. Bernie Sanders (I-Vt.), the 55-year-old Montana Republican, picked by Trump to lead the Interior Department, said it is "indisputable" that the climate is changing and humans are having an influence.

"As a matter of fact ... my family and I have eaten lunch on Grinnell Glacier, and the glacier has receded during lunch," he said. Later, Sen. Angus King (I-Maine) said he was going to use that story in his "arsenal" to explain the impacts of increased greenhouse gas emissions on the planet's atmosphere.

Zinke touts balanced approach on resources, development

Ellen M. Gilmer, E&E News reporter

Interior's secretary nominee, Ryan Zinke, was light on oil and gas details during his confirmation hearing yesterday but steadfast in his position that large swaths of public lands should remain open to development.

Throughout the nearly four-hour hearing before the Senate Energy and Natural Resources Committee, the Republican congressman from Montana repeatedly stressed a desire to act as both an environmental steward and a careful manager of resources.

He referenced public lands icons John Muir and Gifford Pinchot, noting that he would follow Muir's hands-off approach for "lands that deserve special recognition," while the "preponderance" of other public lands would be better-served by Pinchot's sustainable-use model.

He said he strongly supports the National Environmental Policy Act as the "backbone of environmental policies" but noted that he will prioritize energy independence to support economic growth.

Zinke opens door to overturning national monument decisions

Corbin Hiar, E&E News reporter

Published: Wednesday, January 18, 2017

Rep. Ryan Zinke (R-Mont.) yesterday promised to protect public lands but also indicated that, if he is confirmed as Interior secretary, he will urge President-elect Donald Trump to undo some national monuments.

"I want to be clear on this point, I am absolutely against the transfer or sale of public lands," Zinke said in response to a question from Sen. Bernie Sanders (I-Vt.) about privatizing the national parks.

At his relatively smooth confirmation hearing before the Senate Energy and Natural Resources Committee — smooth enough for ranking member Maria Cantwell (D-Wash.) to agree to expedited consideration of the nomination — the former Navy SEAL also reaffirmed his support for the Land and Water Conservation Fund and distanced himself from a House rules package he voted for earlier this month that contained a provision making it easier to turn federal lands over to states (Greenwire, Jan. 5).

"I would not" have supported the provision in a stand-alone vote, he told Sen. Martin Heinrich (D-N.M.). "But it has no weight unless it's executed. So I think it's a shot across the bow."

Moments later, however, Zinke strongly suggested that the Trump administration will take the unprecedented and legally uncertain step of attempting to undo some national monuments established unilaterally by presidents using their authority under the Antiquities Act.

"It will certainly be interesting to see whether the president has the authority to nullify a monument," he told Heinrich.

The first test case is likely to be the 1.35-million-acre Bears Ears National Monument in southeast Utah. Sen. Mike Lee (R-Utah) urged Zinke to come to the Beehive State to hear the local opposition to the designation, which President Obama made while lawmakers were home celebrating the holidays (Greenwire, Dec. 28, 2016).

By Eric Wolff 01/18/2017 09:34 AM EDT

The Army Corps of Engineers issued a notice today that it would begin an environmental review of alternate routes for the Dakota Access Pipeline, just hours ahead of a judicial hearing over a request to block just such a notice.

The developers of the pipeline filed to block the environmental review on Monday, and Judge James Boasberg of the U.S. District Court for D.C. set a hearing time for 3 p.m. today. The Army Corps beat the hearing with notice today, adhering to an order from Assistant Secretary of the Army Jo-Ellen Darcy, the civilian in charge of the Corps, who required the review of an alternate route.

The Standing Rock Sioux, whose reservation boundary sits a half mile from where the pipeline would cross Lake Oahe, had been pushing for a complete review of the crossing before the Corps granted a final permit.

"While the EIS is exactly what we called for, the final product must be stronger and more broad in scope," the Standing Rock Sioux said in a statement. "Rightfully, it should include at the very least the territory of the entire Great Sioux Nation, and not just Lake Oahe and the northern boundary of the Standing Rock Sioux Tribe's Reservation."

President-elect Donald Trump's transition team said in December that he supports completion of the pipeline. As of his May disclosure, Trump owned a stake in Phillips 66, which owns 25 percent of DAPL.

ZINKE'S TOES MIDDLE DURING CONFIRMATION APPEARANCE: Over four hours of questioning, Trump's pick to run the Interior Department, Rep. Ryan Zinke, sought the middle ground on a host of issues at his confirmation hearing. The former Navy SEAL said climate change was "not a hoax" but demurred on the extent of the impact of human activity; pledged to review Obama-era drilling regulations and decisions and said there was no mechanism to undo national monument declarations under the Antiquities Act while leaving open the door for greater state input in management decisions. Zinke declared himself in opposition to land transfers but defended a vote on House Rules that eases them and voiced support for use of the Congressional Review Act to nullify a BLM regulation targeting the amount of methane that leaks from oil and gas operations on public lands while expressing concern about the problem. He also pledged to improve a "broke" federal permitting process but declared himself a "strong supporter" of the underlying National Environmental Policy Act. Pro's Eric Wolff and Esther Whieldon have a full roundup of key moments here.

Cantwell's early review: ME caught up Energy and Natural Resources Ranking Member Maria Cantwell midway through the hearing, and she seemed cautiously optimistic. "He's had some good articulation of things that people care about," the Washington Democrat said, adding she wasn't ready to state how she'd vote on his nomination yet. Chairman Lisa Murkowski said at the end of the hearing she believed Zinke would be confirmed.

Spotted: Zinke <u>shaking hands</u> with a Teddy Roosevelt impersonator, sponsored by Public Citizen, at the hearing. And later ME spotted the nominee smiling broadly, surrounded by aides, while walking from the Senate subways around 6:15 p.m.

Scrap of Beaufort still open to drilling is in high demand

Margaret Kriz Hobson, E&E News reporter

Published: Tuesday, January 17, 2017

Late last month, President Obama delighted green activists and angered oil industry supporters by banning resource development on 125 million acres of federal lands in the Beaufort and Chukchi seas.

In a joint statement, Obama and Canadian Prime Minister Justin Trudeau blocked new mineral leasing in nearly all Arctic Ocean waters along North American shores (E&E News PM, Dec. 20, 2016).

But Obama's sweeping decree for the American Arctic excluded a 2.8-million-acre sliver of Beaufort Sea waters where crude is already being piped to shore and two more petroleum development projects are on the drawing board. Several oil companies hold additional federal leases in the region, but the permits are due to expire later this year.

Obama left the southern Beaufort lands out of his Arctic withdrawal plan in part due to pleas from Alaska state officials to allow continued energy development in the oil-rich waters.

NPS breaks visitation record for 3rd straight year

Corbin Hiar, E&E News reporter

Published: Tuesday, January 17, 2017

Blue Ridge Parkway

Last year, the Blue Ridge Parkway was once again the most-visited National Park Service site. Photo by Smart Destinations, courtesy of Flickr.

The National Park Service welcomed nearly 326 million people to over 400 sites in 2016, the agency's third straight year of record-breaking visitation.

The annual tally, which hasn't yet been finalized by NPS number crunchers, is almost 19 million more than in 2015 — a visitation surge of more than 6 percent (E&E News PM, Feb. 17, 2016).

The increase was due in part to the NPS centennial. To celebrate the occasion, the 100-year-old agency and its philanthropic partners launched a media campaign urging Americans to "Find Your Park" (Greenwire, April 16, 2015).

The most commonly found NPS site was the Blue Ridge Parkway in North Carolina, with over 15 million visitors. The Golden Gate National Recreation Area in Northern California also broke 15 million visitors for the first time.

Ten other NPS sites had 5 million visitors or more, according to the preliminary tally.

The least visited park in the system was the Clara Barton National Historic Site in Maryland, which had zero visitors because it has been closed since October 2015 for renovations.

Barrasso sets sights on Endangered Species Act 'update'

Geof Koss, E&E News reporter

Published: Tuesday, January 17, 2017

Newly minted Senate Environment and Public Works Chairman John Barrasso wants to overhaul the Endangered Species Act, adding to the chorus of key Republicans eyeing the landmark law for reforms.

The Wyoming Republican identified the ESA as a top legislative priority for the panel this Congress, which formally meets for the first time tomorrow to hold a hearing on President-elect Donald Trump's nominee to head U.S. EPA, Oklahoma Attorney General Scott Pruitt (R) (see related story).

"I want to find ways to update, improve, strengthen the Endangered Species Act so it actually helps species that are put on the list with a recovery plan and then a way to actually get them off the list," Barrasso told reporters in a meeting this morning to discuss his expectations for the panel.

BLM rule survives initial court challenge Ellen M. Gilmer, E&E News reporter Published: Tuesday, January 17, 2017

The Obama administration's plan to cut methane emissions on public lands will take effect as scheduled today after a federal court last night rebuffed industry and state attempts to block the rule.

The U.S. District Court for the District of Wyoming denied requests from two industry groups and three states, which had asked for a preliminary injunction halting implementation of the Bureau of Land Management's new rule to slash methane emissions from oil and gas operations on public and tribal lands.

The rule sets gradual caps on how much methane may be flared and requires companies to use technologies to reduce flaring and inspect for leaks of the climate-warming substance, which is the main component of natural gas. Wyoming, Montana and North Dakota, plus the Independent Petroleum Association of America and Western Energy Alliance, challenged the rule shortly after its release in November.

Dems seek clarity from Zinke — but all-out assault unlikely

Corbin Hiar, E&E News reporter

Published: Tuesday, January 17, 2017

Democratic senators at Montana Republican Rep. Ryan Zinke's confirmation hearing this afternoon are likely to be more interested in getting clarity about how he would lead the Interior Department than in stoking opposition to his nomination to be secretary.

In a sign that the minority party doesn't have a full day's worth of questions or concerns for Zinke, the timing of his Energy and Natural Resources hearing was pushed back last week from this morning to 2:15 p.m. today to accommodate the schedules of senators who were taking part in Martin Luther King Day events back home.

That leaves less than three hours until the beginning of the Health, Education, Labor and Pensions hearing on philanthropist Betsy DeVos' nomination to serve as Education secretary. ENR Chairwoman Lisa Murkowski (R-Alaska) and several other Energy Committee members also sit on the education panel, which is led by Sen. Lamar Alexander (R-Tenn.), an ENR member.

Zinke not a top target for Democrats Brittany Patterson, E&E News reporter Published: Tuesday, January 17, 2017 Ryan Zinke

Rep. Ryan Zinke (R-Mont.) is not a main target of Democrats and environmental groups. Zinke will attend a confirmation hearing today for Interior secretary. Photo by Gage Skidmore, courtesy of Flickr.

Rep. Ryan Zinke might be feeling left out.

Environmentalists are so opposed to Scott Pruitt, the Republican Oklahoma attorney general vying to become EPA administrator, that they created the hashtag #pollutingPruitt to troll him on Twitter. Hostility to Rex Tillerson, the Exxon Mobil Corp. CEO and State Department hopeful, begat #rejectRex.

President-elect Donald Trump's pick for secretary of the Interior doesn't even have a hashtag, and it's one indication of Democratic priorities when it comes to challenging Trump's nominees over climate change.

When Zinke, the 55-year-old Republican congressman from Montana, testifies in front of the Senate Energy and Natural Resources Committee today, he is expected to face questions

about his beliefs on global warming, public lands policy and fossil fuel development. Compared to some of Trump's more controversial picks, fewer fireworks are expected at the Interior nominee's hearing.

Environmental groups and Senate Democrats have poured resources into their battle against Pruitt, who has been tapped to lead U.S. EPA. Pruitt has questioned the existance of climate change, and he has filed several high-profile lawsuits challenging EPA rules.

Zinke's ties to pipeline company scrutinized Robin Bravender, E&E News reporter Published: Tuesday, January 17, 2017

Interior Secretary-designate Ryan Zinke's ties to an oil pipeline technology company have some public lands advocates concerned.

Zinke, a Montana Republican congressman and President-elect Donald Trump's nominee to lead the Interior Department, will face a confirmation hearing today before the Senate Energy and Natural Resources Committee (see related story).

When he was a Montana state senator, Zinke served on the board of directors for Save the World Air Inc., a California-based developer of oil pipeline efficiency technologies.

Zinke's ties to the company, and his support for legislation that is seen as pro-pipeline development, have some conservationists concerned about the approach he will take if confirmed to Trump's Cabinet.

"His record as a private businessman matters when it comes to the way he'll conduct his duties at the Department of Interior," said a public lands advocate who spoke on background. That person said environmentalists are not alleging "pay-to-play here." But there "is a pretty consistent history of siding with some companies that don't have the best interests of Western public lands at heart."

10 things to know about Ryan Zinke Robin Bravender, E&E News reporter Published: Monday, January 16, 2017 Ryan Zinke

Interior Secretary-designate Ryan Zinke (R-Mont.). is an avid hunter, a Navy SEAL veteran and a vocal critic of the Obama administration. Photo courtesy of @RepRyanZinke via Twitter. Ryan Zinke has helped kidnap an accused war criminal, keeps an arsenal of serious knives nearby when he's working and answers to "Z Man."

Zinke, who is President-elect Donald Trump's pick to lead the Interior Department, also thinks the Keystone XL pipeline and hydraulic fracturing have gotten a bad rap, and warns that "false tears for the sage grouse" have hurt energy development.

The 55-year-old Montana Republican congressman is a relative newcomer to politics, having served just one term in the House, and isn't yet well-known on the national scene. That'll change tomorrow, when he heads to the Senate to testify before the Energy and Natural Resources Committee.

Last year, Zinke co-authored "American Commander" with Scott McEwen, who also co-authored the best-selling autobiography "American Sniper" with another Navy SEAL, Chris Kyle. The book about Zinke's upbringing and 23-year career in the Navy SEALs offers copious details about his personal life and policy views.

Here are 10 things to know about Zinke as his Senate vetting kicks off:

He's tough.

His Senate confirmation hearing promises to be intense, but Zinke has endured some grueling physical and psychological challenges.

He scored a full-ride scholarship to play football at the University of Oregon, where he was a 225-pound offensive lineman up against much bigger guys. "To have a guy of Ryan's size, which is small, you've got guys playing with you that are 350 pounds," McEwen said in an interview. The fact that he started on the Division 1 team "tells you not only that he's strong, but he's tough."

Zinke also survived Navy SEAL training, which included intense physical exercises, sleep deprivation and "Hell Week," where recruits in their tents experienced a "noise-and-smoke assault on the senses" and were ordered into the Pacific Ocean, where they approached hypothermia before they were ordered out onto the beach to crawl while machine guns "blazed above us," Zinke wrote in "American Commander." During some of the cold water exercises, "your testicles are climbing up into your stomach to escape frigid water," he wrote.

Those who want to quit can ring a bell and get coffee and doughnuts, and most trainees don't make it. But Zinke powered through. "I never want to fail," he said in the book. "Let's call it a soul-deep detestation of failing, of not doing my duty. That is an enormous driver. It has defined me."

Bishop bill would give states greater say on management Emily Yehle, E&E News reporter Published: Monday, January 16, 2017 This story was updated Jan. 17.

House Natural Resources Chairman Rob Bishop (R-Utah) introduced legislation Friday to "facilitate" state plans for the greater sage grouse.

H.R. 527 is a reintroduction of a measure he introduced last year that would allow governors to block federal actions to protect the sage grouse (E&E Daily, March 17, 2016).

The legislation would impair a federal protection plan that was key to the Obama administration's decision not to list the greater sage grouse under the Endangered Species Act. The plan would amend 98 Bureau of Land Management and Forest Service land-use plans in 10 Western states to incorporate protections for the species.

Bishop's bill would enable states to block those amendments, requiring governors only to notify the Interior and Agriculture secretaries that they will implement their own plans. Interior called last year's version of the bill an attempt to undermine "one of the greatest collaborative conservation successes in our nation's history."

BLM, greens end long legal battle over motorized vehicles

Scott Streater, E&E News reporter

Published: Monday, January 16, 2017

The Bureau of Land Management has reached a sweeping legal settlement with conservation groups that will require the agency to redo management plans designating nearly 4,300 miles of motorized vehicle routes in southern Utah to minimize potential harm to wildlife, cultural and archaeological sites.

The settlement ends more than eight years of litigation over revisions to six BLM resource management plans (RMPs) completed in the waning months of the George W. Bush administration covering more than 10 million acres of federal lands.

Conservation groups in 2008 challenged all six revisions in federal court, arguing that they left too many lands open to off-highway vehicles and oil and gas drilling, among other concerns.

The proposed agreement — hammered out by BLM, the conservation groups and OHV advocates over the last six months ‐ must still be approved by U.S. District Senior Judge Dale Kimball in Salt Lake City.

Alaska challenges federal bear, wolf hunting rules

Emily Yehle, E&E News reporter

Published: Monday, January 16, 2017

Alaska is challenging federal rules that limit the hunting of wolves, bears and other predators on public lands, filing a lawsuit Friday that accuses the Obama administration of impairing the state's ability to manage wildlife resources.

The lawsuit takes aim at two sets of regulations: one from the National Park Service and another from the Fish and Wildlife Service. The first banned certain types of hunting in national preserves in Alaska (Greenwire, Oct. 26, 2015). The second blocked the use of statesanctioned hunting techniques — such as using spotlights to shoot black bears while they hibernate — in national wildlife refuges (E&E News PM, Aug. 3, 2016).

Alaska Attorney General Jahna Lindemuth (I) asserted that the rules inhibit subsistence hunting and unlawfully pre-empt the state's authority, violating laws that include the Alaska National Interest Lands Conservation Act and the National Environmental Policy Act.

The developers of the Dakota Access Pipeline filed a motion yesterday to prevent the Army Corps of Engineers from moving ahead with its environmental review of alternative routes by blocking the Corps from publishing a notice in the Federal Register. Jo-Ellen Darcy, assistant secretary of the Army in charge of the Army Corps, ordered a full environmental review in December after concluding the Corps hadn't fully consulted with the Standing Rock Sioux, a tribe whose reservation sits near where the pipeline runs under Lake Oahe. The motion asks a judge to block the review while the court considers the developers' claim against the Corps. Construction on the pipeline is largely complete, but Darcy prevented completion of a crucial permit needed to make the crossing. President-elect Donald Trump is expected to be much friendlier to the pipe's developers, so the claim may buy some time for the new president to be sworn in.

01/17/2017 04:47 PM EDT

Rep. Ryan Zinke (R-Mont.) said that if confirmed as Interior secretary he would support congressional efforts to block a rule that orders oil and gas companies to reduce the amount of methane that leaks from their operations on public lands.

Sen. John Barrasso (R-Wyo.) said he plans to introduce a resolution under the Congressional Review Act to reject the Bureau of Land Management's venting and flaring rule, a move that would block the Interior Department from pursuing similar regulations in the future. Zinke said he supported that effort but said he was concerned about the underlying problem.

"Yes, and what I think the driving force is, we're wasting a lot, we're venting a lot, and we're wasting energy, and that is troubling me," Zinke told Barrasso at his confirmation hearing Senate Energy and Natural Resources Committee today. "The amount of venting in North Dakota alone almost exceeds what we get out of the fields. Let us build a system that recaptures what is being wasted."

While he opposes the specific rule, Zinke's answer resembles Interior Secretary Sally Jewell's from early in 2016 when she proposed it: "I think most people would agree that we should be using our nation's natural gas to power our economy — not wasting it by venting and flaring it into the atmosphere. We need to modernize decades-old standards to reflect existing technologies so that we can cut down on harmful methane emissions and use this captured natural gas to generate power and provide a return to taxpayers, tribes and states for this public resource."

Rep. Ryan Zinke (R-Mont.) today said that if he is confirmed as Interior secretary he would review every regulation that "takes lands and waters off Alaska" out of development.

Energy and Natural Resources Chairwoman <u>Lisa Murkowski</u> (R-Alaska) led her opening remarks at Zinke's confirmation hearing with a litany of criticisms of the Obama administration's Interior Department for actions like taking Arctic offshore oil leases off the table. Her request to Zinke was an attempt to get some of that territory into development, especially in context of shrinking throughput of Alaska's primary oil pipeline.

"Will you commit to formal review of all of Obama administration actions that took lands and waters off Alaska off the table ... and determine whether or not they can be reversed?" Murkowski asked.

"Yes," Zinke said. "We have to understand, we need an economy. If we don't have an economy as a country, then the rest of it doesn't matter. Alaska is different."

ZINKE FACES SENATE COMMITTEE: President-elect Donald Trump's Interior secretary nominee, Rep. Ryan Zinke, is in the midst of a Senate Energy and Natural Resources Committee hearing today, where he said in his prepared remarks that while some federal land should be for wilderness, "the preponderance" of federal land should be for multiple uses. The former Navy SEAL, who has cast himself as a "Teddy Roosevelt Republican," is likely to get a smooth ride through his confirmation hearing, Eric Wolff reports.

Zinke also laid out three top priorities: "Restore trust by working with rather than against local communities and states;" "prioritize the estimated \$12.5 billion in backlog of maintenance and repair in our national parks;" and "ensure the professionals on the front line, our rangers and field managers, have the right tools, right resources, and flexibility to make the right decisions that give a voice to the people they serve." Zinke's remarks break with his party in endorsing federal ownership of public land.

If he is confirmed as Interior secretary, Zinke said he would review every regulation that "takes lands and waters off Alaska" out of development. Chairwoman Lisa Murkowski led her opening remarks with a litany of criticisms of Obama administration actions, such as taking Arctic offshore oil leases off the table. Her request to Zinke was an attempt to get some of that territory into development, especially in context of shrinking throughput of Alaska's primary oil pipeline. Read more key moments from the hearing here.

Montana Rep. Ryan Zinke today backed efforts to ensure coal companies pay appropriate royalties and clean up the land they mine but stopped short of specifically backing Obama administration programs on those fronts. Senate Energy and Natural Resources Ranking Democrat Maria Cantwell of Washington pressed President-elect Donald Trump's Interior secretary pick on the Obama administration's ongoing review of its coal program. The review included a moratorium on new leases, and Interior this month released a roadmap for its review to determine whether to update regulations and royalty rates.

"I think the review is good, I don't know the specifics of that review but I think we should always look at our energy portfolio with an objectiveness," Zinke said when Cantwell asked if he would stop it.

Cantwell also asked Zinke where he stood on the issue of coal bonding. The Interior's Department's Office of Surface Mining Reclamation and Enforcement in August <u>said</u> it would launch a rulemaking to strengthen the requirements for coal mines that self-bond their clean-up obligations.

Zinke said he had not read the specifics of that rule, but said, "I think bonding is important."

Zinke went on to add, "Teddy Roosevelt had the courage to look 100 years forward. I think we need to have the courage today to look 100 years forward and look back and say we did it right."

Asked about royalty rates for energy development on federal land, Zinke said, ""I think taxpayers should always get a fair value ... including our coal, wind and all the above."

01/17/2017 04:16 PM EDT

Rep. Ryan Zinke (R-Mont.), President-elect Donald Trump's choice to run the Interior Department, said there was no provision for rescinding monuments in the Antiquities Act, but he left open the door to some kind of concessions to states whose leaders may not want a monument.

President Barack Obama created 550 million acres of new monuments out of existing public lands, enraging many Republican members of Congress who characterize it as a "land grab." Utah Rep. Rob Bishop, chairman of the House Natural Resources Committee, has openly wondered if a president could rescind a monument. Obama in December designated 1.35 million acres in southeast Utah over the opposition of local government and state officials.

Zinke agreed with Sen. Martin Heinrich (D-N.M.) that there is no provision in the Antiquities Act that allows the president to rescind a national monument. But he also pushed for state input into management of a monument, seemingly opening the door to an alternative way to weaken monument status.

"States that like their monuments, the state's comfortable with monument, I would be an advocate," Zinke said. "If the state is upset with a monument, and has a plan different from what we've done, I think we should defer a lot of that to the state."

By Esther Whieldon

01/17/2017 05:01 AM EDT

Rep. <u>Ryan Zinke</u> is a second-term Republican lawmaker from Montana whose willingness to buck the party line to back federal ownership of western lands won him the support of sportmen's and recreation groups — as well as Donald Trump Jr.

The 55-year-old former Navy SEAL commander is known for his big personality and a penchant for grandiose goals and ambitions — like when he briefly <u>mulled</u> running for the House Speaker slot in his first year on the bill

The fifth-generation Montanan is a former state senator, as well as an avid hunter and angler who considers himself to be a Teddy Roosevelt conservationist. He has opposed the push by some in the GOP to sell off public lands to states and he was the only Republican to back an amendment that would have permanently authorized the Land and Water Conservation Fund.

Zinke's military records from his 23 years with the SEALs show he was often praised by his commanding officers and many times recommended for early promotions, but had one <u>blemish</u> on this record in 1999 for two "lapses in judgment" when he used military travel vouchers for personal travel.

Zinke has also made a go at running local businesses. He tried to launch a bed and breakfast out of his house, and to build a brewery across the street, before <u>complaints from neighbors</u> forced him to back down. *To view online*:

01/17/2017 11:37 AM EDT

Newly minted Senate Environment and Public Works Chairman John Barrasso's long-term goals for the committee include infrastructure investments and reforming the Endangered Species Act, the Wyoming Republican said today.

"We want to find ways to update, improve, strengthen the Endangered Species Act so it actually helps species who are put on the list with a recovery plan, and then a way to get them off the list," he told reporters. The law has long been a target for Republicans who say it imposes major costs for little to no gain.

Barrasso demurred on whether other environmental laws could be targeted as well, though he indicated the committee will target EPA's Waters of the U.S. rule.

He also said infrastructure will be a top priority, particularly in rural areas. However, Barrasso doesn't have a specific timeline in mind, and noted that he will wait to see what President-elect Donald Trump proposes before taking action.

In the short term, Barrasso noted his committee is charged with confirming EPA nominee Scott Pruitt, plus around a dozen subordinate EPA posts and top jobs at the Nuclear Regulatory Commission and the Army Corps of Engineers.

And lawmakers will be focused on using the Congressional Review Act to kill Obama-era rules. Barrasso said Trump's transition has come up with a list of around 100 regulations from across the government that could be targeted, but that he expects to "personally" take care of Interior's recent venting and flaring rule.

Zinke on the issues

By Esther Whieldon, Annie Snider and Eric Wolff 01/17/2017 05:03 AM EDT

Montana Rep. Ryan Zinke has fought efforts to sell off federal lands while also calling for expanded fossil fuel development, and in his two years in Congress he has voted to pull back protections for a number of species including the notorious Sage Grouse.

Zinke may need to call on his experience on the House Natural Resource Committee and leadership skills honed as a Navy SEAL if he is confirmed as President-elect Donald Trump's pick to run the Interior Department, which is made up of nine massive bureaus that manage one-fifth of the nation's land, including national parks, wildlife refuges, tribal lands and areas ripe for mining minerals and erecting wind turbines, solar farms, and oil and gas pipelines.

Here's a look at some of the challenges Zinke will face if he is confirmed as Interior secretary.

Fossil fuel development

Trump has promised to unleash fossil fuel development in the U.S. and Zinke will face pressure from Day One to carry that out by ending the Interior's freeze on new coal leases and smoothing the path for more oil and gas development on federal lands and offshore.

While Zinke can undo the Interior's coal-leasing moratorium with the swipe of a pen, it may take years to facilitate additional offshore oil and gas development.

Obama in December invoked his largely untested authority under the Outer Continental Shelf Lands Act to prohibit future offshore oil and gas leases in large portions of the Arctic and Atlantic oceans. The law does not include language that would allow Trump to automatically undo the action so it remains to be seen whether Obama's ban will survive the legal battle that is sure to ensue once Trump takes office.

Also unclear is whether Zinke will wait until the court fight over the ban concludes to begin crafting a new fiveyear plan for offshore drilling, which itself is a multiyear process and the agency's primary vehicle for planning future auctions.

Hailing from a landlocked state, Zinke's record on offshore drilling in particular is thin, but he strongly supports expanded energy development overall. According to his campaign website, Zinke "is constantly working to rein in regulations on our natural resources" and supports giving "tribal and local governments more of a say in how we manage our coal, oil, and natural gas."

Water

Drought, climate change and booming populations are making water supply shortages a growing problem in the American West. From endangered species to water supply, the Interior Department regularly finds itself in the middle of these contentious challenges — and sometimes on multiple sides of them.

As a Montanan, Zinke will have a steep learning curve on many Western water issues. He'd be inheriting them at a particularly critical moment on the Colorado River, which supplies water to nearly 40 million people across the West and is now in its 16th year of drought. The states of Arizona, Nevada and California are teetering on the edge of a shortage declaration that could come as soon as 2018, triggering the first mandatory supply cuts since the reservoir behind Hoover Dam was filled in the 1930s.

At the urging of the Obama administration, the three lower basin states are working on a deal aimed at bolstering reservoir levels and staving off those cuts, but despite overall buy-in, the agreement has yet to be finalized, meaning it will be up to the Trump administration to carry it over the finish line.

But Zinke could face an even bigger challenge in the other important piece of the Colorado River equation — a new deal with Mexico over how to share water supply cuts. The Obama administration spent months negotiating a new deal, but without a signed agreement in hand, the issue could get pulled into much larger politics between the two countries amid President-elect Trump's plans for a massive border wall and interventions in private business deals that could send jobs to Mexico.

Public lands

As Interior secretary, Zinke will be responsible for overseeing over <u>507 million acres</u> of federal land. Zinke is an active hunter, and he believes the federal government should retain ownership of its federal lands. That position puts him at odds with the GOP platform and many Republicans in Congress, such as Sen. <u>Mike Lee</u> (R-Utah) and House Natural Resources Chairman <u>Rob Bishop</u> (R-Utah). Then again, it also puts him in good standing with Donald Trump Jr., the president-elect's son, also an avid hunter.

But while he believes the federal government should keep ownership of its property, he also has voted to give states more say in how it's managed, a more nuanced position that concerns green groups. Zinke voted for the Self-Sufficient Community Lands Act last year, a bill that would allow chunks of federal land to be managed by a committee appointed by the state's governor.

Yet to be tested is Zinke's general belief in multi-use land planning, a key issue for sportsman and recreational activity groups who want access to hunt and fish in areas that are used for energy development or mineral extraction.

Wildlife protections

Zinke's record on public lands issues may hearten hook and bullet groups, but his history on endangered species protections raises alarm bells for many wildlife advocates, especially when key House lawmakers are champing at the bit to overhaul the landmark Endangered Species Act.

As a congressman, Zinke voted against federal protections for wolves and lynx, priorities for ranchers in the West, and supported overriding species protections for fish in California in order to ship more water to central and southern California farms and communities. He also opposed an Obama administration plan to protect the greater sage grouse without formally listing it under the Endangered Species Act, which would entail even stricter restrictions on energy development and land use.

At a 2015 <u>hearing</u>, Zinke asked why "would Washington, the bureaucracy, given there are no sage grouse here ... decide what is best for Montana or the western states, that have a deep, traditional concern for wildlife management?"

Conservationists argue that conserving habitat before a situation becomes dire is the only thing that can break the politics around species protections, and those who have backed Zinke are optimistic that he will be open to a more proactive approach.

"He's at the table, he'll actually engage on these issues," said Collin O'Mara, president of the National Wildlife Federation.

Indian affairs

As Interior secretary, Zinke may find himself in the thick of numerous disputes over tribal land and how that land can be developed. As a member of Congress, he waded into water issues, making himself instrumental in working out a \$400 million water settlement between the Blackfeet and local users that was approved by Congress last year.

In another signal of how he might prioritize his work with tribes, last year he helped get a provision into the House version of the now-deceased energy bill that would help the Crow in Montana ship coal out through a West Coast terminal, though this contravened the desires of the Lummi Nation in Washington. *To view online*:

"Roosevelt Republican" Zinke to face smooth path to Interior post

By Eric Wolff

01/17/2017 05:02 AM EDT

Rep. Ryan Zinke, the former Navy SEAL who has cast himself as a "Teddy Roosevelt Republican," is likely to get a smooth ride through his confirmation hearing to become secretary of Interior on Tuesday when he goes before the Senate Energy and Natural Resources committee.

The Montana Republican, who will be the first of the three key energy Cabinet nominees to face Senate committees this week, has defended federal ownership of lands in the West, a contentious issue inside the GOP caucus that has often split sportmen's groups and oil- and gas-backers — but is likely to keep Democrats'

from launching a major effort to block him from leading the agency that oversees over 500 million acres of federal property.

"I've talked to many of the colleagues on the committee and they've had an opportunity to visit with Mr. Zinke," said Sen. <u>Lisa Murkowski</u> (R-Alaska), the committee chairwoman who will preside over the hearing. "Nobody has flagged to me that there's going to be some high-profile issue that's going to blow. I'm just not sensing that."

Republicans on the committee are encouraged by President-elect Donald Trump's pick's pro-energy and mining stances, a sharp break from the Obama administration, which instituted a moratorium on federal coal mining leases, sought to impose regulations on fracking on public lands and put up restrictions on offshore drilling in the Arctic and Atlantic waters.

But Republicans also chafed under the conservationist moves of Interior Secretary Sally Jewell and President Barack Obama, who set a record by granting <u>553 million acres of land and water</u> national monument status under the Antiquities Act, drawing complaints from many western lawmakers that the administration launched a land-grab and ignored input from the states.

Zinke <u>broke</u> with his party in July, resigning as a delegate to the Republican convention after calling the GOP platform "divisive" since it advocated requiring the sale of federal lands. That stance earned him plaudits from hunting and fishing groups, and some Senate Democrats hope it indicates some measure of Obama's zeal for conservation will survive into Trump's administration.

The action also earned him some national attention and raised his profile with sportsmen's groups that aim to conserve lands for hunting and fishing. That helped propel Zinke to the nomination, not least because he won the support of Donald Trump Jr., an avid trophy hunter and member of Backcountry Hunters and Anglers. He has also been a strong supporter of the Land and Water Conservation Fund, a federal account used to buy private land to close gaps in national parks and other protected spaces. The LWCF has been blasted by some Republican lawmakers, most notably House Natural Resources Chairman Rob Bishop (R-Utah), who pushed an early January measure to make it easier for Washington to transfer federal land to the states, but also Sen. Mike Lee (R-Utah), who sits on the committee Zinke will face. Lee's office did not respond to a request for comment.

"Obviously the tension is between federal and state management rights," said Sen. <u>Bill Cassidy</u>, a Louisiana Republican on the committee. "He's from a western state where they live this tension."

Sportsmen's groups say they expect that if confirmed, Zinke will strike a balance between being a steward for hunting, fishing and recreation and enabling economic development.

"Zinke supports a strong multiple-use ideology versus a lock-it-up-and-look-at-it preservationist ideology," said David Allen, president and CEO of the Rocky Mountain Elk Foundation.

"There is a balanced way that we can extract some energy resources and whatnot and still be good stewards of the Earth." Allen added, "It's been a long time since we've had that much of a direct correlation from our world to Cabinet positions. ... When we speak, I think we'll be listened to more anyway."

Some green groups are concerned that Zinke's support of public lands is only skin-deep. Randi Spivak, public lands program director for the Center of Biological Diversity, said Zinke should have opposed a House rule proposed by Bishop earlier this month that would ease budget restrictions on the sale of federal land, as well as the Self-Sufficient Community Lands Act in 2015, which would allow a panel selected by state governors to take control of federal land without taking ownership of it.

"He does not appear as brazenly off the rails, so very hard right as the other candidates. He should be applauded for walking away from the GOP platform," she said. But, she said Zinke shouldn't only be compared to Trump's most conservative picks. "The job goes beyond just protecting the crown jewels."

Fossil fuel groups have backed Zinke in a big way. Energy companies and resource developers have been his biggest business donors behind finance and real estate interests, according to OpenSecrets.org. In the 2016 election cycle, he raised \$484,000 from the oil and gas sector — 22nd among all House members — with employees of Oasis Petroleum making up his largest group of contributors. Oasis is active in the Bakken oil fields in western North Dakota and eastern Montana.

"He gets energy development," said Sen. <u>John Hoeven</u> (R-N.D.) who also sits on the committee. "So I think he'll be good on that issue. Obviously the Trump administration is going to want to develop all of our energy resources, traditional and renewable, but you know Zinke is the right guy in that respect."

For Democratic Sen. <u>Joe Manchin</u> (W.Va), Zinke's openness to coal mining is a plus, and Manchin hopes Zinke will reverse some of Interior's recent regulations, especially the stream buffer rule, which he said could have a big impact on West Virginia's coal mining industry. And he liked Zinke's positions on federal land.

"He described himself as a Roosevelt-type of person, protecting the lands and all that," Manchin said. "I think that's contrary to what I would have thought [until] I talked to him."

Zinke also may take some tough questions on whether he used military travel vouchers for personal travel while still in the Navy, as <u>reported</u> by The Intercept. And his pro-development positions raises some concerns for at least a few Democrats.

"Any energy resources produced on federal lands must deliver a fair return to American taxpayers, and clearly just turning public lands over to fossil fuel industries is a nonstarter," Sen. Ron Wyden (D-Ore.) said in a statement after Zinke's nomination was announced.

Both Wyden and Sen. <u>Maria Cantwell</u>, the committee's top Democrat, have a laundry list of issues to discuss like wildfire control and coal mine cleanups.

Esther Whieldon contributed to this report.

BUSY WEEK AHEAD! It'll be an intense week for the energy and environment crowd with three consecutive days of relevant confirmation hearings before Donald Trump becomes president. First up today is Rep. Ryan Zinke's session before the Senate Energy and Natural Resources Committee as he seeks to become Interior chief. Oklahoma Attorney General Scott Pruitt then goes before the Senate Environment and Public Works Committee tomorrow for his EPA confirmation hearing and former Texas Gov. Rick Perry heads to the energy panel on Thursday as he seeks to become Energy secretary.

Don't blinky, here's Zinke: Zinke's <u>hearing</u> kicks off today at 2:15 p.m. in Dirksen 366. Vetting a potential Interior Secretary will prompt some big ticket philosophical questions, especially on fossil fuel development, the Land and Water Conservation Fund, endangered species listings and how solidly the second-term Montana Republican believes in leaving federal land in agencies' hands. But with half a billion acres of federal land to be in his care if he is confirmed, the putative Interior secretary will likely get quizzed on a smorgasbord of parochial issues of interest to each Senator.

The takeaway: In the end, ENR Chairman <u>Lisa Murkowski</u> expects an easy run for Zinke, and none of the Democrats ME spoke to hinted at any fireworks. He's even getting a bipartisan Montana intro, with Sens. <u>Jon Tester</u> and <u>Steve Daines</u> offering opening remarks. ME would also note a confirmation hearing beginning at 2:15 p.m. suggests major turbulence and road bumps may not materialize.

Background reading: Eric Wolff raises the curtain on today's hearing here. Esther Whieldon has a brief Zinke bio here. And Eric, Esther and Annie Snider take a look at some of the main issues Zinke would face at Interior here.

What to expect when you're expecting questions: Zinke holds an unorthodox position on federal lands compared to his fellow Republicans: He doesn't want to sell them off (though he does favor different management practices, more on that later). He even wants to buy more, via the Land and Water Conservation Fund, which the government uses to fill gaps in protected areas. While that viewpoint helped him secure nomination to the job, with a particular hat tip to Trump's son, Don Jr., also a hunter, it also puts him on the firing line for some Republicans who would like to see a massive transfer to the states. Look for Utah Sen. Mike Lee, a particularly strong opponent of new monument designations and major fan of federal land transfers, to potentially give Zinke a good once over on the subject.

Get it out of the ground: Zinke has a record of opposing environmental regulations and promoting fossil fuel development — he has a 3 percent score from the League of Conservation Voters. Democrats may push him on climate change, the lifting of the moratorium on new coal leases and whether he would re-open the Atlantic and the Arctic to offshore drilling.

The Energy Dem: West Virginia Sen. <u>Joe Manchin</u>, the moderate Democrat seen as the most getable "aye" vote for Trump's picks, sounded upbeat about Zinke's positions. He'd met with Zinke, but told ME he'd like to hear Zinke's views "on the stream buffer rule, our mining extraction, that sort of thing."

Sage Grouse, still: Though Interior agreed not to list the greater sage grouse under the Endangered Species Act as part of a broad agreement with states and interest groups, the bird still has its talons in the hearts of Western Senators, at least a few of whom may bring it up at committee. Sen. <u>Jim Risch</u> said in June he was <u>"frankly disgusted"</u> with how Interior handled the management plans. He'll likely get a friendly ear in Zinke, who co-sponsored a bill to prevent a sage grouse listing in 2015.

But what about *my* home state? Every senator has some local issue they'd may like to discuss. Louisiana San. Bill Cassidy told ME he is interested in revenue sharing and off-shore drilling; Sen. Cory Gardner said county commissioners in Colorado are concerned with the Planning 2.0 rule, because, he said, "they make a person in Downtown New York the same status as someone in Grand Junction Colorado." For the Democrats, Ranking Member Maria Cantwell said she wants to know whether Zinke thinks coal mine owners should have to buy bonds to cover cleanup costs; Sen. Ron Wyden will ask about wildfire management and an aide to Sen. Mazie Hirono said the senator would want to ask about the Commitment of Free Association, which relates Pacific Island Territories and invasive species, among other subjects.

Can Zinke bring balance to the force? ME heard a common refrain from GOP Senators on Zinke: They hope an Interior Department under him would strike a balance between the needs of different constituencies and avoid the "overreach" of the Obama administration's aggressive approach to conservation. "That's one of the big challenges that he'll have at the Department of Interior," Sen. John Hoeven told ME.

Where will Zinke stand on water issues? Lawmakers such as Arizona's <u>Jeff Flake</u> are expected to bring up water supply and drought issues at the hearing. Interior last year <u>pledged</u> to block drought-stricken California from tapping extra water being stored in Lake Mead's reservoir unless all three lower basin states agreed to it. Flake may ask Zinke if he is willing to renew that promise.

01/17/2017 07:01 AM EDT Updated 01/17/2017 07:51 AM EDT

Rep. Ryan Zinke (R-Mont.), President-elect Donald Trump's selection to run the Interior Department, will tell the Senate Energy and Natural Resources Committee today that while some federal land should be for wilderness, "the preponderance" of federal land should be for multiple uses, according to his prepared remarks.

Zinke has broken with his party in endorsing federal ownership of public land, and he will declare himself "an unapologetic admirer of Teddy Roosevelt" in favor of conservation, a statement which will cheer some Democrats on the committee. But in his opening statement for this afternoon's hearing, he will add, "It is also these lands that many communities, like the town I grew up in, rely on to harvest timber, mine, and to provide our nation with energy."

Zinke's remarks lay out three top priorities: "Restore trust by working with rather than against local communities and states;" "prioritize the estimated \$12.5 billion in backlog of maintenance and repair in our national parks;" and "ensure the professionals on the front line, our rangers and field managers, have the right tools, right resources, and flexibility to make the right decisions that give a voice to the people they serve."

The maintenance backlog is sure to perk up the ears of some members of Congress.

"The president-elect is committed to a jobs and infrastructure bill, and I am going to need your help in making sure that bill includes shoring up our nation's treasures," Zinke plans to say.

Agency names acting director

E&E // Jennifer Yachnin // January 13, 2017

The Bureau of Land Management today announced that veteran federal official Kristin Bail will succeed Director Neil Kornze as the agency's acting director. Kornze will step down from his post when the incoming Trump administration takes the agency's reins Jan. 20. Bail, who most recently served as assistant director for BLM's Resources and Planning Directorate, has spent more than 32 years in public lands management in posts for both BLM and the Forest Service. "Kristin is a thoughtful, effective leader. The BLM family will be in good hands under her leadership," Kornze said in a statement. Bail has also served as assistant director for BLM's National Conservation Lands and Community Partnerships, as well as working in Oregon, Arizona, North Carolina and Washington, D.C. Before her career in the federal government, Bail received a Bachelor of Science in geology from Washington State University. Her spouse, Barron, is also a former BLM employee, who retired in 2010 after 32 years with the agency.

Philanthropists launch \$1.5M fund for Bears Ears

E&E // Jennifer Yachnin // January 13, 2017

A philanthropic coalition announced the launch of an organization yesterday aimed at shoring up the new Bears Ears National Monument in southeast Utah, with donors including the Leonardo DiCaprio Foundation establishing a \$1.5 million fund. The Bear Ears Community Engagement Fund will aim to "minimize threats" to the 1.35-million-acre monument from looting and vandalism of its more than 100,000 archaeological and sacred cultural sites, as well as support local community and tribal engagement and sustainable recreation management, and fund visitor education. "The president's action to protect Bears Ears inspired us to create this fund, which is an investment in the local communities and the tribes and their ability to serve as the best stewards of the monument as well as the most capable creators of economic opportunity for the region around the monument," said Michael Scott, acting program director of the William and Flora Hewlett Foundation, which announced the new fund.

Other backers of the Bear Ears Community Engagement Fund include the Wyss Foundation, David and Lucile Packard Foundation, Wilburforce Foundation, and Grand Canyon Trust

Obama expansion pleases greens, infuriates ranchers

E&E // Jennifer Yachnin // January 13, 2017

President Obama yesterday announced a significant expansion of the Cascade-Siskiyou National Monument in Oregon and the California Coastal National Monument, drawing praise from lawmakers and environmentalists who had pushed for the additions but raising the hackles of local ranchers concerned about continued grazing on the lands. The Obama administration also unveiled three new national monuments yesterday honoring key events in the Civil Rights movement and the Civil War and issued a memorandum urging greater diversity among the federal land management workforce (see related story). The largest of the additions will be to the Cascade-Siskiyou National Monument, which will gain an additional 42,000 acres in Oregon and 5,000 acres in California. Both of Oregon's Democratic senators, Jeff Merkley and Ron Wyden, had previously urged Interior officials to add to the monument, arguing that "a patchwork of vital habitats and watersheds" remained unprotected under the existing 65,000-acre boundaries (E&E News PM, Oct. 13, 2016). The monument was the first created with the sole intention of protecting biodiversity when it was established by President Clinton in 2000.

Wildlife research lab lacks 'scientific integrity' — group

E&E // Scott Streater // January 13, 2017

A federal research center operated by the U.S. Geological Survey does not have the resources, staff or oversight to adequately track animal disease outbreaks and determine the causes of wildlife die-offs, according to a complaint filed yesterday by a government watchdog group. The administrative complaint, sent to Interior Secretary Sally Jewell by Public Employees for Environmental Responsibility, targets USGS's National Wildlife Health Center in Madison, Wis. It says the health center has failed to adequately care for research animals and needs to be subjected to routine, independent inspections to restore the "scientific integrity" of its core mission. USGS strongly denies that the problems outlined in the complaint have any merit. "There are a fair to significant number of inaccuracies" in the complaint and associated press statements issued by PEER, said A.B. Wade, a USGS spokeswoman in Washington, D.C.

Obama promotes diversity at land and water management agencies E&E // Corbin Hiar // January 13, 2017

President Obama, speaking in Everglades National Park on Earth Day 2015, wants to increase diversity among park workers and visitors. Photo by Eduardo Merille, courtesy of Flickr. With only days remaining in office, President Obama yesterday evening ordered public land and water management agencies to promote diversity within their ranks and among the visitors they attract. "The purpose of this memorandum is to ensure that all Americans have the opportunity to experience and enjoy our public lands and waters, that all segments of the population have the chance to engage in decisions about how our lands and waters are managed, and that our Federal workforce — not just the sites it manages — is drawn from the rich range of the

diversity in our Nation," Obama wrote in a memorandum to the leaders of the Interior Department, Forest Service, Army Corps of Engineers, and National Oceanic and Atmospheric Administration. Specific actions to bring more minorities and people from a variety of backgrounds into the makeup of land and water management agencies include conducting "periodic interviews" with representative samples of the workforce, surveying departing employees, identifying methods for attracting and retaining "diverse workforce talent," prioritizing resources for workforce development programs, and rewarding diversity efforts, the memo said. The president also called for agencies to "expand training on unconscious bias" for senior leadership — a concept that President-elect Donald Trump has criticized — and at least two meetings per year of human resources staff to discuss progress on the order and where data gaps may exist.

House watchdog floats moving Interior, EPA out of D.C.

E&E // Robin Bravender // January 13, 2017

The House's top watchdog wants to push federal agencies including the Interior Department and U.S. EPA out of Washington and into the states. "Maybe the Department of the Interior should come to Utah. Maybe the EPA could be in a different state, maybe the Department of Transportation could be in Los Angeles," Oversight and Government Reform Chairman Jason Chaffetz (R-Utah) told Utah ABC affiliate KTVX in an interview that aired yesterday. Chaffetz this week introduced a resolution (H.Res. 38) that would express a desire by the House that government headquarters shouldn't be required to be located in the nation's capital. "Why should just the greater Washington, D.C., area get all the financial benefit of a government?" Chaffetz told the news channel. "Now, I hope to shrink the government, but when it's spending \$4 trillion, maybe that should be a little bit more spread out."

Zinke donors include oil and gas firms using public land E&E // Brittany Patterson // January 13, 2017

Rep. Ryan Zinke (R-Mont.) took thousands of dollars in campaign donations from companies that drill for oil and gas on the vast public lands that he would oversee as Interior secretary. Watchdog groups say the contributions, totaling \$345,000 since 2013, raise questions about whether the fossil fuel industry could influence a Cabinet secretary who controls drilling, mining and conservation policies across more than 500 million acres of public land. Zinke's top individual campaign donor is Taylor Reid, president and chief operating officer of a Texas-based oil and gas company that drills in the Bakken oil field. Reid, who has been with Oasis Petroleum since its founding in 2007, donated \$11,600 to Zinke's election efforts between 2013 and 2016, an analysis of Federal Election Commission data shows. During that time, Zinke won Montana's single congressional seat, in 2014, and was re-elected in November. President-elect Donald Trump tapped the 55-year-old former Navy SEAL last month to head the Interior Department, a sprawling federal agency responsible for policies that dictate drilling, mining and protection of about one-fifth of the land in the United States.

Leaders encouraged as NPS agrees to infrastructure evaluation E&E // Corbin Hiar // January 13, 2017

Senate committee leaders yesterday applauded the National Park Service for promising to heed the Government Accountability Office's call to evaluate whether its new program for addressing parks' crumbling infrastructure is working as intended. "The longer our parks go without the attention they need, the more costly it will become for taxpayers to properly steward and restore these historical and cultural gems," Energy and Natural Resources Chairwoman Lisa Murkowski (R-Alaska) said in a news release. "I am encouraged that NPS agrees with GAO's recommendations and look forward to seeing them implemented." The 17-month audit of NPS's \$11.9 billion deferred maintenance backlog was requested by Murkowski and Budget Chairman Mike Enzi (R-Wyo.) to determine how well the agency is managing over 75,000 assets spread across over 400 parks. GAO found that — after years of struggling to adequately assess or address its backlog — NPS now has a very detailed system in place for tracking, analyzing and prioritizing needed repairs.

Ppro:

GOP LEADER SLAMS 'WAR ON THE WEST': House Majority Leader Kevin McCarthy condemned a host of late-term Obama administration public lands actions during a Thursday appearance at the Hoover Institute as part of a "war on the West." ME readers know — and McCarthy repeated the vow — that Congress intends to go after Interior's Stream Buffer Zone rule and a separate regulation targeting methane leaks on public lands in early February. He also promised the 115th Congress would also make a renewed push to speed pipeline infrastructure project approvals.

OBAMA CREATES, EXPANDS NATIONAL MONUMENTS: President Barack Obama on Thursday created three new national monuments in Alabama and South Carolina that are dedicated to key moments in the civil rights movement. And he expanded the California Coastal National Monument by 6,230 acres and the Cascade-Siskiyou National Monument by 42,000 acres in Oregon and about 5,000 acres in California. The new civil-rights monuments are the Birmingham Civil Rights National Monument and the Freedom Riders National Monument in Alabama and the Reconstruction Era National Monument.

The moves come as Republican lawmakers such as House Natural Resources Committee Chairman Rob Bishop and Senate Energy and Natural Resources Committee Chairwoman Lisa Murkowski are mulling options for revamping the Antiquities Act, the law that authorizes the president to designate new monuments. Murkowski and 25 other GOP Senators on Jan. 5 reintroduced a bill, S. 33, that would give states more say over the creation of national monuments and require the monuments to clear environmental reviews under the National Environmental Policy Act.

PARK-ED MAINTENANCE: The National Park Service averaged annual deferrred maintenance of \$11.3 billion in fiscal 2009-2015 on its various assets, a GAO report requested by Sens. Lisa Murkowski and Mike Enzi finds. "The longer our parks go without the attention they need, the more costly it will become for taxpayers to properly steward and restore these historical and cultural gems," Murkowski said in a statement. Bridges, tunnels and paved roadways most frequently lacked maintenance when needed, or experienced delays.

MAIL CALL! CONSERVATION GROUPS BACK ZINKE: Ahead of his confirmation hearing next week, the Theodore Roosevelt Conservation Partnership is throwing its support behind Rep. Ryan Zinke's Interior secretary nomination. "We are confident that, as Secretary of Interior, Congressman Zinke will continue to approach resource management issues with an eye towards improving the multiple-use productivity of our public lands and seeking solutions that balance the needs of all Americans," President Whit Fosburgh wrote in a Thursday letter.

Grijalva unveils bill to permanently reauthorize LWCF E&E // Corbin Hiar // January 12, 2017

The House Natural Resources Committee's top Democrat reintroduced legislation today aimed at ensuring that a popular land conservation and recreation program lasts in perpetuity. Arizona Rep. Raúl Grijalva's bill is identical to the measure he offered last Congress to permanently reauthorize the Land and Water Conservation Fund. Despite attracting 211 co-sponsors, the bill never made it out of committee. The new legislation, which is co-sponsored by Pennsylvania Republican Rep. Patrick Meehan, would also ensure that at least 1.5 percent or \$10 million of the annual LWCF appropriation goes toward projects that secure "access to existing Federal public land for hunting, fishing, and other recreational purposes," the bill says. Established by Congress in 1965, the LWCF is funded by up to \$900 million per year from offshore oil and gas royalties, although lawmakers have typically provided around a third of that total for projects approved by the departments of the Interior and Agriculture.

Interior's leasing reform blueprint muscular on climate E&E // Dylan Brown // January 12, 2017

The Interior Department yesterday extended an olive branch to both sides of the debate over the federal program for leasing public coal to mining companies. Only one side, greens, took theirs with glee. The Bureau of Land Management floated reforms that would increase fees by making climate a key factor in leasing, a long-standing environmentalist demand. But President-elect Donald Trump will likely move to lift the current leasing moratorium and scrap the ongoing programmatic environmental impact statement — the ultimate goal for companies that defend the current system. After wading through hundreds of thousands of public comments, Interior made the case for "modernizing" a program it has not reviewed since the 1980s and only slightly changed since the 1970s. "While energy markets, communities, environmental conditions, and national priorities have changed dramatically, the program has remained fairly static in its administration over the last thirty years," the Bureau of Land Management wrote (Greenwire, Jan. 11). Republicans and Democrats took up familiar arms for their respective sides as BLM laid out various reform packages. There was also an alternative halting new

leasing sure to appeal to the "keep it in the ground" movement and a no-action alternative for industry.

Interior names 24 National Historic Landmarks

E&E // Cecelia Smith-Schoenwalder // January 12, 2017

The Interior Department yesterday unveiled two dozen new National Historic Landmarks, including the archaeological district of Walrus Islands in Alaska and a national park headquarters in Arizona. "These 24 new designations depict different threads of the American story that have been told through activism, architecture, music, and religious observance," Interior Secretary Sally Jewell said in a statement. The Walrus Islands Archaeological District near Togiak, Alaska, contains evidence of human occupation on the Bering Sea continental shelf when sea levels were much lower. The earliest inhabitants of one of the district's islands, Round Island, hunted walruses on the beach over 6,000 years ago. A National Historic Landmark designation adds the sites to the National Register of Historic Places, if they were not already listed.

Murkowski wants Trump up to speed on Izembek road E&E // Jennifer Yachnin // January 12, 2017

Senate Energy and Natural Resources Chairwoman Lisa Murkowski and Sen. Dan Sullivan are renewing their push to construct an 11-mile road through the Izembek National Wildlife Refuge. The Alaskan Republicans said yesterday that President-elect Donald Trump's Interior secretary to-be will "restore common sense" after the Obama administration rejected a similar proposal. Under new legislation by Murkowski and Sullivan, their state would offer the federal government an equal-value land exchange for the 206-acre corridor. The land would be used to construct an 11-mile, one-lane gravel road to connect King Cove, Alaska, to the all-weather airport in Cold Bay. The road would cut through part of the 315,000-acre wildlife refuge...Interior Secretary Sally Jewell rejected a similar land exchange in 2013, ruling that better transportation solutions were available than creating a road in a wilderness area that serves as a key habitat for migratory birds.

MAIL CALL! WHAT'S UP WITH THAT HIRING PUSH? House Oversight and Government Reform Chairman Jason Chaffetz is asking 18 agency heads, including Moniz, EPA's Gina McCarthy and Interior's Sally Jewell, for information on their "accelerated" hiring practices post-election. "The accelerated hiring timelines create the appearance that some federal agencies are pushing to fill as many slots as possible without regard for identifying and hiring the most qualified applicants," he writes.

MONIZ, JEWELL TALK SHOP ONE MORE TIME: Two of the Obama administration's outgoing Cabinet secretaries — DOE's Ernest Moniz and Interior's Sally Jewell — hold some of their final public appearances today. Jewell takes the stage in New York at 10:30 a.m. for a discussion with the Columbia University's Center on Global Energy Policy on the administration's accomplishments (webcast here). Moniz speaks at the National Press Club at 11:00 a.m., where his remarks will focus on the importance of science in policymaking, as well as "how to protect the independence and integrity of scientists" across the agency.

INTERIOR KILLS LAST TWO OIL AND GAS LEASES IN SACRED MONTANA AREA: BLM has canceled the final two oil and gas leases in the Badger-Two Medicine area, a part of the Lewis and Clark National Forest in Montana considered sacred by the Blackfeet tribe. Interior in November killed 15 other leases in that area after concluding they never should have been issued. BLM has notified the leaseholders of the final two sites — the J.G. Kluthe Trust of Nebraska and Texas oilman William "Tex" Moncrief, Jr. — of the cancellations.

PERRY, ZINKE DISCLOSURES RELEASED: The Office of Government Ethics released financial disclosure documents today for both Rick Perry, Donald Trump's pick to head the DOE, and Rep. Ryan Zinke, Trump's potential Interior chief. According to Perry's ethics agreement, the former Texas governor resigned from positions at five companies — including the company behind the Dakota Access pipeline — where he was either a consultant or a board member at the end of 2016.

Darius Dixon reports: "Effective Dec. 31, 2016, Perry resigned his board position with Energy Transfer Partners, the company that is building the pipeline that has triggered months of protests in North Dakota and has been delayed by the Obama administration. He also stepped down from his positions at Sunoco Logistics Partners, Celltex Therapeutics, and Grey Rock Energy Partners, an oil and gas firm co-founded by his son, Griffin." Perry also pulled out of a consultancy position with MCNA Insurance.

Zinke, for his part, holds assets worth more than \$2 million, mostly in the form of rental property owned in Whitefish, Mont., and a family trust, according to his financial disclosure. Upon confirmation, his ethics letter says he will resign from the operation of both Continental Divide LLC, which appears to mostly focus on rental property, and Double Tap LLC, which matches the name of a brewery he tried to set up in 2012.

Read it: Perry's ethics agreement here and his disclosure here. Zinke's ethics letter here and disclosure here.

Zinke hearing set for Tuesday

E&E // Brittany Patterson // January 11, 2017

Rep. Ryan Zinke (R-Mont.), President-elect Donald Trump's pick for Interior secretary, will appear before the Senate Energy and Natural Resources Committee on Tuesday, lawmakers confirmed last night. Sen. Lisa Murkowski (R-Alaska), chairwoman of the committee, told E&E News yesterday afternoon that she was eager to schedule hearings for both Zinke and former Texas Gov. Rick Perry (R), Trump's nominee to lead the Department of Energy, but was waiting for the Office of Government Ethics (OGE) to give final approval on the nominees' financial disclosure reports. As of last night, Zinke's Form 278e and ethics agreement had not been posted to the OGE website. But Murkowski and the committee's ranking member, Sen. Maria Cantwell (D-Wash.), announced in a late-night media advisory that they had in fact confirmed the hearing date. Zinke's nomination has been a mixed bag for conservation, sportsmen's and environmental groups. On the one hand, the 55-year-old native Montanan, who calls himself a "Teddy Roosevelt" Republican, has repeatedly said he will not tolerate the selling off of public lands and fully supports the Land and Water Conservation Fund.

Bills could topple 8-year-old Supreme Court ruling

E&E // Cecelia Smith-Schoenwalder // January 11, 2017

Oklahoma Republican Rep. Tom Cole introduced legislation last week to undo the landmark Supreme Court Carcieri ruling. In the 2009 case Carcieri v. Salazar, the high court said the government could take land into trust for tribes recognized after the Indian Reorganization Act of 1934. Lawmakers have since been working on a "fix." Cole, a member of the Chickasaw Nation, introduced H.R. 130 to provide a full fix by changing the law's language from saying "any recognized Indian tribe now under Federal jurisdiction" to "any federally recognized Indian tribe." Cole also introduced H.R. 131 to reaffirm land placed into trust for tribes since the act. Any post-1934 federally recognized nations have to ask Congress to set aside land for them.

Chaffetz presses agencies on hiring spree

Kevin Bogardus, E&E News reporter

Published: Wednesday, January 11, 2017

The House's top watchdog is asking for more information behind a surge in hiring by federal agencies.

Rep. Jason Chaffetz (R-Utah), chairman of the House Oversight and Government Reform Committee, sent letters yesterday to 18 agencies asking about reports that they have begun accelerating hiring for civil service jobs in preparation for a possible hiring freeze by President-elect Donald Trump's incoming administration.

In a letter to U.S. EPA Administrator Gina McCarthy, Chaffetz said, "Hiring decisions must be legitimate, justified, and free from political influence."

"The accelerated hiring timelines create the appearance that some federal agencies are pushing to fill as many slots as possible without regard for identifying and hiring the most qualified applicants," Chaffetz said.

The Oversight panel chairman also sent a letter to the Department of Energy and the Department of the Interior.

Lawmakers float bill to end gray wolf protections

Corbin Hiar, E&E News reporter

Published: Wednesday, January 11, 2017

A bipartisan House bill introduced yesterday is the first attempt in the 115th Congress to remove federal protections from gray wolves. The legislation (H.R. 424) from Rep. Collin Peterson (D-Minn.), the ranking member on the Agriculture Committee, would direct the Interior secretary "to reissue final rules relating to the listing of the gray wolf in the Western Great Lakes and Wyoming." Interior attempted to remove wolves in both areas from the endangered species list in 2011 and 2012. But those moves were challenged by wildlife advocates and eventually overturned by federal courts (Greenwire, Dec. 22, 2014).

Group warns of states' efforts to seize federal tracts

Jennifer Yachnin, E&E News reporter

Published: Wednesday, January 11, 2017

The Center for Western Priorities warned today that efforts to take control of federal lands could continue among state legislatures. The nonpartisan conservation group today released its legislative briefing previewing potential measures across Western states including Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah and Wyoming. "While we expect faltering efforts to seize control of U.S. public lands to return in the upcoming legislative sessions, state leaders will also be looking for proactive, viable ideas to enhance public lands, improve access, and bolster the outdoor economy," CWP Policy Director Greg Zimmerman and Advocacy Director Jesse Prentice-Dunn wrote in the briefing. The duo also noted that among 16 measures aimed at ceding control of federal lands to their respective states in the previous cycle's legislative sessions, only one of those bills was approved by a state legislature.

Zinke pledges to step away from personal businesses

Geof Koss, E&E News reporter

Published: Wednesday, January 11, 2017

Interior secretary nominee Ryan Zinke has vowed to step down from his businesses in financial disclosure and ethics documents posted online. In an ethics agreement filed with the Office of Government Ethics dated yesterday, the Montana Republican congressman said he will step down as CEO of Whitefish, Mont.-based Continental Divide International LLC, which lists Zinke as CEO since 2008. According to Zinke's financial disclosure form, the company is valued between \$500,001 and \$1 million and earned the nominee between \$15,001 and \$50,000 in income listed as "rent or royalty." He also pledged to step down from Double Tap LLC, another Whitefish business that is listed as an asset valued between \$100,001 and \$250,000, providing him rent or royalties between \$5,001 and \$15,000. Zinke also said he would step aside from his

position as president of the nonprofit Great Northern Veterans Peace Park Foundation, an 18-acre children's sledding park in Whitefish that he co-founded with his wife, Lolita.

BLM finalizes contentious overhaul of oil shale regs

Scott Streater, E&E News reporter

Published: Wednesday, January 11, 2017

The Obama administration has finalized a new rule years in the making that's designed to ensure the environment is protected and taxpayers are fairly compensated if oil shale is ever commercially developed on federal lands. The Bureau of Land Management's final rule, released late yesterday, amends federal oil shale management regulations to allow the Interior secretary to levy a higher royalty rate for commercial development than what the George W. Bush administration proposed in 2008. It also requires commercial-scale oil shale project developers to include in formal plans of development environmental protection strategies for water, air and other natural resources. A draft of the regulatory revisions was unveiled in early 2013, and BLM has been working to finalize them for nearly four years (Greenwire, March 22, 2013).

Jewell lauds Zinke, says Tillerson in for 'a shock'

Emily Yehle, E&E News reporter

Published: Wednesday, January 11, 2017

Interior Secretary Sally Jewell today said she is "committed to doing everything I can" to help Rep. Ryan Zinke (R-Mont.) flourish as her probable successor. Jewell struck an optimistic note when asked about Zinke, President-elect Donald Trump's pick for Interior secretary, at Columbia University's Center on Global Energy Policy. She pointed to his support of the Land and Water Conservation Fund and his protest of a Republican Party platform that included the full-scale disposal of public land. "I think those are good," she said. "They are indicative of someone that does come from a state that understands the value of federal public lands, the benefits the state gets from those public lands and the importance of thoughtful, long-term management." Jewell said she has already spoken to Zinke and they are "trying to juggle our schedules to get together for dinner." Her advice so far: Hear all points of view, let science be the guide and listen to the career staff.

Jan 10

US cancels final 2 oil and gas leases in Badger-Two Medicine

Billings Gazette // Associated Press // January 10, 2016

The Interior Department has canceled the final two oil and gas leases in a wilderness area bordering Glacier National Park that's sacred to the Blackfoot tribes of Montana and Canada. The agency said Tuesday it had notified lease owners in Nebraska and Texas of the cancellations. The undeveloped leases were issued in the 1980s in the Badger Two-Medicine area. That's the site of the creation story for Montana's Blackfeet Nation and the Blackfoot tribes of Canada. The Interior Department in November cancelled 15 leases in the area held by Devon Energy. Another lease was cancelled in March, but that's subject to a pending federal court challenge by Louisiana-based Solenex LLC.

Two more leases in Badger-Two Medicine canceled

Great Falls Tribune // Karl Puckett // January 10, 2016

The U.S. Department of the Interior announced Tuesday that the Bureau of Land Management has canceled the final two oil and gas leases in the Badger-Two Medicine area within the Helena-Lewis and Clark National Forest in Montana. The two lease cancellations address outstanding concerns about the potential for oil and gas development in the culturally and ecologically important area, the Interior Department said. "We are proud to have worked alongside the Blackfeet Nation and the U.S. Forest Service throughout this process to roll back decades-old leases and reinforce the importance of developing resources in the right way and the right places." Interior Secretary Sally Jewell said in a statement. "The cancellation of the final two leases in the rich cultural and natural Badger-Two Medicine Area will ensure it is protected for future generations." The Badger-Two Medicine is a powerful cultural region, Harry Barnes, chairman of the Blackfeet Nation Tribal Business Council, said in a statement.

Interior nixes final Blackfeet-area leases

E&E // Ellen M. Gilmer // E&E News reporter

Published: Tuesday, January 10, 2017

The Obama administration today canceled a pair of remaining oil and gas leases in a Montana area considered sacred by the Blackfeet Nation. The Interior Department announced this afternoon that the Bureau of Land Management canceled two final leases in the Badger-Two Medicine area of Lewis and Clark National Forest. "We are proud to have worked alongside the Blackfeet Nation and the U.S. Forest Service throughout this process to roll back decades-old leases and reinforce the importance of developing resources in the right way and the right places," Secretary Sally Jewell said in a statement. "The cancellation of the final two leases in the rich cultural and natural Badger-Two Medicine Area will ensure it is protected for future generations." The 130,000-acre area lies south of Glacier National Park and adjacent to the Blackfeet Indian Reservation, and advocates have been pushing for years for the federal government to cancel leases that were issued in the 1980s and have been suspended ever since (Energywire, July 22, 2016). Congress withdrew the area from mineral development in 2006.

Grijalva rallies Dems against stream, methane rollbacks

E&E // Arianna Skibell // January 10, 2017

The top Democrat on the House Natural Resources Committee is calling on his caucus to stop House Republican leaders from slashing two Obama-era environmental standards. Rep. Raúl Grijalva of Arizona yesterday sent a letter urging a united Democratic front against repeal of the Interior Department Stream Protection Rule and the Bureau of Land Management methane rule. House Majority Leader Kevin McCarthy (R-Calif.) has said both rules could be repealed with the

Congressional Review Act, a tool Republicans have said they intend to use to roll back regulations they say burden the economy. "For the past eight years, the Republican Party has echoed the anti-regulatory talking points of the fossil fuel industry," Grijalva said. "But now instead of simply attacking President Obama's agenda, they are preparing to actually repeal health, safety, fiscal, and environmental protections that President Obama provided the American people." Grijalva chided Republican leadership for trying to derail regulations without first holding hearings on the substance of the rules themselves. "Rather than an open discussion on the merits of these rules, the House Majority has simply parroted industry talking points and scare tactics," he said, adding, "Repealing these regulations through the CRA asks Members to take industry's word and to side with industry while ignoring the significant benefits these rules provide to the American people."

Once-common bumblebee on 'brink of extinction' E&E // Scott Streater // January 10, 2017

The Obama administration has determined that a bumblebee once found throughout the eastern United States and Upper Midwest is on the brink of extinction and needs federal protection to save it from a host of threats, including the use of pesticides and climate change. The Fish and Wildlife Service today announced it is listing the rusty patched bumblebee as an endangered species, a move some representatives of the agriculture industry and other industries have warned could have dramatic economic impacts. The final rule listing the bumblebee for protection under the Endangered Species Act will be published in tomorrow's Federal Register, and will go into effect 30 days later, on Feb. 10. FWS first proposed listing the rusty patched bumblebee last fall (Greenwire, Sept. 22, 2016). Today's designation marks the first time any species of bee in the continental United States has been listed as endangered under ESA, according to the service. FWS in September listed seven species of yellow-faced bees as endangered, but they are found only in Hawaii.

Harriet Tubman National Historical Park becomes reality

Associated Press // January 10, 2016

AUBURN, N.Y. (AP) - New York lawmakers and federal parks officials are gathering in Washington, D.C. to formally establish the Harriet Tubman National Historical Park in New York. U.S. Interior Secretary Sally Jewell will preside over an official signing ceremony Tuesday that will make the park part of the National Park System. It encompasses the site of Tubman's old home on the outskirts of Auburn, about 25 miles west of Syracuse, and a nearby church where she worshipped. The New York park will focus on Tubman's work later on in her life when she was an active proponent of women's suffrage and other causes. It will be a sister park to the Harriet Tubman Underground Railroad National Historical Park in Maryland.

National park honoring Underground Railroad heroine Harriet Tubman made official USA Today // Nicole Gaudiano // January 10, 2016

WASHINGTON -- Sites where Underground Railroad conductor Harriet Tubman lived and worshiped in Auburn, N.Y., officially became a national park on Tuesday, adding to growing recognition for the abolitionist and activist. The Harriet Tubman National Park commemorates her post-Civil War advocacy for women's suffrage and other causes. It includes her home, a home she helped establish for elderly and indigent African Americans, and the historic Thompson Memorial A.M.E. Zion Church and rectory, located near the cemetery where she is buried. A memorandum, signed by Interior Secretary Sally Jewell during a ceremony, established the park as the 414th unit in the National Park System. "She's a true American hero because she didn't just secure the blessings of liberty for herself, she risked her life to secure it for others and passionately fought to change her country to secure it for everyone," said Senate Minority Leader Chuck Schumer, D-N.Y., during the ceremony with other New York lawmakers, community and church members.

Harriet Tubman Historical Park in Auburn Becomes a Reality

TWC News // January 10, 2016

It's an historic day for the city of Auburn. The Harriet Tubman National Park became a reality this morning, with a special ceremony in Washington D.C. Interior Secretary Sally Jewell provided the finishing touches on five years of work -- signing off on federal legislation to recognize Tubman's significance in the effort to abolish slavery in the United States. The designation brings together five historic locations in Auburn, all associated with Harriet Tubman, to put them in the national spotlight. The sites include Tubman's brick home, a historic barn, the Tubman Home for the Aged, the Parker Street location of the Thompson Memorial AME Zion Church, and Tubman's grave site in the Fort Hill Cemetery Senator Charles Schumer and Kirsten Gillbrand were behind the effort, and say Tubman's courage and honor are an inspiration to this day. "She didn't just secure the blessings of liberty for herself. She risked her life to secure it for others," Schumer said.

Interior secretary formally establishes Harriet Tubman national park in Auburn

The Citizen // Robert Harding // January 10, 2016

WASHINGTON — After nearly two decades of work, it's now official: Cayuga County is home to the Harriet Tubman National Historical Park. Interior Secretary Sally Jewell formally established the park at ceremony Tuesday at the Department of the Interior's Washington headquarters. The park will consist of Tubman's residence in Fleming and the Home for the Aged in Auburn. Along with the South Street properties, the historic Thompson A.M.E. Zion Church and rectory on Parker Street will be part of the newly created park. Tubman, an abolitionist and civil rights icon, was born in Maryland, but spent the latter part of her life in Auburn. After she died in 1913, the properties she owned in Auburn were transferred to the A.M.E. Zion Church. The park is the 414th unit within the national park system. It's also, along with the Harriet Tubman Underground Railroad National Historical Park in Maryland, the first national park honoring an African American woman. "Harriet Tubman's story is America's story," Jewell said.

2nd park honoring Harriet Tubman added to system

E&E // Corbin Hiar // January 10, 2017

Several speakers said today's addition of the Harriet Tubman National Historical Park in Auburn, N.Y., to the national park system comes at a moment when her inspirational story is especially needed. "It is altogether fitting and proper — particularly during these difficult times and the challenges that we face ahead — to establish a national park in her name in the great city of Auburn, where she lived many years in liberty, and poured the energy of her life into advancing the cause of human freedom," Senate Minority Leader Chuck Schumer (D-N.Y.) said at the signing ceremony in Interior's headquarters. Sen. Kirsten Gillibrand (D-N.Y.) said the escaped slave and Underground Railroad leader's example will help people to "understand what it takes to stand amidst darkness and to stand amidst evil. And in this current time, when many of us feel we are at a time of darkness, that courage is needed."

Bulletin Articles - 1/27/2017

ZINKE, PERRY TO BE VOTED ON BY SENATE COMMITTEE TUESDAY. <u>E&E</u> (1/26) reports that the Senate Energy and Natural Resources Committee on Tuesday will "vote on President Trump's picks to lead the Interior and Energy departments." The vote on Rep. Ryan Zinke, nominee for Interior secretary, and former Texas Gov. Rick Perry, Trump's selection to lead the Department of Energy, was previously scheduled for this week but was abruptly postponed. According to the article, "unlike other Trump Cabinet picks, both Zinke and Perry fared fairly well during their respective confirmation hearings, facing mild opposition from Senate Democrats, and are expected to be confirmed."

Zinke's Confirmation Performance Reviewed. In an op-ed for the Missoulian (MT) (1/26, 114K), Lance Trebesch, CEO/co-owner of Ticket River and Ticketprinting.com, offers an analysis of Interior nominee Ryan Zinke's comments during his confirmation hearing. Trebesch notes that "Zinke expressed support for keeping public lands public after the troubling House vote earlier this month that would assign a zero-dollar value to federal public lands" and says that "Montanans will need to hold him to his word." Trebesch welcomes Zinke's support for "making permanent the Land and Water Conservation Fund," and tackling the National Park Service maintenance backlog. However, he is troubled by "Zinke's answers on national monuments and the Antiquities Act." Trebesch also wished that Zinke had acknowledged the economic impact of outdoor recreation and hopes that Zinke will strike a "balance" in his stewardship of public lands.

Democratic Senators Face Pressure From Left To Oppose All Trump Cabinet Picks.

The Washington Post(1/26, Weigel, 11.43M) reports on the impassioned pleas that Sen. Cory Booker has heard from the left to oppose all of President Trump's Cabinet nominees, and adds, "Nearly every Democrat has been hearing the same this week." The Post says, "On Twitter and other social media, Democrats are excoriated for the votes" in favor of the nominees, and "there are fitful suggestions of primary challenges for senators who go off the reservation." The Post adds that Sen. Elizabeth Warren, "one of the left's most popular figures, attempted to quell protests about her vote for [HUD Secretary-designate] Carson with a Facebook post," in which she "said that she and every Democrat was faced not with choices between opposition and appeasement, but bad and worse."

Bulletin Articles - 1/26/2017

ZINKE, PERRY TO BE VOTED ON BY SENATE COMMITTEE TUESDAY. The AP (1/25) reports the Senate Energy and Natural Resources Committee announced that it will convene "next Tuesday to vote on the nominations" of Ryan Zinke and Rick Perry to head the departments of Interior and Energy. Initially the vote was slated for "this week but was delayed after Sen. Maria Cantwell of Washington state, the panel's senior Democrat, asked for more time to review Perry's record and policy positions."

The <u>Washington Examiner</u> (1/25, 400K) reports Cantwell "had questions over reports that Trump plans to eliminate the Energy Department's energy efficiency and renewable energy offices, said a Democratic aide." The energy secretary nominee "told committee members at his confirmation hearing last week that he could not speak to the truth of those reports, but tried to downplay it as something akin to scuttlebutt." Perry said he would fight for those Energy Department's programs, "but I may not be 1,000 percent successful."

The <u>Billings (MT) Gazette</u> (1/25, 208K) and <u>The Hill</u> (1/25, Cama, Henry, 1.25M) also provided coverage of this story.

WTimes Analysis: Trump, Not Cabinet Or Lawmakers, To Set Environmental Agenda.

The Washington Times (1/25, Wolfgang, 272K) reports "top Republicans are shifting the climate change debate away from the human role and toward a more pragmatic discussion" on the potential actions the government can take, but "it's increasingly clear" that President Trump – rather than his Cabinet or lawmakers – "will be setting the environmental agenda." The Times says that Trump is "now the nation's foremost climate change skeptic" and "seems to be at odds" with Energy Secretary nominee Rick Perry, EPA Administrator nominee Scott Pruitt, and Interior Secretary nominee Ryan Zinke "on the science of global warming." Analysts, according to the Times, say that while the three nominees told Senate panels last week that they believe climate change is real and human actions have contributed to it, "analysts say that their opinions matter little."

OP-ED: ZINKE CAN HELP RESTORE TRUST IN WASHINGTON. For the "Pundits" blog of The Hill (1/25, Curtis, Contributor, 1.25M), Jessica Curtis, the executive director of GOPAC, writes that "now, more than ever, the Department of the Interior is in need of someone" like Rep. Ryan Zinke, "a strong, decisive leader who believes in both duties of the Department — protecting our national treasures and overseeing responsible development of our natural resources." Curtis believes Zinke can be the "partner" that "our states, local governments, and Indian nations need...who can restore trust in Washington as a responsible steward of our federally owned lands." She asserts that "our state and local governments desperately need a Secretary of the Interior who will listen to their concerns — and not reach for the regulatory pen first."

Bulletin Articles - 1/25/2017

SENATE COMMITTEE DELAYS VOTE ON ZINKE, PERRY. <u>E&E</u> (1/24) reports that the Senate Energy and Natural Resources Committee had scheduled votes Tuesday "on Rep. Ryan Zinke (R-Mont.), nominee for Interior secretary, and former Texas Gov. Rick Perry (R), Trump's pick to lead the Department of Energy." However, late Monday night the panel announced "that it was postponing the meeting until further notice." Senate Majority Whip John Cornyn said "that he hoped the Senate could confirm Zinke and Perry before Republicans head to Philadelphia later this week for a retreat with their House colleagues and President Trump."

<u>Politico Pro</u> (1/24) reports that "the Congressional Republicans' annual retreat later this week means the votes won't come until next week at the earliest." The <u>Montana Standard</u> (1/24, 36K) reports that "several sources indicated the vote would be rescheduled for next week, though nothing had been posted to the committee website early Tuesday evening."

In a piece about the delays on confirmation votes for Cabinet nominees Ed O'Keefe noted the postponed votes on both Perry and Zinke for the <u>Washington Post</u> (1/24, O'Keefe, 11.43M). O'Keefe calls the delays "unprecedented."

Additional coverage was provided by Roll Call (1/24, Bowman, 63K), CBS News (1/24, 4.4M), NBC News (1/24, 2.67M), the Washington (DC) Examiner (1/24, 400K), KBZK-TV Butte (MT) Butte, MT (1/24, 785), KFBB-TV Great Falls (MT) Great Falls, MT (1/24, 2K), KHQ-TV Spokane (WA) Spokane, WA (1/24, 50K), and KWYB-TV Butte (MT) Butte, MT (1/24).

Delay On Vote Linked To Perry, Miscommunication. The Great Falls (MT) Tribune (1/24, 85K) reports that the postponement of Zinke's vote "doesn't appear to be related to his performance last week when he was questioned by the Senate Energy and Natural Resources Committee." Nicole Daigle, communications director for the committee, said Tuesday that Sen. Lisa Murkowski "postponed the hearing due to a miscommunication between her" and Maria Cantwell, the ranking Democrat on the committee. Daigle said, "She wants to start 2017 on a good footing with her ranking member. Sen. Murkowski hopes to be able to put a vote before the full committee very quickly." Cantwell "told reporters in Washington Tuesday that Democrats want more information about how Rick Perry will handle energy efficiency standards, according to Cantwell's office." Democrats also "objected to Republicans calling a vote without giving the standard three-day advance notice, Cantwell's office said."

National Wildlife Federation Backs Zinke's Nomination. Politico Pro (1/24) reports that the National Wildlife Federation sent a letter Monday "urging Senate energy panel members to back Zinke's nomination to run the Interior Department." Collin O'Mara, the group's president, wrote, "Representative Zinke understands the intrinsic wildlife and conservation values of the Nation's public lands that are held in trust for generations of all Americans." O'Mara added that NWF would work with Zinke on "how best to balance energy development decisions with key conservation priorities."

Additional coverage was provided by the Daily Caller (1/24, Follett, 898K).

Facing Tough Election Cycle, Trump's Cabinet Picks A Boost For Senate Democrats. The Hill (1/24, Hagen, 1.25M) reported that the Cabinet selections of President Trump "have given Democrats a few bright spots ahead of an otherwise grim 2018 Senate cycle." Facing reelection next year, North Dakota Sen. Heidi Heitkamp (D) and West Virginia Sen. Joe Manchin (D), "both of whom Trump had considered for administration roles, will remain in the upper chamber." Perry was being considered the energy secretary post, which ultimately went to Perry. In addition, Rep. Ryan Zinke (R), who had been viewed as "a top" potential challenger to Montana Sen. Jon Tester (D) in 2018, "has been tapped to serve as Interior secretary." Jim Manley, a former aide to ex-Senate Minority Leader Harry Reid, told The Hill, "Given the number of Democrats up [for reelection in 2018], I don't expect Democrats to catch a lot of breaks, but they sure did in this particular instance."

Additional Coverage Of Zinke's Confirmation Hearing. Additional coverage of Zinke's confirmation hearing was provided by the High Country (CO) News (1/24, 77K).

Bulletin Articles - 1/24/2017

SENATE COMMITTEE POSTPONES VOTES ON ZINKE, PERRY. The Hill (1/23, Henry, 1.25M) reports Senate Energy and Natural Resources Committee has postponed a vote, which was scheduled for Tuesday morning, on two of President Trump's cabinet nominees, Rep. Ryan Zinkie to be the next Interior Secretary, and former Texas governor Rick Perry to head the Energy Department. On Monday evening, the committee said that the hearing will be delayed "until further notice." Perry and Zinke "have not been considered especially controversial nominees." Reuters (1/23) reports "the panel gave no reason for the delay." The AP (1/24) and the websites of CNBC (1/23, 2.17M) and NBC News (1/24, 2.67M) also provide coverage of the postponement.

The <u>Washington Examiner</u> (1/23, 400K) reports both "nominees are less controversial than Trump's pick to lead the Environmental Protection Agency, Oklahoma Attorney General Scott Pruitt, who is being considered by the Environment and Public Works Committee." The three men "are the key Cabinet

officials who would drive Trump's energy and environment agenda." A separate article by <u>The Hill</u> (1/23, Cama, Henry, 1.25M) reports that if the nominations are approved by the committee, "they'll move to the floor for a final confirmation vote."

Zinke's Top Donor Lobbies For Confirmation. <u>E&E</u> (1/23) reports that Rep. Ryan Zinke has "gotten a boost from his biggest campaign donor as he looks to secure confirmation as the next secretary of the Interior." Fidelity National Financial Inc. "disclosed that it lobbied in support of President Trump's nominee for Interior toward the end of last year." John Benton, "who handles governmental relations for Fidelity, told E&E News that the reason for the corporation's lobbying in support of Zinke was simple. Fidelity's nonexecutive chairman, William Foley II, is a good friend of the congressman."

MEMBERS OF TRUMP ADMINISTRATION'S INTERIOR TEAM ARRIVE. Politico Pro (1/23) reports that "a list circulating has a number of names expected to be on Interior's beachhead team arriving" Monday. They include: "long-time Interior employee James E. Carson as acting deputy secretary; Doug Domenech, a former deputy chief of staff at DOI; Kathy Benedetto, a former Natural Resources Committee professional staffer for a role at BLM; Daniel Jorjani, former general counsel to Freedom Partners; Rusty Roddy for the Fish and Wildlife Service; Virginia Republican operative Tucker Davis for a role within the Office of Surface Mining Reclamation and Enforcement; DCI Group's Megan Bloomgren; Micah Chambers, deputy chief of staff to Zinke; Heather Swift, a Zinke spokeswoman; Kate Macgregor, another Natural Resources panel staffer, for a job with the assistant secretary for land and minerals management; Casey Hammond, who works for the committee's Subcommittee on Oversight and Investigations; and Melissa Simpson, formerly with the Safari Club."

<u>E&E</u> (1/23) reports that Domenech, "the leader of Trump's Interior transition team and an Interior official during the Bush administration," is" moving in as assistant secretary of insular affairs."

OP-ED: ZINKE WON'T HAVE CONGRESS' HELP IN FIXING PARKS' MAINTENANCE PROBLEM. For the "Pundits" blog of <u>The Hill</u> (1/23, Regan, Contributor, 1.25M), Shawn Regan, a research fellow at the Property and Environment Research Center, writes that if Interior nominee Ryan Zinke "wants to fix the national park deferred maintenance problem, he's going to have to look beyond Congress for solutions." According to Regan, "decades of neglect and misplaced priorities have made it clear that relying on Congress is hardly the solution; it's the root of the problem." Regan suggests that "one solution is to rely more on park visitors, instead of Congress, for revenue." Regan proposes that "other ideas, such as harnessing public-private partnerships and tapping the private sector to help maintain and operate parks, could also help — as long as park leaders are willing to think outside the box."

Bulletin Articles - 1/23/2017

MCCLATCHY ANALYSIS: TRUMP EXPECTED TO END OBAMA'S CLIMATE POLICIES DESPITE NOMINEES' TESTIMONY. McClatchy (1/21, Leavenworth, 74K) reports that while Interior Secretary-designate Ryan Zinke, Energy Secretary-designate Rick Perry, and Environmental Protection Agency Administrator-designate Scott Pruitt "have taken a more moderate line on global warming" since their nominations, they did not describe "climate change as an urgent threat requiring a coordinated governmental response, as many scientists contend," and they still "appear to support" President Trump's "call to repeal former President Barack Obama's actions to reduce greenhouse gases, without a replacement alternative."

Additional coverage was provided by the <u>Wall Street Journal</u> (1/22, Harder, Subscription Publication, 6.37M), <u>The Hill</u> (1/22, Cama, 1.25M), and the <u>Christian Science Monitor</u> (1/22, 387K).

ARLINGTON MEMORIAL BRIDGE PUTS SPOTLIGHT ON TRUMP'S INFRASTRUCTURE PLAN. The Hill (1/20, Zanona, 1.25M) reports that the Arlington Memorial Bridge was "shut down to vehicular traffic from Thursdayto Saturday because it has been placed under weight limits after being deemed structurally deficient." According to the article, "to some, the decaying bridge is a symbol of the need for the United States to spend money on its crumbling roads and bridges." However, "the infrastructure plan put forward by Trump, say critics, would likely do nothing to revitalize the bridge," because "the plan would rely heavily on tax credits to incentivize private firms to build projects, rather than repair existing structures owned by the government." The article notes that "the local issue already got a bit of the national spotlight at a Senate confirmation hearing earlier this week." Interior nominee, Rep. Ryan Zinke "said he would try to ensure that Trump's infrastructure bill 'includes our national treasures' like the Arlington Memorial Bridge."

ADDITIONAL COVERAGE OF ZINKE'S CONFIRMATION HEARING. Additional coverage of Interior nominee Rep. Ryan Zinke's confirmation hearing last week was provided by the <u>Scientific American</u> (1/20, 1.88M).

ZINKE GIVEN MIXED GRADES FOR CONFIRMATION PERFORMANCE. In an editorial, the Missoulian (MT)(1/20, 114K) gives "huckleberries to U.S. Rep. Ryan Zinke for the pragmatic comments he made during his confirmation hearing before the Senate on Tuesday." It notes that although Zinke has been a "staunch supporter" of President Trump's campaign, he also "showed a willingness to depart from Trump on key issues, such as climate change." However, the paper also gives "chokecherries to Zinke for his asyet unexplained vote in favor of a rule change that would allow federal land transfers to be treated as budget-neutral." According to the paper, "his vote and his lack of communication left many Montanans feeling as though Zinke had already abandoned his post as their representative."

ZINKE URGED TO BE BALANCED IN LAND MANAGEMENT. The Havasu (AZ) News-Herald (1/22, 27K) editorializes that Interior Secretary-designate Ryan Zinke "brings what he calls an 'all of the above' approach to the Interior Department, advocating for fish and wildlife while promoting responsible and appropriate land and business development." For western Arizona, the paper says that "probably the most important things to monitor in the new administration are commitments to recreational access and assurance of fact-based approaches to water quality and its continued supplies." Although some Republicans may "want to press the advantage with a wholesale overturning of regulations and a large transfer of lands," the paper argues that "doing so will further assure that federal land is just a game piece in a political match, inviting a backlash when the GOP loses power one day." The editorial hopes that "Zinke will bring the right approach, the right balance to assure highest use each type of land, whether that be energy development, hunting and fishing or just solitude."

LETTER: MONTANANS EXPECT MUCH FROM ZINKE. In a letter to the Missoulian (MT) (1/22, 114K), Ben Horan, executive director of MTB Missoula, penned an open letter to Interior nominee Rep. Ryan Zinke. Horan extends "a word of congratulations as a mountain biker, as an outdoorsman and as a Montanan." Horan writes that "our relationship moving forward will be built on trust, expectations and promises." He writes; "We trust that as a fellow Montanan, you understand that public land is essential to the quality of life, economic growth and cultural resiliency that endears the West to our shared American identity. We trust that you realize that an overwhelming majority of western residents oppose federal land transfers. We trust that you know that outdoor recreation, almost entirely on public land, contributes

64,000 jobs, \$1.5 billion in salaries, and \$6.5 billion in sales to the Montana economy." Also, Horan expects that Zinke "will continue to support federal land ownership" and that he will "continue protect the Land and Water Conservation Fund" Finally, he promises to follow Zinke's record.

ZINKE URGED TO UPHOLD GOLD BUTTE'S NEW PROTECTED STATUS. In an editorial, the Las Vegas Sun(1/22, 178K) raises concerns after Interior nominee Ryan Zinke said he planned to review the designation of Gold Butte as a national monument during his confirmation hearing last week. The paper welcomes Zinke's plan to visit Nevada, but asserts that "there's only one acceptable outcome to his decision-making, and that's to keep the order firmly in place." The paper acknowledges that "the method behind the declaration wasn't ideal — it would have been wonderful if Nevada congressional delegates would have succeeded in pushing through a legislative solution." However, it concludes that "Obama's order was acceptable and appropriate."

CONGRESS URGED TO PERMANENTLY REAUTHORIZE LWCF. In an editorial, the Missoulian (MT) (1/22, 114K) argue that "the new Congress could do itself and future Congresses a favor by breaking its longstanding habit of kicking simple but important measures down the road with only partial funding and temporary authorization." It identifies the Land and Water Conservation Fund as "the easiest" of "all the potential places to start." It concludes that "in the House, where a bipartisan solution already awaits action, it is particularly important that whoever wins election to replace Congressman Ryan Zinke, who appears headed for confirmation as President Trump's pick for secretary of the Interior, shares Zinke's unequivocal support for the LWCF. And that this person demonstrate that support by actually voting to fully fund and permanently authorize it."

Bulletin Articles 1/20/2017

HAUGRUD TO TAKE HELM AT INTERIOR PENDING ZINKE'S CONFIRMATION. <u>E&E</u> (1/19) reports that "career staffers are in line to take the helm of energy and environmental agencies while Donald Trump's incoming Cabinet officials await confirmations." At the Interior Department, Jack Haugrud will "take over as acting secretary, according to outgoing agency spokesman Blake Androff." Haugrud is "currently acting principal deputy solicitor at Interior." Trump's nominee to lead Interior, Ryan Zinke, "testified before the Senate this week and is expected to be confirmed and on the job relatively quickly."

<u>Politico Pro</u> (1/19, Subscription Publication) reports that it is unclear when the Senate will vote on Zinke, "but it is not unusual for a senior career official to serve as acting administrator for a few days between administrations, and typically they do little aside from keeping the agency running."

Trump Energy, Environment Nominees Express Similar Messaging On Climate Change. Bloomberg News (1/19, Dlouhy, Natter, 2.41M) reports in confirmation hearings this week Donald Trump's nominees for key energy and environmental posts "rejected the idea that global warming is a hoax," but they debate its the effects. The responses "deviated from what they've said in the past," but critics say "the new formulation may just be another way for Republicans to avoid pursuing policies to curb the use of fossil fuels." The shift in tone "reflects the reality on the ground," as temperatures are trending upward and "public opinion has shifted." The nominees are trying to "avoid the outright 'climate denier' label by vaguely admitting that warming is occurring and may have something do to with emissions," said Paul Bledsoe, a former climate adviser in the Clinton administration, calling the rhetorical strategy a "nondenial denial."

The <u>Washington Post</u> (1/19, Dennis, Mooney, 11.43M) reports Interior Secretary nominee Ryan Zinke said: "I do not believe it is a hoax. . . . I think where there's debate on it is what [the human] influence is, what can we do about it."

The <u>Christian Science Monitor</u> (1/19, 387K) reports to most climate scientists, the comments are "deliberately misleading," says Susan Joy Hassol, director of Climate Communication.

NYTimes Analysis: Trump Nominees Present Picture Of "Still Evolving" Police Agenda. The New York Times (1/19, Shear, Subscription Publication, 13.9M) reports that "in dozens of hours of testimony," President-elect Trump's "nominees told senators that they favored less regulation, a smaller federal government, more state control over policy decisions and taxpayer money, and greater personal responsibility by Americans across the country." The article notes that Zinke of Montana, the nominee to lead the Interior Department, said he supported drilling, mining and logging on federal landsYet "taken together, the congressional testimony reflects a domestic policy agenda that is still evolving," as "during his campaign, Mr. Trump was often contradictory in laying out a domestic policy blueprint."

Zinke Wins Approval From Ag Groups. Tri-State Livestock News (SD) (1/19) reports that "with the Senate Hearing for the Secretary of the Interior nominee Ryan Zinke completed, those most affected by federal lands management in the west are giving Montana's sole Congressman a nod of approval." The article notes that "throughout his opening statement, Zinke reiterated his willingness to meet with people most affected by the department's policies, and listed his three immediate tasks." According to the article, "despite the lack of agriculturally related comments, ranchers believe the Congressman will listen to the concerns of those whose livelihoods depend on grazing public lands."

Editorial: Zinke Likely To Pass Senate Muster. In an editorial, the Billings (MT) Gazette (1/19, 208K) believes that Zinke will "soon be confirmed as U.S. Interior secretary." According to the editorial, "Zinke mostly, but not completely, agreed with comments from GOP senators," and "he deftly answered harder questions from Democratic senators." Notably, "he spoke on points of bipartisan agreement: encouraging collaborative solutions, ensuring multiple use of federal lands to include recreation and natural resource development, protecting public access, respecting Native American treaty obligations, shrinking the \$12.5 billion National Park Service deferred maintenance backlog." The paper concludes that "Zinke is well qualified to become the first Montanan to serve as secretary of a U.S. government department."

Zinke's Stance On National Monument Designations Appreciated. The Las Vegas Review-Journal (1/20, 676K) editorializes that "Zinke did make eminent sense when he said during the hearing that it would be appropriate to work 'with, rather than against, local communities and the states' when making determinations about federal monuments." According to the paper, "Zinke's approach would be a breath of fresh air and long overdue."

Bulletin Articles - 1/19/2017

ZINKE LIKELY TO BE CONFIRMED. Politico Pro (1/18) reports that Energy and Natural Resources Ranking Member Maria Cantwell "seemed cautiously optimistic" about Interior's secretary nominee, Ryan Zinke, during his confirmation hearing on Tuesday. She said, "He's had some good articulation of things that people care about." Chairman Lisa Murkowski "said at the end of the hearing she believed Zinke would be confirmed."

<u>CNN</u> (1/18, Browne, Payson-Denney, 29.79M) reports that Zinke "should not face too much of a fight in Congress, but until he is confirmed the department will be led by a relatively obscure official," Deputy Solicitor Kevin Haugrud, according to the department's press secretary, Jessica Kershaw.

Zinke Touts Balanced Approach On Conservation, Development. <u>E&E</u> (1/18) reports that Zinke, during his confirmation hearing on Tuesday "repeatedly stressed a desire to act as both an environmental steward and a careful manager of resources." During is hearing, Zinke "referenced public lands icons John Muir and Gifford Pinchot, noting that he would follow Muir's hands-off approach for 'lands that deserve special recognition,' while the 'preponderance' of other public lands would be better-served by Pinchot's sustainable-use model." Zinke "said he strongly supports the National Environmental Policy Act as the 'backbone of environmental policies' but noted that he will prioritize energy independence to support economic growth."

Zinke Suggests Possibility Of Overturning National Monument Decisions. <u>E&E</u> (1/18) reports that Zinke "promised to protect public lands but also indicated that, if he is confirmed as Interior secretary, he will urge President-elect Donald Trump to undo some national monuments." According to the article, "Zinke strongly suggested that the Trump administration will take the unprecedented and legally uncertain step of attempting to undo some national monuments established unilaterally by presidents using their authority under the Antiquities Act," He said, "It will certainly be interesting to see whether the president has the authority to nullify a monument." But Zinke "also reaffirmed his support for the Land and Water Conservation Fund and distanced himself from a House rules package he voted for earlier this month that contained a provision making it easier to turn federal lands over to states."

Zinke Says Climate Change Is "Indisputable". <u>E&E</u> (1/18) reports that Zinke "broke" with President-elect Donald Trump on Tuesday by "telling the Senate Energy and Natural Resources Committee that he does not think climate change is a hoax." When pressed repeatedly by Sen. Bernie Sanders, Zinke "said it is 'indisputable' that the climate is changing and humans are having an influence." He added, "As a matter of fact ... my family and I have eaten lunch on Grinnell Glacier, and the glacier has receded during lunch." Later, Sen. Angus King "said he was going to use that story in his 'arsenal' to explain the impacts of increased greenhouse gas emissions on the planet's atmosphere."

Zinke Promises To Tackle Issue Of Sexual Harassment In NPS. CNN (1/17, Kopan, 29.79M) reports that Zinke "faced tough questions Tuesday about his and Trump's views on sexual assault during his Senate confirmation hearing." Sen. Tammy Duckworth asked Zinke "a series of questions about his views on sexual assault" and "asked Zinke, a former Navy SEAL, how he would tackle problems of sexual harassment within the National Parks Service, where men and women serve in sometimes remote and rugged locations." Zinke said, "I take issues of sexual assault ... absolutely seriously." He continued, "They have to know from leadership from the top to the bottom that we have zero tolerance." Later, Zinke "committed" Sen. Debbie Stabenow "that he would study the issue of sexual harassment in the Parks Service." Zinke said, "(Everyone) should absolutely have the right expectation of a work environment that is conducive to success. And if there is a culture of sexual harassment, that is flat wrong. And I'm going to stamp it out if confirmed."

Zinke Questioned About Sage Grouse. Boise (ID) State Public Radio (1/18) reports that Zinke was "pushed on several hot button land use issues – issues he's well acquainted with as a Montana congressman." According to the article, "when it comes to questions about how he would manage the relationship between states and federal land managers, the greater sage grouse inevitably came up." Zinke said, "Everyone loves sage grouse, everyone understands that we have to protect the species –

generally those living on the ground are in a better position. And we should be an advocate and a partner in this, rather than heavy-handed."

Zinke Urged To Remember Commitments Made During Hearing. The Missoula (MT) Independent (1/19, 65K) says that "Zinke offered a lot of commitments Tuesday." The article lists them as: "No land transfers. No denying climate change. No tolerance for sexual misconduct among Interior employees." It advises that "if confirmed, he best remember those statements. Because this time, finally, he was under oath."

Zinke Urged To Prioritize Stewardship Of Public Lands. In an op-ed for the AgWeek (1/17, 87K), rancher Mark Fix raises concerns that Rep. Ryan Zinke will not follow "in the long line of great stewards that have preceded him." Fix asserts, "As the top public custodian of our country's natural resources and public lands, he will need to understand the value that Americans put on the fair and wise management of public lands and public resources." He hops Zinke will "make stewardship his highest priority – stewardship of land, air, water, taxpayers, and the sovereign treaty rights of American Indians."

Additional Coverage. Additional coverage of the hearing was provided by the Great Falls (MT) Tribune(1/17, 85K), the Washington (DC) Post (1/17, 11.43M), the Washington (DC) Post (1/17, 11.43M), the Washington (DC) Post (1/17, 11.43M), the Washington (DC) Post (1/17, 11.43M), the Washington (DC) Post (1/17, 11.43M), Wired (1/18, 3.98M), Yahoo! News (1/17, 8.62M), and KING-TV Seattle (1/17, 313K).

Bulletin Articles - 1/18/2017

ZINKE STRESSES NEED FOR CONSERVATION WHILE ALSO REMAINING OPEN TO DRILLING AND MINING. The Hill (1/17, Cama, 1.25M) reports that Interior Secretary-designate Ryan Zinke's opening speech at his confirmation hearing before the Senate Energy and Natural Resources Committee "focused on his credentials as a committed conservationist, while largely avoiding controversial issues like how much fossil fuel extraction should happen on federal land." Zinke "said he would make three priorities: work to restore trust through cooperation with local communities and states, work on the National Park Service's \$12.5 million maintenance backlog — which he wants to be part of Trump's major infrastructure legislation — and giving front-line land managers the ability to make decisions that they need to." He said, "I look forward to ... representing the interests of our great nation and giving a voice to all Americans, to include our great Indian Nations, on how we manage and sustain our public lands and treasures they contain."

The New York Times (1/17, Huetteman, Subscription Publication, 13.9M) reports that Zinke "pitched himself...as a serious steward of federal resources" during his confirmation hearing, "frequently bucking conservative orthodoxy on ownership of public lands, federal funding for preservation and even, briefly, climate change." But he also "emphasized his support for drilling, mining and logging on federal lands, activities strongly opposed by many environmental groups." Zinke "broke with" President-elect Trump "and even his own past statements on climate change," saying that it "was 'indisputable' that the climate is changing and that humans are having an effect on it."

<u>Politico</u> (1/17, Wolff, Whieldon, 2.46M) reports Zinke cited Teddy Roosevelt and "Sierra Club founder John Muir and early-1900s Forest Service chief Gifford Pinchot as role models for his approach to conservation," while also calling for an "all of the above" energy policy.

Reuters (1/17, Volcovici) reports that Zinke told the Senate Energy and Natural Resources Committee that he "would consider an expansion of energy drilling and mining on federal lands but would ensure sensitive areas remain protected." Zinke said, "I can guarantee you it is better to produce energy domestically under reasonable regulation than overseas with no regulation." However, he said that he "was committed to protecting sensitive wildlife habitats and to keeping federal lands under federal control to ensure they are preserved for future generations, so 'my granddaughter's children can look back and say that we did it right."

The <u>Los Angeles Times</u> (1/17, Yardley, 4.52M) reports that Zinke "said states should have more say in policies that affect land and water within their boundaries," but also "said that he 'absolutely' opposed the sale or transfer of public land."

Additional coverage was provided by Politico (1/17, 2.46M), the Wall Street Journal (1/17, Harder, Subscription Publication, 6.37M), The Hill (1/17, Cama, Henry, 1.25M), the Washington (DC) Post (1/17, 11.43M), the Washington (DC) Post (1/17, Fears, 11.43M), the Washington (DC) Times (1/17, Dinan, 272K), the Washington (DC) Examiner (1/17, 400K), Reuters (1/17, Volcovici), the Great Falls (MT) Tribune (1/17, 85K), the Boston (MA) Globe (1/17, Daly, 1.08M), the Alaska Dispatch News (1/17, 212K), and WRC-TV Washington (DC) Washington (1/17, 453K).

Zinke Signals Support Of Fossil Fuels. ABC News (1/17, 3.09M) reports that Zinke said "that he would consider reversing a decision from the Obama administration last year to halt oil and gas drilling in the Arctic, a move that could allow fossil fuel development in region." He said, "The president-elect has said we want to be energy independent. I can guarantee you it is better to produce energy domestically under reasonable regulation, than watch it be produced overseas with no regulation."

The Ogden (UT) Standard-Examiner (1/17, 100K) reports that Zinke also said, "The war on coal, I believe, is real. All-of-the-above is the correct (energy) policy. Coal is a great part of that energy mix. I'm also a great believer that we should invest in research and development on coal — because we know we have the asset — to make it cleaner and better. We should lead the world in clean energy technology." However, "Zinke hesitated several times to mention renewables as part of his 'all of the above' energy strategy for public lands — a term often used by politicians to signify that they favor coal, oil, gas and renewables development instead of focusing primarily on renewables to address climate change and other environmental challenges."

<u>Politico Pro</u> (1/17) reports that Zinke "said that if confirmed as Interior secretary he would support congressional efforts to block a rule that orders oil and gas companies to reduce the amount of methane that leaks from their operations on public lands." According to the article, "while he opposes the specific rule, Zinke's answer resembles Interior Secretary Sally Jewell's from early in 2016 when she proposed it."

Additional coverage was provided by My Central Oregon (1/17) and WTVQ-TV Lexington (KY) Lexington, KY (1/17, 1K).

Zinke Says Climate Change Is Real. The Hill (1/17, Henry, 1.25M) reports Zinke said climate change isn't a "hoax." Zinke added, "I think where there's debate is what that influence is, what we can do about it. ... I'm not a climate science expert, but I will become much more familiar with it and it will be based on objective science." The Washington Post (1/17, Mooney, Erickson, 11.43M) says that Zinke's answer to the question "seems consistent with how other Trump nominees have addressed this tough question."

The <u>Washington Examiner</u> (1/17, Cohen, 400K) reports Zinke indicated that climate change "is visible at Glacier National Park, recalling that he could see a glacier receding over lunch with his family while they were at the park one day."

Additional coverage was provided by the <u>AP</u> (1/17, Daly), the <u>Washington Times</u> (1/17, Wolfgang, 272K), <u>Bloomberg Politics</u> (1/18, 201K), <u>CNN</u> (1/17, Diamond, 29.79M), <u>NPR</u> (1/17, 1.92M), <u>McClatchy</u> (1/17, 74K), <u>U.S. News & World Report</u> (1/17, Neuhauser, 1.02M), <u>TIME</u> (1/17, 6.98M), <u>UPI</u> (1/17, Ware), the <u>Boston (MA) Globe</u>(1/18, Mooney, Erickson, 1.08M), and <u>Montana Public Radio</u> (1/17).

Zinke Says He Prefers Having State's Support For National Monuments. Politico Pro (1/17) reports that Zinke "said there was no provision for rescinding monuments in the Antiquities Act, but he left open the door to some kind of concessions to states whose leaders may not want a monument." He agreed with Sen. Martin Heinrich "that there is no provision in the Antiquities Act that allows the president to rescind a national monument." However, "he also pushed for state input into management of a monument, seemingly opening the door to an alternative way to weaken monument status."

Zinke Highlights Maintenance Backlog At National Parks. The Washington Post (1/17, O'Keefe, Fears, 11.43M) reports that Zinke also said "that completing billions of dollars in backlogged projects at national parks should be a major part of the new president's plans to revamp aging roads, bridges and transportation hubs."

Zinke Earns High Marks From Montanans With Confirmation Performance. The Billings (MT) Gazette (1/17, 208K) reports that "Montanans from Trout Unlimited, to the timber industry, to Indian tribes spoke approvingly of Zinke's responses." Bozeman businesswomen Marne Hayes "had a half dozen things she needed to hear before supporting her congressman's nomination, one that would make Zinke the first Montanan in a presidential cabinet." According to the article, "Hayes needed Zinke to oppose the sale of public lands, and she wanted confirmation of his objection to a proposed gold mine on the Montana edge of Yellowstone National Park." Hayes also "wanted affirmation that federal royalties from offshore drilling would continue to be spent on improving public land access." The article says that "Zinke delivered on all three, a good thing considering Hayes had assembled more than 100 members of the group Business for Montana's Outdoors to oppose Zinke's nomination if he didn't."

Additional coverage was provided by the <u>Helena (MT) Independent Record</u> (1/17, 38K) and the <u>Missoulian (MT)(1/17, 114K)</u>.

Republican Senators Hope For More Balanced Approach Under Zinke. Politico Pro (1/17) reports that Republican senators hope an Interior Department under Zinke "would strike a balance between the needs of different constituencies and avoid the 'overreach' of the Obama administration's aggressive approach to conservation."

Relatively Few Trump Nominees Likely To Be Confirmed Before Inauguration. Politico (1/17, Everett, Dawsey, 2.46M) writes that when Bill Clinton took office as president in 1993, "every single member of his Cabinet but one was confirmed by the Senate within two days. When Donald Trump is sworn in on Friday, he'll be lucky to have half that many installed." Politico says "it wasn't supposed to be this difficult for Trump" to get his nominees confirmed, "especially since Democrats did away with the 60-vote requirement for Cabinet nominees." But even though Trump "made his Cabinet selections in rapid fire after the election," they have "been hampered since by ethics complications for some of them, Democratic opposition and an unforgiving calendar."

Additional coverage was provided by CNN (1/17, Barrett, 29.79M).

Letter: Zinke Wrong Choice To Lead Interior. In a letter to the <u>Cape (DE) Gazette</u> (1/16), Leslie Ledogar writes that "our federal lands are too precious to entrust to a presidential cabinet nominee who refuses to take a consistent stand against federal land-use giveaways." For this reason, Ledogar asks Deleware's senators to "oppose the confirmation of Rep. Zinke as our next secretary of the interior."

Additional Coverage. Additional coverage was provided by <u>E&E Daily</u> (1/17, Subscription Publication), <u>ClimateWire</u> (1/17, Subscription Publication), <u>The Hill</u> (1/17, Devaney, Wheeler, 1.25M), <u>The Hill</u> (1/17, Cama, Henry, 1.25M), the <u>New York (NY) Times</u> (1/17, Huetteman, Subscription Publication, 13.9M), the <u>Washington (DC) Post</u> (1/17, Viebeck, 11.43M), the <u>Los Angeles (CA) Times</u> (1/17, 4.52M), <u>USA Today</u> (1/17, Kelly, 5.28M), <u>CNN</u> (1/17, Kopan, 29.79M), the <u>Huffington Post</u> (1/17, 237K), the <u>Huffington Post</u> (1/17, 237K), <u>PBS NewsHour</u>(1/17, 255K), <u>U.S. News & World Report</u> (1/17, Alexander, 1.02M), the <u>Chicago (IL) Tribune</u> (1/17, 2.54M), <u>The Guardian (UK)</u> (1/17, Jacobs, 4.07M), the <u>Huffington Post</u> (1/17, 237K), <u>Breitbart</u> (1/17, 2.02M), <u>Common Dreams</u>(1/17, 19K), <u>Think Progress</u> (1/16, 83K), <u>EcoWatch</u> (1/17, 47K), and KQED-FM San Francisco (1/17, 46K).

Coverage by the AP was also picked up by the <u>Houston (TX) Chronicle</u> (1/17, Daly, Press, 1.91M), the <u>Denver (CO) Post</u> (1/17, 778K), the <u>Chicago (IL) Tribune</u> (1/17, 2.54M), the <u>Albuquerque (NM) Journal</u> (1/17, 234K), and the <u>San Francisco Chronicle</u> (1/17, 2.2M).

Additional Coverage Of Zinke's Experience And Positions On Issues. Background reporting on Zinke was provided by <u>E&E Publishing</u> (1/16, Subscription Publication, 705), <u>Politico</u> (1/17, Whieldon, 2.46M), and <u>Politico</u>(1/17, Whieldon, Snider, Wolff, 2.46M).

Bulletin Articles - 1/17/2017

ZINKE CONFIRMATION HEARING TO BE HELD THIS WEEK. On its website, NPR (1/16, Taylor, 1.92M) reports several of President-elect Donald Trump's nominees will receive Congressional hearings this week, and most of them "are expected to be fairly routine," Interior Secretary-designate Ryan Zinke will have his confirmation hearing before the Senate Energy and Natural Resources Committee on Tuesday.

The AP (1/16, 1.27M) reports that the ownership of public lands is likely to be a focal point for the hearing, considering Zinke's vote "in favor of a measure from House Republicans that would allow federal land transfers to be considered cost-free and budget-neutral, making it easier for drilling and development." Also, "coal is likely to be another focus on Tuesday." Eric Washburn, "a lobbyist and former aide to Senate Democratic leader Tom Daschle, said Zinke will likely be asked to 'defend federal ownership over federal lands' and detail how he would balance energy development with the need to conserve fish and wildlife habitats."

The <u>Boston Globe</u> (1/17, Linskey, 1.08M), in a piece that contends that many of Trump's Cabinet choices do not have "expertise in the departments they'll run," reports Zinke is "a former Navy SEAL commander

who's been a member of the House of Representatives representing Montana for two years and is now on his way to run the \$20 billion Department of the Interior."

Coverage by the AP was also picked up by the Washington (DC) Times (1/17, Daly, 272K), Philly (PA) (1/17, 942K), TIME (1/17, 6.98M), U.S. News & World Report (1/17, 1.02M), and the Daily Mail (1/17, 4.59M).

Additional coverage was provided by Voice of America (1/17, 57K).

Two Retired Admirals Say Zinke Understating Impact Of Travel Billing "Glitch." The New York Times (1/16, Drew, Naylor, Subscription Publication, 13.9M) reports that Interior Secretary-designate Ryan Zinke "has promoted his 23-year career in the Navy SEALs as one of his main credentials" in his runs for office in Montana, but now, as a Cabinet nominee, he "has acknowledged one 'glitch': that he improperly billed the government for travel" when he was a SEAL Team 6 officer. While he repaid the cost, "two retired admirals under whom Mr. Zinke served say his account understates the damage that it did." Zinke "was in fact punished for abusing his travel expenses, they say, through an evaluation that prevented him from rising to senior levels in the Navy."

Conservation Group Backs Zinke. Politico Pro (1/13) reports that ahead of his confirmation hearing, the Theodore Roosevelt Conservation Partnership is "throwing its support behind Rep. Ryan Zinke's Interior secretary nomination." President Whit Fosburgh wrote in a Thursday letter, "We are confident that, as Secretary of Interior, Congressman Zinke will continue to approach resource management issues with an eye towards improving the multiple-use productivity of our public lands and seeking solutions that balance the needs of all Americans."

Watchdog Groups Raise Concerns About Zinke Donors. <u>E&E</u> (1/13) reports that Rep. Ryan Zinke "took thousands of dollars in campaign donations from companies that drill for oil and gas on the vast public lands that he would oversee as Interior secretary." Watchdog groups say "the contributions, totaling \$345,000 since 2013, raise questions about whether the fossil fuel industry could influence a Cabinet secretary who controls drilling, mining and conservation policies across more than 500 million acres of public land." The article notes that "Zinke's top individual campaign donor is Taylor Reid, president and chief operating officer of a Texas-based oil and gas company that drills in the Bakken oil field." Reid, "who has been with Oasis Petroleum since its founding in 2007, donated \$11,600 to Zinke's election efforts between 2013 and 2016, an analysis of Federal Election Commission data shows."

Additional coverage was provided by NPR (1/16, 1.92M).

Trump's First Cabinet Is "More White And Male" Of Any Since Reagan. The New York Times (1/13, Lee, Subscription Publication, 13.9M) reports President-elect Trump's cabinet "is shaping up to have a smaller percentage of women and nonwhites than the first cabinets of Barack Obama, George W. Bush, Bill Clinton and George Bush." In addition, the Times says these women "will also be in some of the lowest-ranking positions."

Zinke Urged To Open Up Federal Lands For Development. In a piece for Forbes (1/13, 15.17M), Christine Harbin, director of federal affairs and strategic initiatives of Americans for Prosperity, argue that Rep. Ryan Zinke can "unleash economic growth" if he "opens up a portion of federal lands and waters for energy exploration and economic development." Harbin points tot 2015 study by Joseph R. Mason of the Wharton School of the University of Pennsylvania and Louisiana State University, which "shows that

opening up federal lands and waters to exploration and development would drive stronger economic growth, more jobs, better wages and higher revenues for federal, state and local treasuries." Harbin dismisses "objections to this proposal on environmental grounds." She notes that "recent evidence suggests otherwise: Though American energy production nearly doubled from 2008 to 2014, carbon emissions actually decreased during the same time frame."

Senators Urged To Press Zinke On Conservation Issues. In an op-ed for the Denver Post (1/16, 778K), Jennifer Rokala, executive director for the Center for Western Priorities, urges Senators to ask Rep. Ryan Zinke to explain his stance on public lands. Rokala also urges Senators to ask "Zinke to confirm his strong support for renewing and funding" the Land and Water Conservation Fund. Rokala also says that "Senators should ask Zinke, who received hundreds of thousands of dollars in campaign donations from oil, gas and coal companies, if he plans to rescind any of the rule changes that earn taxpayers a fair share from their public resources."

Opinion: Green Groups' Worries About Zinke Justified. In a piece for the Conversation (UK) (1/16, 14K), John Freemuth, Professor of Public Policy and Senior Fellow Cecil Andrus Center for Public Policy, Boise State University, and Mackenzie Case, GIS and Policy Analyst, Boise State University, write that "while some conservation groups are cautiously optimistic that they can work" with Rep. Ryan Zinke, "others are worried about his support for fossil fuel production on public lands and his position on other key environmental issues." The authors, drawing from their "experience analyzing past controversies over public land use in the West under Republican administrations," say that "these worries are justified."

Zinke Urged To Prioritize Stewardship Of Public Lands. In an op-ed dfor the Montana Standard (1/15, 36K), rancher Mark Fix raises concerns that Rep. Ryan Zinke will not follow "in the long line of great stewards that have preceded him." Fix asserts, "As the top public custodian of our country's natural resources and public lands, he will need to understand the value that Americans put on the fair and wise management of public lands and public resources." He hops Zinke will "make stewardship his highest priority – stewardship of land, air, water, taxpayers, and the sovereign treaty rights of American Indians."

Zinke Asked To Find "Dedicated And Capable" Manager To Lead BLM. In a letter to the Helena (MT) Independent Record (1/16, 38K), David S. Watson asks Rep. Ryan Zinke to find a "dedicated and capable" manager to be the next director of the Bureau of Land Management According to Watson, "proper management of the BLM requires a career employee who over his/her career has developed the necessary knowledge and skills of multiple use management and who can manage a team of dedicated and diverse professionals to achieve those goals."

Additional Coverage Of Zinke's Ethics Report. Additional coverage of the ethics report on Rep. Ryan Zinke was provided by the Helena (MT) Independent Record (1/13, 38K).
